Preface.....	xv
Introduction.....	xix
Acknowledgments.....	xxiii
Author.....	xxv
1 Gear Design Trends.....	1
1.1 Small, Low-Cost Gears for Toys, Gadgets, and Mechanisms.....	4
1.2 Appliance Gears.....	6
1.3 Machine Tools.....	7
1.4 Control Gears.....	8
1.5 Vehicle Gears.....	10
1.6 Transportation Gears.....	12
1.7 Marine Gears.....	13
1.8 Aerospace Gears.....	15
1.9 Industrial Gearing.....	16
1.10 Gears in the Oil and Gas Industry.....	18
1.11 Mill Gears.....	18
1.12 External Spur Gears.....	20
1.13 External Helical Gears.....	23
1.14 Internal Gears.....	24
1.15 Straight Bevel Gears.....	26
1.16 Zerol Bevel Gears.....	28
1.17 Spiral Bevel Gears.....	29
1.18 Hypoid Gears.....	30
1.19 Face Gears.....	31
1.20 Crossed-Helical Gears (Nonenveloping Worm Gears).....	32
1.21 Single-Enveloping Worm Gears.....	34
1.22 Double-Enveloping Worm Gears.....	37
1.23 Spiroid Gears.....	39
2 Gear Types and Nomenclature.....	41
2.1 Types of Gears.....	41
2.1.1 Classifications.....	41
2.1.2 Parallel Axis Gears.....	44
2.1.2.1 Spur Gears.....	44
2.1.2.2 Helical Gears.....	45
2.1.2.3 Internal Gears.....	47
2.1.3 Nonparallel, Coplanar Gears (Intersecting Axes).....	48
2.1.3.1 Bevel Gears.....	48
2.1.3.2 Face Gears (On-Center).....	53
2.1.3.3 Conical Involute Gearing.....	54
2.1.4 Nonparallel, Noncoplanar Gears (Nonintersecting Axes).....	55
2.1.4.1 Crossed-Axis Helical Gears.....	55
2.1.4.2 Cylindrical Worm Gearing.....	57

2.1.4.3	Single-Enveloping Worm Gearing.....	57
2.1.4.4	Double-Enveloping Worm Gearing.....	59
2.1.4.5	Hypoid Gears.....	60
2.1.4.6	Spiroid and Helicon Gearing.....	61
2.1.4.7	Face Gears (Off-Center)	63
2.1.5	Special Gear Types.....	63
2.1.5.1	Square or Rectangular Gears.....	63
2.1.5.2	Triangular Gears	64
2.1.5.3	Elliptical Gears	64
2.1.5.4	Scroll Gears	65
2.1.5.5	Multiple-Sector Gears	65
2.2	Nomenclature of Gears	66
2.2.1	Spur Gear Nomenclature and Basic Formulas	68
2.2.2	Helical Gear Nomenclature and Basic Formulas	68
2.2.3	Internal Gear Nomenclature and Formulas	70
2.2.4	Crossed Helical Gear Nomenclature and Formulas.....	70
2.2.5	Bevel Gear Nomenclature and Formulas	73
2.2.5.1	Straight.....	73
2.2.5.2	Spiral	74
2.2.5.3	Zerol	74
2.2.6	Worm Gear Nomenclature and Formulas.....	78
2.2.6.1	Cylindrical Worm Gears	80
2.2.6.2	Double-Enveloping Worm Gears	81
2.2.7	Face Gears	81
2.2.8	Spiroid Gear Nomenclature and Formulas.....	81
2.2.9	Beveloid Gears.....	83
3	Gear Tooth Design	85
3.1	Basic Requirements for Gear Tooth Design	85
3.1.1	Definition of Gear Tooth Elements.....	85
3.1.2	Basic Considerations for Gear Tooth Design	88
3.1.2.1	Continuity of Action	89
3.1.2.2	Conjugate Action	92
3.1.2.3	Pitch Diameter	93
3.1.2.4	Zones in Which Involute Gear Teeth Exist.....	94
3.1.2.5	Pointed Teeth	98
3.1.2.6	Undercut.....	100
3.1.3	Long- and Short-Addendum Gear Design.....	101
3.1.3.1	Addendum Modification for Gears Having a Few Teeth.....	102
3.1.3.2	Speed-Increasing Drives	103
3.1.3.3	Power Drives (Optimal Design)	103
3.1.3.4	Low-Friction Gearing	105
3.1.4	Special Design Considerations	107
3.1.4.1	Interchangeability	107
3.1.4.2	Tooth Thickness.....	107
3.1.4.3	Tooth Profile Modifications	109
3.1.4.4	Transverse of Profile Modification.....	109
3.1.4.5	Allowances for Errors of Gear Manufacture.....	109
3.1.4.6	Allowances for Deflection under Load	109

	3.1.4.7	Axial Modifications.....	110
	3.1.4.8	Root Fillets.....	111
	3.1.4.9	Effective Outside Diameter.....	113
	3.1.4.10	Width of Tip of Tooth.....	113
	3.1.4.11	Pointed Tooth Diameter	114
	3.1.4.12	Purpose of Backlash.....	114
	3.1.4.13	Backlash: Recommended Values.....	115
3.2		Standard Systems of Gear Tooth Proportions	116
	3.2.1	Standard Systems for Spur Gears.....	116
	3.2.1.1	Limitations in Use of Standard Tables	116
	3.2.1.2	Standard Tooth Forms That Have Become Obsolete	118
	3.2.1.3	Brown and Sharp System	119
	3.2.1.4	AGMA 14.5° Composite System	119
	3.2.1.5	Fellows 20° Stub Tooth System.....	120
	3.2.1.6	AGMA 14.5° Full-Depth System.....	120
	3.2.1.7	Cycloidal Tooth Profiles	121
	3.2.1.8	Clockwork and Timer Tooth Profiles	121
	3.2.1.9	Specific Spur Gear Calculation Procedure	122
	3.2.1.10	Explanation and Discussion of Items in Table 3.5	126
	3.2.2	System for Helical Gears.....	128
	3.2.2.1	Selection of Tooth Form.....	130
	3.2.2.2	Selection of Helix Angle.....	130
	3.2.2.3	Face Width.....	131
	3.2.2.4	Specific Calculation Procedure for Helical Gears	132
	3.2.3	System for Internal Gears	133
	3.2.3.1	Special Calculations.....	135
	3.2.3.2	Specific Calculation Procedure for Internal Gears.....	136
	3.2.4	Standard Systems for Bevel Gears.....	136
	3.2.4.1	Discussion of 20° Straight Bevel Gear System	137
	3.2.4.2	Discussion of Spiral Bevel Gear System.....	137
	3.2.4.3	Discussion of the Zerol Bevel Gear System.....	138
	3.2.4.4	Special Tooth Forms.....	138
	3.2.4.5	Limitations in 20° Straight Bevel Gear System	139
	3.2.4.6	Limitations in Spiral Bevel Gear System	141
	3.2.4.7	Limitations in Zerol Bevel Gear System	141
	3.2.4.8	General Comments	141
	3.2.5	Standard Systems for Worm Gears	143
	3.2.5.1	General Practice.....	143
	3.2.5.2	Basic Tooth Forms for Worm Gearing.....	144
	3.2.5.3	Specific Calculations for Worm Gears	145
	3.2.6	Standard System for Face Gears	146
	3.2.6.1	Pinion Design	148
	3.2.6.2	Face Gear Design.....	148
	3.2.7	System for Spiroid and Helicon Gears.....	149
	3.2.7.1	Spiroid Gearing	151
	3.2.7.2	Helicon Gearing	154
	3.2.7.3	Detailed Calculations of Spiroid and Helicon Tooth Data.....	155
3.3		General Equations Relating to Center Distance	156
	3.3.1	Center Distance Equations	156

3.3.2	Standard Center Distance.....	159
3.3.3	Standard Pitch Diameters.....	160
3.3.4	Operating Pitch Diameters.....	160
3.3.5	Operating Pressure Angle.....	161
3.3.6	Operating Center Distance.....	162
3.3.7	Center Distance for Gears Operating on Nonparallel Nonintersecting Shafts	162
3.3.8	Center Distance for Worm Gearing	162
3.3.9	Reasons for Nonstandard Center Distances	163
3.3.10	Nonstandard Center Distances.....	163
3.4	Elements of Center Distance.....	165
3.4.1	Effects of Tolerances on Center Distance.....	165
3.4.2	Machine Elements that Require Consideration in Critical Center Distance Applications	168
3.4.3	Control of Backlash.....	171
3.4.4	Effects of Temperature on Center Distance	172
3.4.5	Mounting Distance.....	174
4	Preliminary Design Considerations.....	177
4.1	Stress Formulas: Calculation.....	177
4.1.1	Calculated Stresses.....	177
4.1.2	Gear Design Limits.....	181
4.1.3	Gear Strength Calculations	181
4.1.3.1	Worst Load	184
4.1.3.2	Stress Concentration	185
4.1.3.3	Load Distribution.....	186
4.1.3.4	Dynamic Load	186
4.1.3.5	Finite Element.....	187
4.1.4	Gear Surface Durability Calculations.....	188
4.1.4.1	Hertz Derivations.....	189
4.1.4.2	K-Factor Derivations	192
4.1.4.3	Worst-Load Position.....	193
4.1.4.4	Endurance Limit.....	193
4.1.4.5	Lubrication Regimens.....	194
4.1.5	Gear Scoring	198
4.1.5.1	Hot and Cold Scoring	198
4.1.5.2	PVT Formula.....	199
4.1.5.3	Flash Temperature.....	202
4.1.5.4	Scoring Criterion	203
4.1.6	Thermal Limits.....	205
4.1.6.1	Thermal Limits at Regular Speed	205
4.1.6.2	Thermal Limits at High Speed	206
4.2	Stress Formulas: Special Considerations	206
4.2.1	Gear Specifications	207
4.2.2	Size of Spur and Helical Gears by Q-Factor Method	207
4.2.2.1	Face-Width Considerations.....	210
4.2.2.2	Weight from Volume.....	211
4.2.3	Indexes of Tooth Loading	213
4.2.4	Estimating Spur and Helical Gear Size by K-Factor	214

4.2.5	Estimating Bevel Gear Size	215
4.2.6	Estimating Worm Gear Size	220
4.2.7	Estimating Spiroid Gear Size	223
4.3	Data Needed for Gear Drawings	223
4.3.1	Gear Dimensional Data.....	223
4.3.2	Gear Tooth Tolerances.....	226
4.3.3	Gear Material and Heat Treatment Data	234
4.3.4	Enclosed Gear Unit Requirements	241
5	Design Formulas.....	243
5.1	Calculation of Gear Tooth Data	243
5.1.1	Number of Pinion Teeth	243
5.1.2	Hunting Teeth	248
5.1.3	Spur Gear Tooth Proportions.....	249
5.1.4	Root Fillet Radii of Curvature.....	251
5.1.5	Long-Addendum Pinions	253
5.1.6	Tooth Thickness	257
	5.1.6.1 Backlash.....	257
	5.1.6.2 Tolerances and Tooth Thickness	258
5.1.7	Chordal Dimensions	258
5.1.8	Degrees Roll and Limit Diameter.....	260
5.1.9	Form Diameter and Contact Ratio	264
	5.1.9.1 Form Diameter.....	264
	5.1.9.2 Contact Ratio.....	265
5.1.10	Spur Gear Dimension Sheet	266
5.1.11	Internal Gear Dimension Sheet	268
5.1.12	Helical Gear Tooth Proportions.....	272
5.1.13	Helical Gear Dimension Sheet.....	277
5.1.14	Bevel Gear Tooth Proportions.....	279
5.1.15	Straight Bevel Gear Dimension Sheet.....	283
5.1.16	Spiral Bevel Gear Dimension Sheet.....	285
5.1.17	Zerol Bevel Gear Dimension Sheet	288
5.1.18	Hypoid Gear Calculations.....	289
5.1.19	Face Gear Calculations.....	290
5.1.20	Crossed-Helical Gear Proportions	293
5.1.21	Single-Enveloping Worm Gear Proportions	296
5.1.22	Single-Enveloping Worm Gears	297
5.1.23	Double-Enveloping Worm Gears.....	299
5.2	Gear Rating Practice	303
5.2.1	General Considerations in Rating Calculations	303
	5.2.1.1 Calculation Procedure.....	305
	5.2.1.2 Grades of Material Quality	306
	5.2.1.3 Reliability of Gears.....	307
5.2.2	General Formulas for Tooth Bending Strength and Tooth Surface Durability	307
	5.2.2.1 Strength Formula	308
	5.2.2.2 Durability Formula	308
	5.2.2.3 Rating Curves of Stress versus Cycles	313
	5.2.2.4 Rating Bevel Gears	315

5.2.3	Geometry Factors for Strength	316
5.2.3.1	Lack of Load Sharing.....	317
5.2.3.2	Helical Gears with Narrow Face Width.....	317
5.2.3.3	Geometry Factors for Strength for Some Standard Designs....	318
5.2.4	Overall De-Rating Factor for Strength.....	319
5.2.4.1	Application Factor K_a	322
5.2.4.2	Load Distribution Factor K_m	322
5.2.4.3	Effect of Helix Error and Shaft Misalignment.....	324
5.2.4.4	Aspect Ratio Effects	327
5.2.4.5	Load Distribution Factor K_m for Bevel Gears	328
5.2.4.6	Size Factor K_s	330
5.2.4.7	Dynamic Load Factors K_v and C_v	330
5.2.5	Geometry Factors for Durability	333
5.2.6	Overall De-Rating Factor for Surface Durability	335
5.2.6.1	Size Factor C_s	336
5.2.6.2	Complementary Considerations	338
5.2.7	Load Rating of Worm Gearing	339
5.2.7.1	Crossed-Helical Gear Durability	339
5.2.7.2	Cylindrical Worm Gear Durability.....	341
5.2.7.3	Double-Enveloping Worm Gear Durability	346
5.2.7.4	Comparison of Double-Enveloping and Cylindrical Worm Gear Rating Procedures	349
5.2.8	Design Formulas for Scoring	350
5.2.8.1	Hot Scoring.....	350
5.2.8.2	Cold Scoring.....	355
5.2.8.3	Design Practice to Handle Scoring	360
5.2.9	Trade Standards for Rating Gears	361
5.2.10	Vehicle Gear Rating Practice	363
5.2.11	Marine Gear Rating Practice	365
5.2.12	Oil and Gas Industry Gear Rating	367
5.2.13	Aerospace Gear Rating Practice.....	368
6	Gear Materials.....	371
6.1	Steels for Gears	371
6.1.1	Mechanical Properties	371
6.1.2	Heat-Treating Techniques	375
6.1.3	Heat-Treating Data	379
6.1.4	Hardness Tests	381
6.2	Localized Hardening of Gear Teeth.....	383
6.2.1	Carburizing.....	383
6.2.2	Nitriding.....	389
6.2.2.1	Features of Nitriding Process	389
6.2.2.2	Nitride Case Depth	392
6.2.3	Induction Hardening of Steel.....	393
6.2.3.1	Induction Hardening by Scanning	395
6.2.3.2	Load-Carrying Capacity of Induction-Hardened Gear Teeth.....	398
6.2.4	Flame Hardening of Steel	400
6.2.5	Combined Heat Treatments	401
6.2.6	Metallurgical Quality of Steel Gears.....	402

6.2.6.1	Quality Items for Carburized Steel Gears	402
6.2.6.2	Quality Items for Nitrided Gears.....	404
6.2.6.3	Procedure to Get Grade 2 Quality	405
6.3	Cast Irons for Gears	406
6.3.1	Gray Cast Iron	407
6.3.2	Ductile Iron.....	408
6.3.3	Sintered Iron	410
6.4	Nonferrous Gear Metals	411
6.4.1	Kinds of Bronze.....	411
6.4.2	Standard Gear Bronzes	413
6.5	Nonmetallic Gears	414
6.5.1	Thermosetting Laminates	414
6.5.2	Nylon Gears.....	416
7	Gear-Manufacturing Methods	419
7.1	Gear Tooth Cutting	419
7.1.1	Gear Hobbing	419
7.1.2	Shaping—Pinion Cutter.....	426
7.1.3	Shaping—Rack Cutter	431
7.1.4	Cutting Bevel Gears.....	435
7.1.5	Gear Milling	438
7.1.6	Broaching Gears.....	442
7.1.7	Punching Gears.....	444
7.1.8	G-TRAC Generating	446
7.2	Gear Grinding	448
7.2.1	Form Grinding	448
7.2.1.1	Ceramic Form Grinding	449
7.2.1.2	Borazon Form Grinding	452
7.2.2	Generating Grinding—Disk Wheel	453
7.2.3	Generating Grinding—Bevel Gears	456
7.2.4	Generating Grinding—Threaded Wheel.....	459
7.2.5	Thread Grinding.....	462
7.3	Gear Shaving, Rolling, and Honing	465
7.3.1	Rotary Shaving.....	465
7.3.2	Rack Shaving	470
7.3.3	Gear Rolling.....	470
7.3.4	Gear Honing	473
7.4	Gear Measurement.....	475
7.4.1	Gear Accuracy Limits.....	476
7.4.2	Machines to Measure Gears	481
7.5	Gear Casting and Forming	487
7.5.1	Cast and Molded Gears.....	487
7.5.2	Sintered Gears	488
7.5.3	Cold-Drawn Gears and Rolled Worm Threads	489
8	Design of Tools to Make Gear Teeth	491
8.1	Shaper Cutters	491
8.2	Gear Hobs.....	502
8.3	Spur Gear—Milling Cutters	515

8.4	Worm-Milling Cutters and Grinding Wheels	517
8.5	Gear-Shaving Cutters	522
8.6	Punching Tools.....	525
8.7	Sintering Tools.....	526
9	Kinds and Causes of Gear Failures	529
9.1	Analysis of Gear-System Problems	529
9.1.1	Determining the Problem.....	529
9.1.2	Possible Causes of Gear-System Failures	531
9.1.3	Incompatibility in Gear Systems	533
9.1.4	Investigation of Gear Systems.....	534
9.2	Analysis of Tooth Failures and Gear-Bearing Failures	535
9.2.1	Nomenclature of Gear Failure	536
9.2.2	Tooth Breakage.....	536
9.2.3	Pitting of Gear Teeth	540
9.2.4	Scoring Failures.....	542
9.2.5	Wear Failures.....	544
9.2.6	Gearbox Bearings.....	547
9.2.7	Rolling-Element Bearings	548
9.2.8	Sliding-Element Bearings	550
9.3	Some Causes of Gear Failure Other than Excess Transmission Load.....	552
9.3.1	Overload Gear Failures	553
9.3.2	Gear-Casing Problems	554
9.3.3	Lubrication Failures.....	555
9.3.4	Thermal Problems in Fast-Running Gears.....	561
10	Special Design Problems	565
10.1	Center Distance Problems.....	565
10.2	Profile Modification Problems.....	576
10.3	Load Rating Problem.....	585
11	Gear Reactions and Mountings	591
11.1	Mechanics of Gear Reactions	591
11.1.1	Summation of Forces and Moments	591
11.1.2	Application to Gearing.....	594
11.2	Basic Gear Reactions, Bearing Loads, and Mounting Types	595
11.2.1	Main Source of Load	595
11.2.2	Gear Reactions to Bearing	596
11.2.3	Directions of Loads.....	597
11.2.4	Additional Considerations	597
11.2.5	Types of Mountings.....	598
11.2.6	Efficiencies	600
11.3	Basic Mounting Arrangements and Recommendations	600
11.3.1	Bearing and Shaft Alignment.....	601
11.3.2	Bearings.....	601
11.3.3	Mounting Gears to the Shaft.....	602
11.3.4	Housing	603
11.3.5	Inspection Hole	603
11.3.6	Break-In	603

11.4	Bearing Load Calculations for Spur Gears.....	604
11.4.1	Spur Gears	604
11.4.2	Helical Gears	606
11.4.3	Gears in Trains	606
11.4.4	Idlers	606
11.4.5	Intermediate Gears	607
11.4.6	Planetary Gears.....	609
11.4.6.1	One Planet	609
11.4.6.2	Several Planets.....	609
11.5	Bearing-Load Calculations for Helicals.....	610
11.5.1	Single Helical Gears.....	610
11.5.2	Double Helical Gears.....	612
11.5.3	Skewed- or Crossed-Helical Gears	613
11.6	Mounting Practice for Bevel and Hypoid Gears	615
11.6.1	Analysis of Forces	615
11.6.2	Rigid Mountings	616
11.6.3	Maximum Displacements.....	616
11.6.4	Rolling-Element Bearings	619
11.6.5	Straddle Mounting.....	619
11.6.6	Overhung Mounting	619
11.6.7	Gear Blank Design.....	622
11.6.8	Gear and Pinion Adjustments.....	625
11.6.9	Assembly Procedure.....	626
11.7	Calculation of Bevel and Hypoid Bearing Loads	627
11.7.1	Hand of Spiral	627
11.7.2	Spiral Angle	627
11.7.3	Tangential Load.....	628
11.7.4	Axial Thrust.....	629
11.7.5	Radial Load.....	629
11.7.6	Required Data for Bearing Load Calculations	637
11.8	Bearing Load Calculations for Worms	639
11.8.1	Calculation of Forces in Worm Gears	640
11.8.2	Mounting Tolerances.....	642
11.8.3	Worm Gear Blank Considerations.....	642
11.8.4	Run-In of Worm Gears	642
11.9	Bearing Load Calculations for Spiroid Gearing	644
11.10	Bearing Load Calculations for Other Gear Types	648
11.11	Design of the Body of the Gear	648
12	Gear Vibration.....	651
12.1	Fundamentals of Vibration.....	651
12.2	Measurement of Vibration	654
12.2.1	Examples of Sensing Devices.....	655
12.2.2	Practical Problems in Vibration Measurement.....	657
12.3	Some Examples of Vibration in Geared Units	657
12.4	Approximate Vibration Limits.....	660
12.4.1	Velocity Limits.....	661
12.4.2	Acceleration Limits.....	662
12.4.3	Proximity Probes	662

12.4.4 Displacement Limits..... 662

12.4.5 General Vibration Tendencies 663

12.4.6 Trade Standard 663

12.5 Control of Vibration in Manufacturing Gears and in the Field 665

12.5.1 Testing of Gear Units at the Gear Factory 666

12.5.2 Tests of Assembled Power Package..... 666

12.5.3 Vibration Tests in the Field 667

12.6 Vibration Analysis Technique..... 668

Appendix A: Evolution of Gear Art 671

Appendix B: Complementary Material 717

Appendix C: Numerical Data Tables 771

**Appendix D: On the Concept of Novikov Gearing and the Inadequacy of the
Terms “Wildhaber–Novikov Gearing” and “W–N Gearing” 803**
