

Contents

Foreword	ix
Preface	xi
Acknowledgments	xiii
Acronyms	xv
Chapter 1 Introduction	1
1.1 Objective of Human Simulation in Design	1
1.2 Why the Interest in Human Simulations in Design?	2
1.3 How Do the Roles of Human Simulation and Virtual Reality Technologies Relate in the Design of Systems?	3
1.4 A Brief History of Some Popular Human Simulation Methods for Design	4
1.5 Human Simulation to Enhance Designing Systems for People	12
1.6 Outline of Case Studies and General Issues to Be Presented. References	14
Chapter 2 Anthropometric Analyses of Crew Interfaces and Component Accessibility for the International Space Station	17
2.1 Introduction	17
2.2 International Space Station Node 1	18
2.3 Requirements for Anthropometric Accommodation and Component Accessibility	18
2.4 Human Modeling Simulation versus Traditional Anthropometric Testing	19
2.5 Anthropometric Accommodation	20
2.6 Anthropometric Analyses and Component Accessibility Demonstration with BHMS	21

- 2.7 Normal Operation—Damper Valve Control Assembly 21
- 2.8 Maintenance Operation—Inter-Module Venting Fan Assembly 23
 - 2.8.1 Maintenance Subtask 1—Removal of Closeout Panels ... 24
 - 2.8.2 Maintenance Subtask 2—Removal of Band 25
 - 2.8.3 Maintenance Subtask 3—Removal of Lower Silencer 27
 - 2.8.4 Maintenance Subtask 4—Removal of Fan Assembly 29
 - 2.8.5 Maintenance Task Summary 31
- 2.9 Emergency Operation—Portable Fire Extinguisher at Fire Port 31
- 2.10 Compliance Demonstration and Simulation Benefits 32
- 2.11 Recommendations 33
 - 2.11.1 Improvements for Microgravity Simulation 33
 - 2.11.2 Improvements for User Productivity 34
- 2.12 Conclusions 35
- References 35

Chapter 3 Human Model Evaluations of Air Force System

- Designs** 37
- 3.1 Introduction 37
- 3.2 Background 37
- 3.3 F-15 Radar Analysis 39
- 3.4 F-22 Power Supply Analysis 42
- 3.5 Munitions Trailer Analysis 45
- 3.6 Modeling the Trailer 45
- 3.7 Performing the Analysis 48
- 3.8 Software Observations 51
- 3.9 The Appeal of Human Modeling 52
- 3.10 A Better Virtual World 53
- 3.11 Conclusions 54
- References 55

Chapter 4 Ship Bridge Design and Evaluation Using Human

- Modeling Systems and Virtual Environments** 57
- 4.1 Introduction 57
- 4.2 Ship Bridge Design 58

4.3	Ergonomic Evaluation of the Design	60
4.4	Computer-Assisted Ergonomic Analysis: The ATOMOS II Project	63
4.5	Physical Analysis Using BHMS	63
4.5.1	Bridge Design	63
4.5.2	Method	63
4.5.3	Results	64
4.5.4	Discussion	67
4.6	Functional Analysis Using VE	67
4.6.1	Bridge Design	67
4.6.2	Method	68
4.6.3	Results	69
4.6.4	Discussion	70
4.7	Discussion and Conclusions	71
4.8	Future Work	74
	References	75

Chapter 5 Using Digital Human Modeling in a Virtual Heavy

	Vehicle Development Environment	77
5.1	Introduction	77
5.2	Federal Motor Vehicle Safety Standard (FMVSS) Compliance	78
5.3	FMVSS Compliance Analysis	81
5.4	Instrument Panel Reach Analysis	81
5.5	Instrument Panel Visual Analysis	86
5.6	Vehicle Entry/Egress	89
5.7	Vehicle Entry/Egress Analysis	90
5.8	Advantages of the Technology	96
5.9	Disadvantages of the Technology	97
5.10	Foreseeable Trends in the Technology	98
5.11	Conclusions	99
	References	99

Chapter 6 The Determination of the Human Factors/Occupant

	Packaging Requirements for Adjustable Pedal Systems	101
6.1	Introduction	101
6.1.1	Use of Human Simulation Technology	102

6.2	Problem Analysis: Accommodating the Target Customer Population	103
6.3	Design Analysis: Packaging Requirements for Adjustable Pedal Systems	105
6.3.1	Set-up for the Analysis	105
6.3.2	Result of the Analysis	108
6.4	Conclusion	109
	References	110
Chapter 7	Ergonomics Analysis of Sheet Metal Handling	113
7.1	Background	113
7.2	The Process	114
7.3	Outcomes	116
7.4	Decisions	116
7.5	Design	117
7.6	Choices	118
7.7	Analysis	118
7.8	Simulation	119
7.9	Policy	121
7.10	Case Study	122
	References	125
Chapter 8	Digital Human Modeling for Improved Product and Process Feasibility Studies	127
8.1	Introduction	127
8.2	Digital Human Modeling	129
8.3	Case Study—DEW98 Door Latch Module	130
8.4	Technology Assessment	134
8.5	Future Direction	135
Chapter 9	Summary	137
9.1	What Did We Hope to Learn from These Cases?	137
9.1.1	What General Benefits Were Demonstrated in These Case Studies by the Application of Digital Human Modeling?	139
9.1.2	What General Limitations Were Found in the Application of Existing Digital Human Models?	141

9.2 Some Concluding Thoughts About DHM Applications 144

References 146
