1	Mobility	1
1.1	Introduction	1
1.2	Causes and forms of mobility	2
1.2.1	Definitions	2
1.2.2	Activities determine mobility	3
1.2.3	Transportation systems for freight traffic	4
1.2.4	Some marked aspects of mobility	5
1.3	Stress points and disadvantages of mobility	5
1.4	Mobility-relevant demands on the automobile	6
1.4.1	Basic demands	6
1.4.2	Special requirements	7
2	Requirements and conflicting goals	9
2.1	Product innovation and prior progress	9
2.2	Regulatory requirements	16
2.2.1	Certification for service on public roads	16
2.2.2	National and supranational legislative authorities	16
2.2.2.1	Traffic code and motor vehicle code (German StVZO)	16
2.2.2.2	European Community directives	16
2.2.2.3	United Nations Economic Commission for Europe Regulations	19
2.2.2.4	Further measures to reduce trade barriers	19
2.2.3	Accident prevention (active safety)	20
2.2.3.1	General	20
2.2.3.2	Brake system	20
2.2.3.3	Driver's field of vision	20
2.2.3.4	Tire chains	21
2.2.3.5	Lighting equipment	21
2.2.4	Vehicle safety and injury mitigation	21
2.2.4.1	General	21
2.2.4.2	Occupant protection in frontal impacts	22
2.2.4.3	Occupant protection in side impacts	22
2.2.5	Requirements for emissions behavior	22
2.2.5.1	General	22
2.2.5.2	Noise emissions and exhaust system	22
2.2.5.3	Exhaust emissions	23
2.2.5.3.1	Emissions from motor vehicle engines	23
2.2.5.3.2	Diesel engine emissions (diesel smoke opacity)	25
2.2.5.4	Fuel consumption and CO ₂ emissions	25
2.2.5.5	Electromagnetic compatibility and radio noise suppression	25
2.2.6	Miscellaneous requirements	25
2.2.6.1	Mounting rear license plate	25
2.2.6.2	Theft deterrence, immobilizer	25
2.2.6.3	Manufacturer's plate, vehicle identification number	26
2.2.6.4	Engine power measurement	26
2.2.6.5	Weights and dimensions of category M ₁ vehicles	27
2.2.7	Prognosis	27
2.3	New technologies	27
3	Vehicle physics	33
3.1	Basics	33
3.1.1	Definitions	33
3.1.2	Driving resistance and propulsion	34
3.1.3	Factors affecting fuel consumption	36

3.1.4	Dynamic forces	37
3.1.5	Motion of the vehicle body	37
3.1.6	Forces and moments	38
3.1.7	Chassis	38
3.1.8	Steering	38
3.1.9	Wheels and tires	39
3.2	Aerodynamics	39
3.2.1	Basics	39
3.2.2	Areas of application	40
3.2.2.1	Aerodynamic drag/vehicle performance	40
3.2.2.2	Dynamic safety	42
3.2.2.3	Wetting and soiling	43
3.2.2.4	Individual forces	44
3.2.2.5	Cooling and component temperatures	45
3.2.2.6	Interior climate	45
3.2.2.7	Wind noise	45
3.2.3	Aerodynamics in the overall development process	47
3.3	Heat transfer and thermal technology	47
3.3.1	Cooling of internal combustion engines	47
3.3.1.1	Radiator layout	48
3.3.1.2	Radiator construction	49
3.3.1.3	Fans and fan drives	50
3.3.1.4	Cooling modules	50
3.3.1.5	The overall engine cooling system	50
3.3.2	Passenger compartment heating and cooling	51
3.3.2.1	The heating function and its components	52
3.3.2.2	Operation of the air conditioning system and its components	53
3.3.2.3	Compressors and control of cooling performance	55
3.3.2.4	Air conditioning system layout	56
3.3.2.5	Additional fuel consumption due to air conditioning system	56
3.4	Vehicle acoustics	58
3.4.1	Introduction	58
3.4.2	Target definition	58
3.4.3	Component qualification	61
3.4.3.1	Propulsion unit	61
3.4.3.2	Driveline	63
3.4.3.3	Body	65
3.4.3.4	Steering system	68
3.4.4	Overall vehicle optimization	69
3.4.4.1	Aeroacoustics	69
3.4.4.2	Transmission path analysis	71
3.4.4.3	Vibration comfort	73
3.4.5	Exterior noise	75
3.4.6	Quality assurance	77
4	Shapes and new concepts	79
4.1	Design	79
4.1.1	The definition of design	79
4.1.2	The growing importance of design	79
4.1.2.1	Design and platform/shared parts concept	79
4.1.2.2	Design and brand image	80
4.1.2.3	Design as a marketing tool	80
4.1.2.4	Trend research	81
4.1.2.5	Conflicting goals	81
4.1.3	Exterior and interior design, color and trim, advanced design	81
4.1.4	The design process	83
4.1.4.1	The classic design process	83
4.1.4.2	The digital design process	85

4.1.4.3	The digital process—strengths and weaknesses	87
4.1.5	Prognosis	87
4.2	Vehicle concepts and packages in passenger car development	88
4.2.1	Development process	88
4.2.1.1	Product requirements and the target catalog	88
4.2.1.2	Establishing the vehicle concept	88
4.2.1.3	Styling/hard point package	88
4.2.1.4	Package	88
4.2.2	Vehicle conception as a process	89
4.2.2.1	Sequence	89
4.2.2.2	Package forms and product data management	89
4.2.3	Layout sectors and factors influencing the vehicle package	90
4.2.3.1	Definition of dimensions	90
4.2.3.2	Vehicle concept	91
4.2.3.2.1	Front-mounted engine	91
4.2.3.2.2	Rear-mounted engine	93
4.2.3.2.3	Mid-mounted engine	93
4.2.3.2.4	Special variations on engine location	94
4.2.3.2.5	Comparison of vehicle concepts	95
4.2.3.3	Vehicle package layout domains	95
4.2.3.3.1	Interior	95
4.2.3.3.2	Luggage compartment	96
4.2.3.3.3	Body structure	96
4.2.3.3.4	Engine compartment	96
4.2.3.3.5	Exhaust system, drivetrain, and underbody	96
4.2.3.3.6	Fuel tank, lines, and spare tire	97
4.2.3.3.7	Dimensional comparison of various vehicle classes	97
4.2.3.4	Regulatory requirements	98
4.2.3.4.1	Direct influences on the vehicle concept	98
4.2.3.4.2	Indirect influences on the vehicle concept	98
4.2.3.5	Customer service and manufacturing requirements	99
4.2.3.5.1	Production and modularization	99
4.2.3.5.2	Customer service	99
4.2.3.6	Strategic influences	100
4.2.3.6.1	Vehicle platform	100
4.2.3.6.2	Vehicle variants	100
4.2.3.6.3	Modular construction	100
4.2.4	Vehicle development in the future	101
4.3	Innovative propulsion systems	101
4.3.1	Electric drive systems	101
4.3.1.1	Drive systems for electric vehicles	102
4.3.1.2	Electric motors for electric vehicles	102
4.3.1.3	Inverters	104
4.3.1.4	Traction batteries	105
4.3.1.5	Battery chargers	107
4.3.1.6	Looking to the future	107
4.3.2	Fuel cell propulsion for mobile systems	107
4.3.2.1	Necar vehicles	111
4.3.2.2	Nebus fuel-cell bus	112
4.3.2.3	Pollutant emissions from fuel-cell propulsion systems	113
4.3.2.4	Future outlook	113
4.3.3	Hybrid drive	114
4.3.3.1	Scenario	114
4.3.3.2	Concepts	114
4.3.3.3	Components from the hybrid point of view	116
4.3.4	Stirling engines, gas turbines, and flywheels	117
4.3.4.1	Stirling engines	117
4.3.4.2	Gas turbines	118

	4.3.4.3	Flywheels	120
5		Powerplants	123
