Preface to the Second Editionxix

Preface to the First Editionxxi

About the Authorsxxv

Chapter 1 The State of the Art in ITS 1

 1.1 The Broad Scope of ITS 1

 1.2 A Working Definition of ITS 2

 1.3 Current Status of ITS 2

 1.4 A Critical Review of the State of the Art in ITS 4

**Chapter 2 New Meta-Level Principles for an Untapped ITS
Technological Mine 7**

 2.1 Meta-Level Principles..... 7

 2.2 The ITS Mine and New Mining Implements..... 8

 2.3 Examples of Formidable Challenges and Amazing
 Opportunities 11

Chapter 3 Fundamental Issues in Transportation Systems 19

 3.1 Principal Characteristics of ITS..... 20

 3.2 Scientific Validation of ITS Designs through Modeling and
 Simulation..... 27

**Chapter 4 DARYN: A Distributed Decision-Making Algorithm for
Railway Networks 29**

 4.1 Introduction..... 29

 4.2 The DARYN Approach..... 32

 4.2.1 Algorithm 32

 4.2.2 Proof of Freedom from Deadlock 35

 4.2.3 Modeling DARYN on a Loosely Coupled Parallel
 Processor 36

4.3	Implementation of DARYN on ARMSTRONG.....	38
4.4	Performance of DARYN.....	44
Chapter 5	RYNSORD: A Novel, Decentralized Algorithm for Railway Networks with Soft Reservation	51
5.1	Introduction.....	51
5.2	The RYNSORD Approach.....	52
5.3	Modeling RYNSORD on an Accurate, Realistic, and Parallel Processing Test Bed.....	60
5.4	Implementation Issues	66
5.5	Simulation Data and Performance Analysis	68
Chapter 6	DICAF: A Distributed, Scalable Architecture for IVHS	83
6.1	Introduction.....	83
6.2	DICAF: A Novel, Distributed, and Scalable Approach to IVHS.....	90
6.3	Modeling DICAF on an Accurate, Realistic, and Parallel Processing Test Bed	98
6.4	Implementation and Debugging Issues.....	103
6.5	Simulation Results and Performance Analysis of DICAF.....	104
Chapter 7	Stability of RYNSORD under Perturbations.....	127
7.1	Introduction.....	127
7.2	Formal Definition of Stability of RYNSORD	130
7.3	Modeling RYNSORD for Stability Analysis.....	133
7.3.1	Implementation Issues	133
7.4	Stability Analysis of RYNSORD.....	133
7.4.1	Error Criteria for Stability Analysis.....	133
7.4.2	Steady-State Analysis.....	134
7.4.3	Perturbations to the Input Rate and Stability Analysis.....	137
7.4.4	Perturbations to System Characteristics and Stability Analysis.....	138
7.4.4.1	Perturbations to Interstation and Train-to-Station Communications	140
7.4.4.2	Perturbations Relative to the Track Segments.....	147
Chapter 8	Modeling and Simulation Techniques for ITS Designs	153
8.1	Introduction.....	153
8.2	Virtual and Physical Process Migration Strategies for ITS Designs	153

8.2.1	Virtual Process Migration Strategy	154
8.2.2	Physical Process Migration Strategy	156
8.3	Software Techniques Underlying the Process Migration Strategies.....	158
8.3.1	Software Techniques Underlying VPM	158
8.3.2	Software Techniques Underlying PPM.....	162
8.4	Implementation Issues	165
8.5	Simulation Results and Performance Analysis	166
Chapter 9	Future Issues in Intelligent Transportation Systems	173
Chapter 10	Description of the RYNSORD Simulator on CD-ROM and Scope of Experiments.....	175
10.1	Installation	175
10.2	Overview.....	176
10.3	Getting Ready to Run	177
10.3.1	network.out	177
10.3.2	Helper Scripts.....	178
10.3.3	Input Generation	178
10.3.4	Output Files.....	178
10.3.5	Troubleshooting	179
10.3.5.1	How You Know It Is Working	179
10.3.5.2	Problems	180
10.3.6	Track and Communication Failures.....	180
10.4	Conclusions.....	180
Bibliography	181	
Index.....	187
