
Table of Contents

SECTION I *Basic Bone Biology and Tissue Engineering* *Bruce A. Doll*

Chapter 1

Developmental Biology of the Skeletal System	3
<i>Bruce Doll</i>	

Chapter 2

Bone Physiology Dynamics	27
<i>Bruce Doll and Hannjörg Koch</i>	

Chapter 3

Cell Biology of the Skeletal System: Osteoblasts, Osteocytes, Osteoclasts, Bone Marrow Stromal Cells	43
<i>Carol V. Gay, Henry J. Donahue, Christopher A. Siedlecki, and Erwin Vogler</i>	

SECTION II *Basic Bone Biology and Scaffold Designs for Tissue* *Charles Sfeir*

Chapter 4

The Organic and Inorganic Matrices	91
<i>Adele L. Boskey</i>	

Chapter 5

Signaling Molecules for Tissue Engineering	125
<i>Charles Sfeir, Julie Jadowiec, Hannjörg Koch, and Phillip Campbell</i>	

Chapter 6

Biodegradable Polymers and Microspheres in Tissue Engineering	149
<i>Kacey G. Marra</i>	

Chapter 7

Design and Fabrication of Bone Tissue Engineering Scaffolds167
*Scott J. Hollister, Juan M. Toboas, Rachel M. Schek, Cheng-Yu Lin,
and Tien Min Chu*

SECTION III *Applied Principles of Bone Tissue Engineering*

Jeffrey O. Hollinger and Thomas A. Einhorn

Chapter 8

Study Design and Statistical Analysis.....195
Robert T. Rubin and Jeffrey O. Hollinger

Chapter 9

Animal Models for Bone Tissue Engineering of Critical-sized
Defects (CSDs), Bone Pathologies and Orthopedic Disease States217
Mark P. Mooney and Michael I. Siegel

Chapter 10

Biomechanics245
Dennis M. Cullinane and Kristy T. Salisbury

SECTION IV *Clinical Opportunities*

Thomas A. Einhorn and Jeffrey O. Hollinger

Chapter 11

Tissue Engineering of Bone277
Sanjeev Kakar and Thomas A. Einhorn

Chapter 12

Clinical Challenges and Contemporary Solutions: Craniofacial and Dental303
James P. Bradley

Chapter 13

Opportunities in Spinal Applications315
John M. Rhee and Scott D. Boden

Index331
