<b>1 Food science and the transport of food</b>	<b>1</b>
ROBERT JAMES HART	
1.1 Introduction	1
1.2 Composition of food	1
1.3 Chemical reactions in foods	2
1.3.1 Maillard browning reaction	2
1.3.2 Enzymic reactions in foods	5
1.3.3 Oxidation reactions	7
1.4 Physical changes in foods: crystallisation phenomena	9
1.4.1 Crystal size	9
1.5 Microbiology and food transportation	11
1.5.1 Properties of microorganisms	11
1.5.2 Effects of temperature	11
1.5.3 Effects of relative humidity	13
1.5.4 Controlled-atmosphere transportation	13
1.6 Characteristics of bacterial growth – the use of modelling	14
1.7 Controlled- and modified-atmosphere transportation	16
1.7.1 Meat and meat products	16
1.7.2 Fruit and vegetables	17
1.8 Taints	18
1.9 Transport of animals	18
1.9.1 Importance of meat pH	18
1.10 Conclusion	21
<b>2 Logistics of food transport</b>	<b>22</b>
MICHAEL BROWNE and JULIAN ALLEN	
2.1 Introduction	22
2.2 Importance of logistics	22
2.2.1 Impact of product characteristics on logistics costs	24
2.2.2 Key transport and storage considerations for products	25
2.2.3 Further transport and supply system considerations	26
2.2.4 Management issues in the supply chain	28
2.3 The food industry	29
2.3.1 Food: distinguishing characteristics	29
2.3.2 Importance of the food industry	30
2.3.3 Structure of the food industry	31
2.3.4 Food transport and distribution	34

2.4	Key logistics trends and supply chain relationships in the food industry	38
2.4.1	Integration of the supply chain	38
2.4.2	Ownership and control of stock	40
2.4.3	Consignment size and delivery frequency	43
2.4.4	Information technology and communications systems	43
2.4.5	Quality of information flow between companies	45
2.5	Concluding remarks	47
2.6	Food transport case studies	48
2.6.1	Transport and distribution planning at Safeway	48
2.6.2	Recycling of packaging at Tesco	48
	References	49
<b>3</b>	<b>Land transport of food: principal elements and current practice</b>	<b>51</b>
	MIKE J. HEYWOOD	
3.1	Brief history	51
3.2	The transport medium – decision making parameters	52
3.3	The supply chain	54
3.4	In-transit refrigeration	56
3.4.1	Combat ambient temperature	57
3.4.2	Cool the retained air mass	58
3.4.3	Cool the cargo body structure	58
3.4.4	Respiration of organic products	59
3.5	Refrigeration developments	60
3.5.1	Mechanical refrigeration	60
3.5.2	Cryomechanical refrigeration	62
3.5.3	Cryogenic refrigeration	63
3.5.4	Hold over plates	64
3.6	Beyond refrigeration	64
3.6.1	Controlled atmospheres	64
3.6.2	Continued treatments	66
3.7	Loading vehicles and containers	67
3.7.1	Air circulation	67
3.7.2	Load configuration	70
3.7.3	Load restraint	71
3.8	Selecting transport	72
<b>4</b>	<b>Transport of foodstuffs by sea</b>	<b>75</b>
	ROBERT D. HEAP	
4.1	Introduction	75
4.2	Cooling of cargo in transit	77
4.2.1	Shipboard cooling	77
4.2.2	Containers	79
4.3	Conventional refrigerated ships	80
4.3.1	General arrangement	80
4.3.2	Air distribution	81
4.3.3	Air freshening	82
4.3.4	Compatibility and stowage	82
4.3.5	Taint and odour removal	83
4.3.6	Refrigeration equipment	83
4.3.7	Cargo space monitoring	84
4.3.8	Cold treatment quarantine in transit	85
4.3.9	Loading port surveys	86
4.3.10	Controlled-atmosphere equipment	86

4.4	Container ships	87
4.4.1	Terminals and equipment	88
4.4.2	Refrigeration equipment ducted systems	90
4.4.3	Containers	90
4.4.4	Air distribution and air freshening	91
4.4.5	Compatibility and stowage	92
4.4.6	Refrigerated containers	92
4.4.7	Clip-on refrigeration equipment	94
4.4.8	Pretrip inspections	94
4.4.9	Controlled-atmosphere containers	94
4.4.10	Humidity control	94
4.5	Need for refrigeration	95
	References	95
<b>5</b>	<b>Air transport of perishables</b>	<b>97</b>
	ALISTER K. SHARP	
5.1	Introduction	97
5.2	The flight is just part of the journey	99
5.3	Cargo space	100
5.4	Unit load devices: containers and pallets	100
5.5	Temperature regulation within the cargo	103
5.6	Expendable refrigerants: dry ice and water ice	104
5.7	Carton design	105
5.8	Temperature protection	106
5.9	Documentation	108
5.10	Temperature monitoring	108
5.11	Recommendations	109
	Further reading	110
<b>6</b>	<b>Transport of fruit and vegetables</b>	<b>111</b>
	GABRIEL J. EKSTEEN	
6.1	Post-harvest behaviour of fruit and vegetables	111
6.1.1	Role of energy in fresh produce	112
6.1.2	Respiration	113
6.1.3	Controlling the respiration rate	115
6.2	Precooling and the cold chain	117
6.2.1	Cooling rates	117
6.2.2	Cooling methods	118
6.3	Product requirements during transport	120
6.3.1	Temperature and humidity requirements	120
6.3.2	Short term marketing	121
6.3.3	Medium and long term marketing	121
6.3.4	Accuracy of temperature control	122
6.3.5	Loading temperature specifications	124
6.4	Storage temperature management	125
6.4.1	Product temperature requirement	126
6.4.2	Product requirement	126
6.4.3	Equipment requirement	127
6.4.4	Other applications	127
6.5	Conclusion	128
	References	128

<b>7 Transport of oils and fats</b>	<b>129</b>
<b>J. BARRY ROSSELL</b>	
7.1 Introduction	129
7.2 Quality problems arising in transport	129
7.3 Transport at sea	131
7.3.1 Transport and international trade	131
7.3.2 Growth in edible oil transport	132
7.3.3 Types of ship used for oil transport	132
7.3.4 Cleaning of a ship's tanks	134
7.3.5 Problems in bulk ocean transport	134
7.3.6 Codex Guideline	135
7.3.7 EU directives	137
7.3.8 Spillage at sea	138
7.4 Transport on land	139
7.4.1 Canal barge	140
7.4.2 Road and rail	140
References	143
 <b>8 Distribution of chilled and frozen foods</b>	 <b>144</b>
<b>JERRY RYAN, R. A. RICHARDS and PETER SLOCOMBE</b>	
8.1 Introduction	144
8.2 Loading disciplines	145
8.3 Overnight standing and noise difficulties	145
8.4 Thermographs and temperature monitoring equipment	146
8.5 Temperature measurement	146
8.6 Calibration	150
8.7 Refrigerated vehicles	150
8.8 Foodstuffs carried	150
8.8.1 Frozen foods	150
8.8.2 Quick-frozen foodstuffs	151
8.8.3 Chilled foods	151
8.9 Transport refrigeration requirements	151
8.10 Refrigeration methods	152
8.10.1 Mechanical refrigeration	152
8.10.2 Top air delivery	153
8.11 Insulation	153
8.12 Precooling the product	154
8.13 Design and specification	154
8.13.1 Customer requirements	154
8.13.2 Product packaging	155
8.13.3 Product temperature	155
8.13.4 Product handling/retention	155
8.13.5 Bodywork specification	156
8.13.6 Floor type	157
8.13.7 Running gear	157
8.13.8 Types of door	158
8.13.9 Internal wall finish	158
8.13.10 Ancillary equipment	158
8.14 Conclusion	158
 <b>9 Transport of dairy produce</b>	 <b>160</b>
<b>ROB LEWIS</b>	
9.1 Main dairy product types	160
9.2 Packaging	160
9.3 Manufacture and storage	160
9.4 Product deterioration	162

9.5	Land transport	164
9.5.1	Loading patterns	164
9.5.2	Access into vehicles	165
9.5.3	Internal dimensions and condition	165
9.5.4	Dampness	166
9.5.5	Residues	166
9.5.6	Odour	166
9.5.7	Dunnaging	166
9.5.8	Air temperature measurement	167
9.6	Shipping	167
9.6.1	Condition of product on arrival at the wharf	167
9.6.2	In the wharf shed	167
9.6.3	At vessel side	167
9.6.4	Vessel requirements	168
9.6.5	Stowage	169
9.6.6	Carriage temperatures	169
9.6.7	Product stowed on deck	169
9.7	Air freight	169
9.8	Insurance	170
<b>10</b>	<b>Hygiene in food transport</b>	<b>171</b>
	BETSY L. BLAIR	
10.1	Introduction	171
10.2	Basic hygiene requirements	171
10.2.1	Shipping container inspections	172
10.2.2	Methods of cleaning	174
10.3	Shipping container loading	176
10.3.1	Bulk flour or grain containers (hopper cars)	177
10.3.2	Rail boxcars	177
10.3.3	Lorry trailers	178
10.4	Inspection of incoming carriers	178
10.4.1	Lorry trailers, shipping containers and rail boxcars	179
10.4.2	Refrigerated containers or trailers	182
10.4.3	Bulk flour or grain containers (hopper cars)	182
10.4.4	Bulk dry ingredient tankers	183
10.4.5	Bulk liquid tankers	183
10.5	Summary	184
	References	184
<b>11</b>	<b>Quality systems in food transportation</b>	<b>185</b>
	GILL PALMER	
11.1	Introduction	185
11.2	Quality and safety in food transportation	185
11.3	History of quality management in food transportation	187
11.4	Standards for quality systems	188
11.5	Benefits of implementing a quality management system	189
11.6	Clauses of ISO9002	190
11.6.1	Management responsibility	190
11.6.2	Quality system	193
11.6.3	Contract review	194
11.6.4	Document and data control	195
11.6.5	Purchasing	196
11.6.6	Control of customer-supplied product	197
11.6.7	Product identification and traceability	197
11.6.8	Process control	198
11.6.9	Inspection and testing	199
11.6.10	Control of inspection, measuring and test equipment	199

11.6.11	Inspection and test status	200
11.6.12	Control of non-conforming product	200
11.6.13	Corrective and preventive action	201
11.6.14	Handling, storage, packaging, preservation and delivery	202
11.6.15	Control of quality records	203
11.6.16	Internal quality audits	203
11.6.17	Training	204
11.6.18	Servicing	205
11.6.19	Statistical techniques	205
11.6.20	Summary	205
11.7	HACCP: A food safety management system	206
	Appendix: Company profiles	211
