

CONTENTS

CHAPTER 0 Fundamentals.....	1
0.1 Evaluating a Polynomial	1
0.2 Binary Numbers	5
0.2.1 Decimal to Binary	6
0.2.2 Binary to Decimal	7
0.3 Floating Point Representation of Real Numbers	8
0.3.1 Floating Point Formats	8
0.3.2 Machine Representation	12
0.3.3 Addition of Floating Point Numbers	13
0.4 Loss of Significance	16
0.5 Review of Calculus	20
Software and Further Reading	23
CHAPTER 1 Solving Equations.....	25
1.1 The Bisection Method	26
1.1.1 Bracketing a Root	26
1.1.2 How Accurate and How Fast?	29
1.2 Fixed-Point Iteration	32
1.2.1 Fixed Points of a Function	32
1.2.2 Geometry of Fixed-Point Iteration	35
1.2.3 Linear Convergence of Fixed-Point Iteration	36
1.2.4 Stopping Criteria	42
1.3 Limits of Accuracy	45
1.3.1 Forward and Backward Error	45
1.3.2 The Wilkinson Polynomial	49
1.3.3 Sensitivity of Root-Finding	50
1.4 Newton's Method	54
1.4.1 Quadratic Convergence of Newton's Method	56
1.4.2 Linear Convergence of Newton's Method	58
1.5 Root-Finding without Derivatives	64
1.5.1 Secant Method and Variants	65
1.5.2 Brent's Method	68
REALITY CHECK 1: Kinematics of the Stewart Platform	71
Software and Further Reading	74

CHAPTER 2 Systems of Equations.....	75
2.1 Gaussian Elimination	75
2.1.1 Naive Gaussian Elimination	76
2.1.2 Operation Counts	78
2.2 The LU Factorization	84
2.2.1 Matrix Form of Gaussian Elimination	84
2.2.2 Back Substitution with the LU Factorization	86
2.2.3 Complexity of the LU Factorization	88
2.3 Sources of Error	91
2.3.1 Error Magnification and Condition Number	91
2.3.2 Swamping	98
2.4 The PA=LU Factorization	101
2.4.1 Partial Pivoting	101
2.4.2 Permutation Matrices	103
2.4.3 PA=LU Factorization	105
2.5 Iterative Methods	110
2.5.1 Jacobi Method	110
2.5.2 Gauss-Seidel Method and SOR	113
2.5.3 Convergence of Iterative Methods	116
2.5.4 Sparse Matrix Computations	118
REALITY CHECK 2: The Euler-Bernoulli Beam	123
2.6 Conjugate Gradient Method	126
2.6.1 Positive-Definite Matrices	126
2.6.2 Conjugate Gradient Method	127
2.7 Nonlinear Systems of Equations	131
2.7.1 Multivariate Newton's Method	131
2.7.2 Broyden's Method	135
Software and Further Reading	138
CHAPTER 3 Interpolation.....	139
3.1 Data and Interpolating Functions	140
3.1.1 Lagrange Interpolation	141
3.1.2 Newton's Divided Differences	143
3.1.3 How Many Degree d Polynomials Pass Through n Points?	146
3.1.4 Code for Interpolation	147
3.1.5 Representing Functions by Approximating Polynomials	149

3.2	Interpolation Error	153
3.2.1	Interpolation Error Formula	153
3.2.2	Proof of Newton Form and Error Formula	155
3.2.3	Runge Phenomenon	158
3.3	Chebyshev Interpolation	160
3.3.1	Chebyshev's Theorem	161
3.3.2	Chebyshev Polynomials	163
3.3.3	Change of Interval	165
3.4	Cubic Splines	170
3.4.1	Properties of Splines	171
3.4.2	Endpoint Conditions	178
3.5	Bézier Curves	183
	REALITY CHECK 3: Postscript Fonts from Bézier Curves	188
	Software and Further Reading	191
CHAPTER 4	Least Squares	193
4.1	Least Squares and the Normal Equations	193
4.1.1	Inconsistent Systems of Equations	194
4.1.2	Fitting Models to Data	198
4.1.3	Conditioning of Least Squares	203
4.2	A Survey of Models	206
4.2.1	Periodic Data	206
4.2.2	Data Linearization	209
4.3	QR Factorization	218
4.3.1	Gram-Schmidt Orthogonalization and Least Squares	218
4.3.2	Householder Reflectors	224
4.4	Nonlinear Least Squares	230
4.4.1	Gauss-Newton Method	230
4.4.2	Models with Nonlinear Coefficients	233
	REALITY CHECK 4: GPS, Conditioning, and Nonlinear Least Squares	236
	Software and Further Reading	240
CHAPTER 5	Numerical Differentiation and Integration	241
5.1	Numerical Differentiation	242
5.1.1	Finite Difference Formulas	242
5.1.2	Rounding Error	245
5.1.3	Extrapolation	248
5.1.4	Symbolic Differentiation and Integration	249

5.2	Newton-Cotes Formulas for Numerical Integration	253
5.2.1	Trapezoid Rule	254
5.2.2	Simpson's Rule	256
5.2.3	Composite Newton-Cotes Formulas	258
5.2.4	Open Newton-Cotes Methods	261
5.3	Romberg Integration	265
5.4	Adaptive Quadrature	269
5.5	Gaussian Quadrature	274
	REALITY CHECK 5: Motion Control in Computer-Aided Modeling	279
	Software and Further Reading	281
CHAPTER 6 Ordinary Differential Equations		283
6.1	Initial Value Problems	284
6.1.1	Euler's Method	285
6.1.2	Existence, Uniqueness, and Continuity for Solutions	290
6.1.3	First-Order Linear Equations	293
6.2	Analysis of IVP Solvers	295
6.2.1	Local and Global Truncation Error	296
6.2.2	The Explicit Trapezoid Method	300
6.2.3	Taylor Methods	304
6.3	Systems of Ordinary Differential Equations	306
6.3.1	Higher Order Equations	308
6.3.2	Computer Simulation: The Pendulum	309
6.3.3	Computer Simulation: Orbital Mechanics	313
6.4	Runge-Kutta Methods and Applications	319
6.4.1	The Runge-Kutta Family	319
6.4.2	Computer Simulation: The Hodgkin-Huxley Neuron	322
6.4.3	Computer Simulation: The Lorenz Equations	325
	REALITY CHECK 6: The Tacoma Narrows Bridge	328
6.5	Variable Step-Size Methods	331
6.5.1	Embedded Runge-Kutta Pairs	331
6.5.2	Order 4/5 Methods	334
6.6	Implicit Methods and Stiff Equations	339
6.7	Multistep Methods	343
6.7.1	Generating Multistep Methods	343
6.7.2	Explicit Multistep Methods	346
6.7.3	Implicit Multistep Methods	349
	Software and Further Reading	354

CHAPTER 7 Boundary Value Problems	357
7.1 Shooting Method	358
7.1.1 Solutions of Boundary Value Problems	358
7.1.2 Shooting Method Implementation	361
REALITY CHECK 7: Buckling of a Circular Ring	365
7.2 Finite Difference Methods	368
7.2.1 Linear Boundary Value Problems	368
7.2.2 Nonlinear Boundary Value Problems	371
7.3 Collocation and the Finite Element Method	376
7.3.1 Collocation	377
7.3.2 Finite Elements and the Galerkin Method	379
Software and Further Reading	385
CHAPTER 8 Partial Differential Equations.....	387
8.1 Parabolic Equations	388
8.1.1 Forward Difference Method	388
8.1.2 Stability Analysis of Forward Difference Method	392
8.1.3 Backward Difference Method	394
8.1.4 Crank-Nicolson Method	397
8.2 Hyperbolic Equations	404
8.2.1 The Wave Equation	404
8.2.2 The CFL Condition	407
8.3 Elliptic Equations	410
8.3.1 Finite Difference Method for Elliptic Equations	411
REALITY CHECK 8: Heat Distribution on a Cooling Fin	417
8.3.2 Finite Element Method for Elliptic Equations	420
Software and Further Reading	431
CHAPTER 9 Random Numbers and Applications.....	433
9.1 Random Numbers	434
9.1.1 Pseudo-Random Numbers	434
9.1.2 Exponential and Normal Random Numbers	440
9.2 Monte-Carlo Simulation	443
9.2.1 Power Laws for Monte Carlo Estimation	443
9.2.2 Quasi-Random Numbers	444
9.3 Discrete and Continuous Brownian Motion	450
9.3.1 Random Walks	450
9.3.2 Continuous Brownian Motion	453

9.4	Stochastic Differential Equations	456
9.4.1	Adding Noise to Differential Equations	456
9.4.2	Numerical Methods for SDEs	460
	REALITY CHECK 9: The Black-Scholes Formula	468
	Software and Further Reading	470
CHAPTER 10 Trigonometric Interpolation and the FFT		471
10.1	The Fourier Transform	472
10.1.1	Complex Arithmetic	472
10.1.2	Discrete Fourier Transform	475
10.1.3	The Fast Fourier Transform	477
10.2	Trigonometric Interpolation	481
10.2.1	The DFT Interpolation Theorem	481
10.2.2	Efficient Evaluation of Trigonometric Functions	484
10.3	The FFT and Signal Processing	488
10.3.1	Orthogonality and Interpolation	489
10.3.2	Least Squares Fitting with Trigonometric Functions	491
10.3.3	Sound, Noise, and Filtering	496
	REALITY CHECK 10: The Wiener Filter	499
	Software and Further Reading	501
CHAPTER 11 Compression.....		503
11.1	The Discrete Cosine Transform	504
11.1.1	One-Dimensional DCT	504
11.1.2	The DCT and Least Squares Approximation	506
11.2	Two-Dimensional DCT and Image Compression	509
11.2.1	Two-Dimensional DCT	510
11.2.2	Image Compression	514
11.2.3	Quantization	516
11.3	Huffman Coding	523
11.3.1	Information Theory and Coding	524
11.3.2	Huffman Coding for the JPEG Format	526
11.4	Modified DCT and Audio Compression	530
11.4.1	Modified Discrete Cosine Transform	530
11.4.2	Bit Quantization	535
	REALITY CHECK 11: A Simple Audio Codec	538
	Software and Further Reading	540

CHAPTER 12 Eigenvalues and Singular Values	543
12.1 Power Iteration Methods	543
12.1.1 Power Iteration	545
12.1.2 Convergence of Power Iteration	547
12.1.3 Inverse Power Iteration	548
12.1.4 Rayleigh Quotient Iteration	549
12.2 QR Algorithm	552
12.2.1 Simultaneous Iteration	552
12.2.2 Real Schur Form and the QR Algorithm	555
12.2.3 Upper Hessenberg Form	558
REALITY CHECK 12: How Search Engines Rate Page Quality	563
12.3 Singular Value Decomposition	566
12.3.1 Finding the SVD in General	569
12.3.2 Special Case: Symmetric Matrices	570
12.4 Applications of the SVD	572
12.4.1 Properties of the SVD	572
12.4.2 Dimension Reduction	574
12.4.3 Compression	575
12.4.4 Calculating the SVD	576
Software and Further Reading	579
CHAPTER 13 Optimization	581
13.1 Unconstrained Optimization without Derivatives	582
13.1.1 Golden Section Search	582
13.1.2 Successive Parabolic Interpolation	586
13.1.3 Nelder-Mead Search	588
13.2 Unconstrained Optimization with Derivatives	592
13.2.1 Newton's Method	592
13.2.2 Steepest Descent	594
13.2.3 Conjugate Gradient Search	595
REALITY CHECK 13: Molecular Conformation and Numerical Optimization	597
Software and Further Reading	599
 APPENDIX	
A Matrix Algebra	601
A.1 Matrix Fundamentals	601
A.2 Block Multiplication	603
A.3 Eigenvalues and Eigenvectors	604

A.4 Symmetric Matrices	605
A.5 Vector Calculus	606
B Introduction to MATLAB.....	609
B.1 Starting MATLAB	609
B.2 Graphics	610
B.3 Programming in MATLAB	613
B.4 Flow Control	613
B.5 Functions	615
B.6 Matrix Operations	616
B.7 Animation	617
ANSWERS TO SELECTED EXERCISES	619
BIBLIOGRAPHY	647
INDEX	659
