

# CONTENTS

Preface	v
1 Data collection for modeling, evaluating and benchmarking city logistics schemes <i>E. Taniguchi, R. G. Thompson and T. Yamada</i>	1
2 Intermodal transport and city logistics policies <i>T. Nemoto, M. Browne, J. Visser and J. Castro</i>	15
3 Application of a tour-based model to simulate freight distribution in a large urbanized area <i>F. Russo and A. Cartenì</i>	31
4 Mars - A Programming language for solving vehicle routing problems <i>A. Galic, T. Caric and H. Gold</i>	47
5 An experimental study on the performance of probabilistic vehicle routing and scheduling with ITS <i>N. Ando and E. Taniguchi</i>	59
6 Modelling the effects of city logistics schemes <i>T. Yamada and E. Taniguchi</i>	75
7 Demand models for city logistics: a state of the art and a proposed integrated system <i>F. Russo and A. Comi</i>	91
8 Planning on-street loading-unloading spaces considering the behaviour of pickup-delivery vehicles and parking enforcement <i>N. Aiura and E. Taniguchi</i>	107
9 The influence of transportation network reliability on city logistics <i>R. Raicu, S. Raicu and M. Popa</i>	117
10 Keeping of delivery time windows by considering actual and expected traffic situations in transport planning <i>D. Wild and C. Glücker</i>	133
11 The future of city logistics: estimating the feasibility of home delivery in urban areas <i>J. Visser and K. Hassall</i>	147

12	Introducing high productivity vehicles into Australia: Two case studies with different regulatory mechanisms <i>K. Hassall</i>	163
13	Modelling multimodal freight transport: Impacts of network improvement in urban areas on inter-regional freight transport <i>B.F. Russ, T. Yamada, J. Castro and T. Ito</i>	177
14	Evaluation of logistics performance for freight mode choice at an intermodal terminal <i>P. Kunadhamraks and S. Hanaoka</i>	191
15	Evaluation of a freight auction in an urban transport network <i>P. Jonkman, E. Taniguchi and T. Yamada</i>	207
16	Evaluating toll measures on urban expressway considering the behaviour of several stakeholders associated with urban freight transport <i>E. Taniguchi and D. Tamagawa</i>	221
17	Securing the logistics of the shopping mall <i>K. Button, R. Stough and M. Thibault</i>	233
18	Night-time delivery restrictions: a review <i>M. Browne, J. Allen, S. Anderson and A. Woodburn</i>	245
19	Cost structure of highway construction and maintenance: How should we levy taxes on freight vehicles? <i>Y. Misui and T. Nemoto</i>	259
20	Effectiveness and feasibility of innovative freight strategies for the U.S. urban areas <i>K. Kawamura and Y. Lu</i>	269
21	A methodology for evaluating urban freight projects <i>R.G. Thompson and K. Hassall</i>	283
22	Analysis of the effects of a cooperative delivery system in Bangkok <i>A. G. Qureshi and S. Hanaoka</i>	293
23	A study on the performance of probe vehicle data <i>K. Yamane, E. Taniguchi, T. Fushiki and K. Kimita</i>	307
24	Benefits from changes in scale in sustainable city logistics <i>J. C. Rijssenbrij</i>	317

25	Fighting the windmills: Survey results on urban freight policies between Spain and the Netherlands <i>J.H.R. van Duin and J. Muñuzuri</i>	331
26	Efforts to make distribution and transportation more efficient through cooperation among Japanese companies <i>K. Hayashi, H. Ono and Y. Yano</i>	347
27	New concepts and organisations for the last mile: French experiments and their results <i>D. Patier</i>	361
28	Bases for a policy for the development of logistics platforms in the Metropolitan Zone of Mexico City <i>A. Lozano, J.P. Antún, C. Santos, R. Alarcón, F. Granados and R. Hernández</i>	375
29	Transportation demand management: experiments in Akihabara 2004 <i>H. Ishida, E. Taniguchi, T. Hyodo, A. Sasaki, H. Ando and K. Ikeda</i>	389
30	Pilot demonstration of a web-based load zone reservation system <i>J. Muñuzuri, J. Larrañeta, J.N. Ibáñez and G. Montero</i>	401
31	City logistics in China: An overview <i>W. Qiu, F. Yang and D. Yang</i>	417
32	The integration of urban goods transport and delivery in the development of municipal mobility plans in the Walloon region: Towards a comprehensive and cross-sectional approach <i>W. Debauche, D. Laffineuse, D. Borsu and A. N'diaye</i>	429
33	B2C E-commerce: impact on transport in urban areas <i>K. Esser and J. Kurt</i>	437
34	A framework to scope logistics initiatives <i>J.W. Joubert and H.W. Ittmann</i>	449
35	Retailer's distribution and local time window policies <i>H. Quak and R. de Koster</i>	463
36	Using daytime population for dangerous goods vehicle route planning <i>K. H. Lau</i>	479
37	A conceptual framework for solving the multiple depot probabilistic vehicle routing problem with time window (MDPVRPTW) <i>S. Samanta and M. K. Jha</i>	495

38	A genetic algorithms-based decision support system for transportation infrastructure management in urban areas <i>M.K. Jha, K. Kepaptsoglou, M. Karlaftis and J. Abdullah</i>	509
39	Off-peak freight deliveries to New york city: challenges and policy measures <i>J. Holguin-Veras, J.M. Polimeni and B. Cruz</i>	525
