<i>Preface</i>	v
<i>Acknowledgements</i>	ix
Chapter 1 Vibration and Human Responses	
1.1 Introduction	1
1.2 Categorization of Vibration	3
1.3 Effects of Vibration	15
1.4 Methods of Human Vibration Research	17
1.5 Summary	25
Chapter 2 An Introduction to Whole-body Vibration	
2.1 Introduction	27
2.2 Some General Observations	29
2.3 Effects of Whole-body Vibration	32
2.4 Vibration Axes	33
2.5 Frequencies of Whole-body Vibration	36
2.6 Magnitudes of Whole-body Vibration	38
2.7 Durations of Whole-body Vibration Exposures	39
2.8 Confounding Factors	40
2.9 Summary	42
Chapter 3 Vibration Discomfort	
3.1 Introduction	43
3.2 Effect of Vibration Magnitude	48
3.3 Effects of Vibration Frequency	53
3.4 Vibration Duration	71
3.5 Complex Vibration	78
3.6 Other Factors Affecting Vibration Discomfort	88
3.7 Models, Standards and Limits for the Vibration Discomfort of Passengers and Drivers	99
3.8 Economics of Reducing Vibration Discomfort	121
3.9 Summary	122
Chapter 4 Activity Interference Caused by Vibration	
4.1 Introduction	125
4.2 Vision	127
4.3 Control Activities	144

4.4	Central Effects	162
4.5	Combined Stress	164
4.6	Duration Effects	165
4.7	Vibration Assessment Methods	166
4.8	Summary	168
Chapter 5 Whole-body Vibration and Health		
5.1	Introduction	171
5.2	Physiological Responses to Whole-body Vibration	173
5.3	Pathological Responses to Whole-body Vibration	187
5.4	The Nature of Occupational Health Problems	190
5.5	Environments Associated with Injury	195
5.6	Prevention of Injury from Whole-body Vibration and Shock	196
5.7	Dose-Effect Relationships	200
5.8	Vibration Evaluation Methods	204
5.9	Response to Mechanical Shocks	211
5.10	Summary	219
Chapter 6 Perception of Whole-body Vibration and the Assessment of Vibration in Buildings		
6.1	Introduction	221
6.2	Effect of Frequency and Axis on the Perception of Whole-body Vibration	231
6.3	Perception Thresholds for Complex Whole-body Vibration	239
6.4	Models, Standards and Limits for the Assessment of Building Vibration	244
6.5	Other Problems	265
6.6	Control of Building Vibration	268
6.7	Summary	269
Chapter 7 Motion Sickness		
7.1	Introduction	271
7.2	The Causes of Motion Sickness	274
7.3	Effects of Low-frequency Translational Oscillation	297
7.4	Effects of Rotational Motion	310
7.5	Motion Sickness in Ships, Aircraft, Spacecraft, Ground Vehicles and Simulators	311
7.6	Preventative Measures	322
7.7	Summary	330
Chapter 8 Whole-body Biodynamics		
8.1	Introduction	333
8.2	Measures of Dynamic Response	335
8.3	Transmissibility of the Whole Body	339
8.4	Whole-body Mechanical Impedance	359
8.5	Biodynamic Modelling	375
8.6	Summary	384

Chapter 9 Seating Dynamics

9.1	Introduction	387
9.2	Measurement of Seat Transmissibility	391
9.3	Seat Evaluation Methods	404
9.4	Summary	413

Chapter 10 Whole-body Vibration Standards

10.1	Introduction	415
10.2	International Standard 2631: Guide for the Evaluation of Human Exposure to Whole-body Vibration	417
10.3	Standardization of the Definition of Terms	430
10.4	International Standards Concerned with Agricultural Tractors and Earth-moving Machinery	431
10.5	International Standards Concerned with Vibration in Ships	434
10.6	International Standards Concerned with Vibration in Buildings	437
10.7	International Standards Concerned with Biodynamic Response	439
10.8	Other International Standards	439
10.9	British Standards	441
10.10	United States Standards	449
10.11	Other Standards	450
10.12	Summary	450

Chapter 11 Methods for Measuring and Evaluating Whole-body Vibration Exposures

11.1	Introduction	453
11.2	The Position of Vibration Transducers	455
11.3	Instrumentation for Vibration Measurement and Analysis	461
11.4	Vibration Analysis with Respect to International Standard 2631 Part 1 (1985)	476
11.5	Vibration Analysis According to British Standard 6841 (1987)	478
11.6	Summary	481

Chapter 12 Examples of Whole-body Vibration Exposures

12.1	Introduction	485
12.2	Road Vehicles	488
12.3	Rail Vehicles	498
12.4	Off-road Vehicles	498
12.5	Aircraft	506
12.6	Sea Vessels	515
12.7	Buildings	519
12.8	Other Environments	523
12.9	Comparison of Methods	525
12.10	Summary	529

Chapter 13	An Introduction to Hand-transmitted Vibration	
13.1	Introduction	531
13.2	Quantifying Effects of Hand-transmitted Vibration	532
13.3	Quantifying Exposure to Hand-transmitted Vibration	535
13.4	The Dynamic Response of the Finger-Hand-Arm System	542
13.5	Subjective Assessment of Vibration of the Hand	548
13.6	Summary	550
Chapter 14	Vascular Disorders Associated with Hand-transmitted Vibration	
14.1	Introduction	553
14.2	Symptoms of Vibration-induced White Finger	556
14.3	Signs of Vibration-induced White Finger	561
14.4	Methods of Categorizing the Signs and Symptoms	566
14.5	Hypothetical Model of Vibration-induced White Finger	578
14.6	Processes Associated with Vibration-induced White Finger	585
14.7	Summary	592
Chapter 15	Non-vascular Disorders Associated with Hand-transmitted Vibration	
15.1	Introduction	595
15.2	Bone and Joint Disorders	596
15.3	Neurological and Muscular Disorders	599
15.4	Other Signs and Symptoms	607
15.5	Summary	608
Chapter 16	Dose-Effect Relationships for Hand-transmitted Vibration	
16.1	Introduction	609
16.2	The Effects of Vibration Frequency and Magnitude	610
16.3	Prevalence	615
16.4	Exposure Duration and Latency	619
16.5	Other Variables	628
16.6	Summary	630
Chapter 17	Hand-transmitted Vibration Standards, Limits and Compensation	
17.1	Introduction	633
17.2	Early U.S.S.R. Standards	636
17.3	Early Czechoslovakian Standards	638
17.4	Early Japanese Standards	638
17.5	Swedish Standards	640
17.6	British Standards	641
17.7	French Standards	645
17.8	International Standards	646

17.9	Other Standards	658
17.10	An Action Level for Hand-transmitted Vibration	660
17.11	Threshold Limit Values	663
17.12	The Law, Compensation and Government Legislation ...	664
17.13	Summary	670
Chapter 18	Measurement and Evaluation of Hand-transmitted Vibration Exposures	
18.1	Introduction	673
18.2	The Positioning of Vibration Transducers	674
18.3	Instrumentation for Vibration Measurement and Analysis	677
18.4	Vibration Evaluation According to Current Standards ...	685
18.5	Percussive Metal-working Tools	687
18.6	Grinders and Other Rotary Tools	691
18.7	Percussive Hammers and Drills used in Mining, Quarrying and Road Maintenance	694
18.8	Chain Saws	695
18.9	Other Vibrating Tools and Processes	697
18.10	Summary	699
Chapter 19	Preventative Actions for Hand-transmitted Vibration	
19.1	Introduction	701
19.2	Principles of Prevention	701
19.3	Managerial Preventative Measures	702
19.4	Technical Preventative Measures	705
19.5	Medical Preventative Measures	708
19.6	Individual Preventative Measures	709
19.7	Treatments for Injury and Disease	715
19.8	Summary	717
Appendix 1	Units, Multipliers, Symbols and Abbreviations	719
Appendix 2	Frequencies and Spectra	727
Appendix 3	Vibration Levels: the Use of Decibels	733
Appendix 4	National and International Standards	737
Appendix 5	Whole-body Vibration and Health—Field Studies	749
Appendix 6	Examples of Vibration-induced White Finger from the Use of Percussive Metal-working Tools	765
Appendix 7	Examples of Vibration-induced White Finger from the Use of Grinding and Other Rotary Tools	771
Appendix 8	Examples of Vibration-induced White Finger from the Use of Pneumatic Hammers and Drills such as Used in Mining Work	773
Appendix 9	Examples of Vibration-induced White Finger from the Use of Chain Saws	777
Appendix 10	Examples of Bone and Joint Disorders in Users of Vibrating Tools	781

Appendix 11 Examples of Muscle, Nerve and Other Sensory Anomalies in Users of Vibrating Tools	787
Appendix 12 Examples of Subjective Symptoms and Clinical Observations Associated with the Use of Vibrating Tools	793
Glossary	799
References	863
Index	953
