## Keynote Lectures

|                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------|----|
| A Decade of Business Process Management Conferences: Personal Reflections on a Developing Discipline ..... | 1  |
| <i>Wil M.P. van der Aalst</i>                                                                              |    |
| From Calls to Events: Architecting Future BPM Systems .....                                                | 17 |
| <i>Alejandro Buchmann, Stefan Appel, Tobias Freudenreich, Sebastian Frischbier, and Pablo E. Guerrero</i>  |    |

## Process Quality

|                                                                                                                                                                     |    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Tying Process Model Quality to the Modeling Process: The Impact of Structuring, Movement, and Speed .....                                                           | 33 |
| <i>Jan Claes, Irene Vanderfeesten, Hajo A. Reijers, Jakob Pinggera, Matthias Weidlich, Stefan Zugal, Dirk Fahland, Barbara Weber, Jan Mendling, and Geert Poels</i> |    |
| Capabilities and Levels of Maturity in IT-Based Case Management .....                                                                                               | 49 |
| <i>Jana Koehler, Joerg Hofstetter, and Roland Woodtly</i>                                                                                                           |    |
| Business Process Architecture: Use and Correctness .....                                                                                                            | 65 |
| <i>Rami-Habib Eid-Sabbagh, Remco Dijkman, and Mathias Weske</i>                                                                                                     |    |

## Conformance and Compliance

|                                                                                   |     |
|-----------------------------------------------------------------------------------|-----|
| Aligning Event Logs and Declarative Process Models for Conformance Checking ..... | 82  |
| <i>Massimiliano de Leoni, Fabrizio Maria Maggi, and Wil M.P. van der Aalst</i>    |     |
| Context-Aware Compliance Checking .....                                           | 98  |
| <i>Jan Martijn E.M. van der Werf, H.M.W. Verbeek, and Wil M.P. van der Aalst</i>  |     |
| Measuring Privacy Compliance Using Fitness Metrics .....                          | 114 |
| <i>Sebastian Banescu, Milan Petković, and Nicola Zannone</i>                      |     |

## BPM Applications

|                                                              |     |
|--------------------------------------------------------------|-----|
| Event-Driven Manufacturing Process Management Approach ..... | 120 |
| <i>Antonio Estruch and José Antonio Heredia Álvaro</i>       |     |

|                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Process-Based Design and Integration of Wireless Sensor Network Applications.....                                                                                                                 | 134 |
| <i>Stefano Tranquillini, Patrik Spieß, Florian Daniel, Stamatis Karnouskos, Fabio Casati, Nina Oertel, Luca Mottola, Felix Jonathan Oppermann, Gian Pietro Picco, Kay Römer, and Thiemo Voigt</i> |     |
| Modeling Rewards and Incentive Mechanisms for Social BPM .....                                                                                                                                    | 150 |
| <i>Ognjen Scekic, Hong-Linh Truong, and Schahram Dustdar</i>                                                                                                                                      |     |
| <b>Process Model Analysis</b>                                                                                                                                                                     |     |
| The Difficulty of Replacing an Inclusive OR-Join .....                                                                                                                                            | 156 |
| <i>Cédric Favre and Hagen Völzer</i>                                                                                                                                                              |     |
| Automatic Information Flow Analysis of Business Process Models .....                                                                                                                              | 172 |
| <i>Rafael Accorsi and Andreas Lehmann</i>                                                                                                                                                         |     |
| <b>BPM and the Cloud</b>                                                                                                                                                                          |     |
| Managing and Tracing the Traversal of Process Clouds with Templates, Agendas and Artifacts .....                                                                                                  | 188 |
| <i>Marian Benner, Matthias Book, Tobias Brückmann, Volker Gruhn, Thomas Richter, and Sema Seyhan</i>                                                                                              |     |
| A Generic Framework for Service-Based Business Process Elasticity in the Cloud .....                                                                                                              | 194 |
| <i>Mourad Amziani, Tarek Melliti, and Samir Tata</i>                                                                                                                                              |     |
| <b>Requirements and Performance</b>                                                                                                                                                               |     |
| A Business Process-Driven Approach for Requirements Dependency Analysis .....                                                                                                                     | 200 |
| <i>Juan Li, Ross Jeffery, Kam Hay Fung, Liming Zhu, Qing Wang, He Zhang, and Xiwei Xu</i>                                                                                                         |     |
| A Recommendation Algorithm to Capture End-Users' Tacit Knowledge .....                                                                                                                            | 216 |
| <i>David Martinho and António Rito Silva</i>                                                                                                                                                      |     |
| Defining Process Performance Indicators by Using Templates and Patterns .....                                                                                                                     | 223 |
| <i>Adela del-Río-Ortega, Manuel Resinas Arias de Reyna, Amador Durán Toro, and Antonio Ruiz-Cortés</i>                                                                                            |     |

## Process Mining

|                                                                                               |     |
|-----------------------------------------------------------------------------------------------|-----|
| Repairing Process Models to Reflect Reality .....                                             | 229 |
| <i>Dirk Fahland and Wil M.P. van der Aalst</i>                                                |     |
| FNet: An Index for Advanced Business Process Querying .....                                   | 246 |
| <i>Zhiqiang Yan, Remco Dijkman, and Paul Grefen</i>                                           |     |
| Where Did I Misbehave? Diagnostic Information in Compliance<br>Checking .....                 | 262 |
| <i>Elham Ramezani, Dirk Fahland, and Wil M.P. van der Aalst</i>                               |     |
| Using Mapreduce to Scale Events Correlation Discovery for Business<br>Processes Mining .....  | 279 |
| <i>Hicham Reguieg, Farouk Toumani,<br/>Hamid Reza Motahari-Nezhad, and Boualem Benatallah</i> |     |

## Refactoring and Optimization

|                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------|-----|
| A Framework for Behavior-Consistent Specialization of Artifact-Centric<br>Business Processes .....                      | 285 |
| <i>Sira Yongchareon, Chengfei Liu, and Xiaohui Zhao</i>                                                                 |     |
| Approximate Clone Detection in Repositories of Business Process<br>Models .....                                         | 302 |
| <i>Chathura C. Ekanayake, Marlon Dumas, Luciano García-Bañuelos,<br/>Marcello La Rosa, and Arthur H.M. ter Hofstede</i> |     |
| Probabilistic Optimization of Semantic Process Model Matching .....                                                     | 319 |
| <i>Henrik Leopold, Mathias Niepert, Matthias Weidlich, Jan Mendling,<br/>Remco Dijkman, and Heiner Stuckenschmidt</i>   |     |
| Isotactics as a Foundation for Alignment and Abstraction of Behavioral<br>Models .....                                  | 335 |
| <i>Artem Polyvyanyy, Matthias Weidlich, and Mathias Weske</i>                                                           |     |
| Author Index .....                                                                                                      | 353 |
