Preface	xiii
Acknowledgments	xv
Why This Book Is Different	xvii
How This Book Is Organized	xix
1 MATLAB[®] Integrated Development Environment	1
Lesson 1.1 Basics of the MATLAB [®] Integrated Development Environment	1
1.1.1 MATLAB [®] Integrated Development Environment	1
1.1.2 Creating Scalar Variables	3
1.1.3 Creating Vector Variables	5
1.1.4 Creating Array Variables	6
Lesson 1.2 MATLAB [®] Script Files	8
1.2.1 Creating a Script File	9
1.2.2 Naming a Script File	9
1.2.3 Saving a Script File	12
1.2.4 Executing a Script File	13
1.2.5 MATLAB [®] Code Readability	14
1.2.6 Commenting MATLAB [®] Code	15
Lesson 1.3 MATLAB [®] Editor—Cell Mode	17
1.3.1 Enabling Cell Mode	17
1.3.2 Separating a Program into Cells	18
1.3.3 Evaluating Code in a Cell	19
Answers to Selected Exercises	20
Lesson 1.2	20
2 Scalars in MATLAB[®]	21
Lesson 2.1 Creating and Naming MATLAB [®] Scalar Variables	21
2.1.1 MATLAB [®] Special Variables	21
2.1.2 User-Defined Variables	23
Lesson 2.2 Approximation of Numbers and Discrete Mathematical Operations	26
2.2.1 Approximating Numbers	27
2.2.2 Discrete Mathematical Operations	29
Lesson 2.3 Mathematical Expressions for Scalar Variables	30
2.3.1 Creating Variables	30

2.3.2	Precedence of Mathematical Operations	31
2.3.3	From Mathematical Expressions to MATLAB [®] Expressions	31
2.3.4	From MATLAB [®] Expressions to Mathematical Expressions	37
2.3.5	Exercises	41
Lesson 2.4	Relational and Logical Operations for Scalar Variables	42
2.4.1	The <code>logical</code> Class	42
2.4.2	The Relational Operators	43
2.4.3	The Logical Operators	45
2.4.4	Combining Logical and Rational Operators	49
Lesson 2.5	Complex Scalar Variables	50
2.5.1	Introduction	50
2.5.2	Creating Complex Scalar Variables	51
2.5.3	Addition of Complex Numbers	52
2.5.4	Subtraction of Complex Numbers	53
2.5.5	Multiplication of Complex Numbers	53
2.5.6	Division of Complex Numbers	54
2.5.7	Conjugate of a Complex Number	55
2.5.8	Modulus and Angle of a Complex Number	55
2.5.9	Plotting a Complex Number in Cartesian Coordinates	56
2.5.10	Plotting a Complex Number in Polar Coordinates	57
Answers to Selected Exercises		58
Lesson 2.1		58
Lesson 2.4		58
3	Vectors in MATLAB[®]	61
Lesson 3.1	Creating Vectors	61
3.1.1	Introduction	62
3.1.2	Method 1: Creating Vectors Manually	62
3.1.3	Method 2: Creating Vectors Using the Linear Method	66
3.1.4	Method 3: Creating Vectors Using the Linear Spacing Method	67
3.1.5	Method 4: Creating Vectors Using the Logarithmic Spacing Method	68
3.1.6	Empty Vectors	69
3.1.7	Vector Concatenation	70
3.1.8	Creating Complex Vectors	71
Lesson 3.2	Relational and Logical Operations on Vectors	75
3.2.1	Relational Operations on Vectors	76
3.2.2	The Logical Operations on Vectors	77
3.2.3	Combining Logical and Relational Operators	79

Lesson 3.3	Accessing Elements in Vectors	79
3.3.1	Accessing an Individual Element in a Vector Using Its Index	80
3.3.2	Accessing a Group of Elements in a Vector Using Their Indices	81
3.3.3	Accessing Elements in a Vector Using Their Values	83
3.3.4	Accessing Elements in a Vector Using the Relational and Logical Operators	85
Lesson 3.4	Arithmetical Operations on Vectors	87
3.4.1	Vector Addition and Subtraction	87
3.4.2	Matrix and Element-by-Element Arithmetical Operations for Vectors	90
3.4.3	Vector Multiplication	90
3.4.4	Vector Division	94
Lesson 3.5	Plotting Vectors	96
3.5.1	Plotting Vectors	96
3.5.2	Increasing the Resolution of a Plot	97
3.5.3	Changing the Color of a Plot	98
3.5.4	Draw a Function as Points	98
3.5.5	Labeling the x and y Axes	99
3.5.6	Adding a Title to a Figure	99
3.5.7	Using Greek Letters	100
3.5.8	Adding a Grid to a Figure	101
3.5.9	Adding a Text to a Figure	102
3.5.10	Changing the Font Size	103
3.5.11	Changing the Line Width	103
3.5.12	Multiple Plots	104
3.5.13	Adding a Legend to a Plot	105
3.5.14	Multiple Subplots	106
3.5.15	Multiple Figures	108
3.5.16	Plotting a Vector Using Its Indices	108
Answers to Selected Exercises		109
Lesson 3.1		109
Lesson 3.3		111
Lesson 3.4		113
Lesson 3.5		113
4	Arrays in MATLAB[®]	115
Lesson 4.1	Creating Arrays	115
4.1.1	Introduction	116
4.1.2	Creating Arrays Manually	116
4.1.3	Creating Arrays Using the <code>repmat</code> Function	118
4.1.4	Transpose an Array	120
4.1.5	Changing Array Dimensions Using the <code>reshape</code> Function	120

4.1.6	Finding the Size of an Array	123
4.1.7	Converting an Array to a Column Vector	124
4.1.8	Arrays Concatenation	124
4.1.9	Creating Complex Arrays	126
Lesson 4.2	Relational and Logical Operations on Arrays	127
4.2.1	Relational Operations on Vectors	127
4.2.2	Logical Operations on Vectors	129
4.2.3	Combining Logical and Rational Operators	131
Lesson 4.3	Accessing Elements in Arrays	132
4.3.1	Accessing an Individual Element in an Array Using Its Index	132
4.3.2	Accessing Rows in an Array	135
4.3.3	Accessing Columns in an Array	136
4.3.4	Accessing a Group of Elements in an Array Using Their Indices	137
4.3.5	Accessing Elements in an Array Using Their Values	141
4.3.6	Accessing Elements in an Array Using Relational and Logical Operators	143
Lesson 4.4	Arithmetical Operations on Arrays	145
4.4.1	Array Addition and Subtraction	145
4.4.2	Matrix and Element-By-Element Arithmetical Operations	148
4.4.3	Array Multiplication	148
4.4.4	Array Division	151
Lesson 4.5	Plotting Arrays	153
4.5.1	Mathematical Background for 3D Plotting of Arrays	153
4.5.2	3D Plot an Array with the <code>mesh</code> Function	155
4.5.3	Increasing the Resolution of a 3D Plot	156
4.5.4	3D Plot an Array with the <code>surf</code> Function	157
4.5.5	3D Plot an Array Using Its Row-and-Column Indices	158
4.5.6	Background for 2D Plotting of Arrays	159
4.5.7	2D Plot an Array with the <code>imagesc</code> Function	161
Answers to Selected Exercises		162
Lesson 4.3		162
5	MATLAB[®] Functions	163
Lesson 5.1	Introduction to Functions	163
5.1.1	What Is a Function?	163
5.1.2	The Purpose of a Function	164
5.1.3	Calling a MATLAB [®] Function	168
Lesson 5.2	Creating Functions	168
5.2.1	Creating a MATLAB [®] Function	169

5.2.2	Naming a MATLAB [®] Function	169
5.2.3	Saving a MATLAB [®] Function	171
5.2.4	Calling a MATLAB [®] Function	172
5.2.5	A MATLAB [®] Function Returning Two Values	175
Lesson 5.3	Scope of MATLAB [®] Variables in a Function	177
5.3.1	The Scope of a Variable in a MATLAB [®] Function	177
Answers to Selected Exercises		182
Lesson 5.2		182
Lesson 5.3		183
6	Conditional Statements in MATLAB[®]	185
Lesson 6.1	The Construction of an if Statement	185
6.1.1	Swap the Values of Two Variables	185
6.1.2	if Statement	187
6.1.3	Improving the Readability of MATLAB [®] Functions	191
6.1.4	Examples for if Statements	193
Lesson 6.2	The Construction of an if else Statement	196
6.2.1	if else Statement	196
Lesson 6.3	Recursive Functions	205
6.3.1	Recursive Functions	205
Lesson 6.4	The Construction of an if elseif else Statement	212
6.4.1	if elseif else Statement	212
Lesson 6.5	The Construction of a switch case Statement	215
6.5.1	switch case Statement	215
Answers to Selected Exercises		219
Lesson 6.1		219
Lesson 6.4		221
Lesson 6.5		221
7	Loop Statements in MATLAB[®]	223
Lesson 7.1	The Construction of a for Loop Statement	223
7.1.1	The Need for Loops in MATLAB [®]	223
7.1.2	The Construction of a for Statement	224
7.1.3	The Construction of a Nested for Statement	237
Lesson 7.2	The Construction of Combined for and if Statements	240
7.2.1	The Construction of Combined for and if Statements	241
7.2.2	The continue Keyword	244
7.2.3	The break Keyword	245
Lesson 7.3	The Construction of a while Loop Statement	251
7.3.1	Introduction to the while Loop Statement	252
7.3.2	Examples of the while Loop Statement	254
7.3.3	Recursive Functions	256

Answers to Selected Exercises	258
Lesson 7.1	258
Lesson 7.2	258
Projects	261
Project 1: Conway's Game of Life	261
Project 2: Conway's Game of Life—Wrapped Edges	266
8 MATLAB[®] Debugging, Profiling, and Code Indentation	271
Lesson 8.1 MATLAB [®] Debugging	271
8.1.1 Syntax and Runtime Errors	271
8.1.2 Debugging MATLAB [®] Code	275
Lesson 8.2 Debugging MATLAB [®] Functions	284
8.2.1 Debugging MATLAB [®] Function	284
Lesson 8.3 Advanced MATLAB [®] Debugging Tools	290
8.3.1 Introduction	290
8.3.2 The Conditional Breakpoint Debugging Tool	291
8.3.3 The Go Until Cursor Debugging Tool	293
8.3.4 The Continue Debugging Tool	293
Lesson 8.4 The MATLAB [®] Profiler Tool	296
8.4.1 The MATLAB [®] Profiler	296
8.4.2 Timing MATLAB [®] Code	299
8.4.3 Benchmarking Your Computer	299
Lesson 8.5 MATLAB [®] Code Indentation	301
8.5.1 MATLAB [®] Code Indentation	301
8.5.2 Smart Code Indentation	306
Answers to Selected Exercises	309
Lesson 8.3	309
9 Structures in MATLAB[®]	311
Lesson 9.1 Structures in MATLAB [®]	311
9.1.1 The Need for the Structure Class	311
9.1.2 Functions for Structures	314
Lesson 9.2 A Vector of Structures	317
9.2.1 A Vector of Structures	317
Answers to Selected Exercises	317
Lesson 9.1	320
Project: The Fox and Rabbit Game	321
10 Calculus in MATLAB[®]	327
Lesson 10.1 Introduction to Symbolic Math Toolbox	327
10.1.1 Symbolic Math Toolbox	327
10.1.2 Constructing a <code>sym</code> Variable	328
10.1.3 Constructing a Symbolic Expression	329

10.1.4	Finding the Value of a Symbolic Expression	330
10.1.5	Plotting a Symbolic Expression Using the <code>ezplot</code> Function	330
Lesson 10.2	Algebraic Equations	332
10.2.1	Determine the Roots of an Algebraic Expression Using the <code>solve</code> Function	332
10.2.2	Factorize an Algebraic Expression Using the <code>factor</code> Function	333
10.2.3	Expand an Algebraic Expression Using the <code>expand</code> Function	334
10.2.4	Simplify an Algebraic Expression Using the <code>simplify</code> Function	334
Lesson 10.3	Differentiation and Integration	335
10.3.1	Differentiation of a Mathematical Expression Using the <code>diff</code> Function	335
10.3.2	Integration of a Mathematical Expression Using the <code>int</code> Function	336
Lesson 10.4	Differential Equations	339
10.4.1	Solving a First Order Differential Equation Using the <code>dsolve</code> Function	339
10.4.2	Solving a Second Order Differential Equation Using the <code>dsolve</code> Function	342
Lesson 10.5	Laplace and Fourier Transforms	343
10.5.1	Laplace Transform	343
10.5.2	Inverse Laplace Transform	344
10.5.3	Fourier Transform	344
10.5.4	Inverse Laplace Transform	345
Answers to Selected Exercises		345
Lesson 10.2		345
Lesson 10.3		346
Lesson 10.4		346
