

Contents

Preface	iii
Contributors	x
Conversion to SI Units	xiv
Bringing Costs up to Date	xvi
1 Fluid Flow	
Fluid Flow	3
<i>Neil S. Berman</i>	
Crude Oils	23
<i>Bill Smith</i>	
Gas Flow Pressure Drop	49
<i>K. Jayaraman</i>	
Measurement	51
<i>Neil S. Berman</i>	
Natural Gas	66
<i>P. Mark Hope and R. G. Nelson</i>	
Slurry Systems, Nomograph	84
<i>F. Caplan</i>	
Slurry Systems and Pipelines	89
<i>R. H. Derammelaere and E. J. Wasp</i>	
Two-Phase Design	136
<i>Robert Kern</i>	
Two-Phase Pressure Drop Computation	149
<i>Rafik Soliman</i>	
Water Hammer	158
<i>John A. Kremers</i>	
2 Fluidics	
Fluidics	164
<i>Harry F. Fabisch</i>	
3 Piping Design	
Piping Design	185
<i>John J. McKetta</i>	
Economic Diameter	379
<i>Lance W. Chantos</i>	
Equivalent Length Estimation	384
<i>W. Wayne Blackwell</i>	

3 Piping Design (Cont.)	
Fittings, Number and Types	391
<i>William B. Hooper</i>	
Fittings, Pressure Drop	397
<i>William B. Hooper</i>	
Flashing Steam Condensate	405
<i>Richard D. Ruskin</i>	
Gravity Flow	410
<i>P. D. Hills</i>	
Liquid Carbon Dioxide	417
<i>Graeme G. King</i>	
Maximum Pressure for Steel Piping	428
<i>V. Ganapathy</i>	
Offshore Considerations	430
<i>Ronald E. Ingham and Arnold J. Carrico</i>	
Photogrammetry and Computer-Aided	444
<i>John F. Kenefick and Richard D. Chirillo</i>	
Polytropic Compression	452
<i>Joseph W. Stanecki</i>	
Sizing Economics	462
<i>D. W. Culler</i>	
Steam Lines, Optimum Diameter	468
<i>V. Ganapathy</i>	
Temperature (High) Considerations	472
<i>John D. Dawson</i>	
Temperature (Low) Considerations	480
<i>Graeme G. King</i>	
Tracing Costs	488
<i>Joseph T. Lonsdale and Jerry E. Mundy</i>	
Vacuum Considerations	499
<i>Paolo Conte and Maurizio Felici</i>	
Piping and Instrumentation Diagrams	505
<i>Monte L. Schwartz and Joseph Koslov</i>	
Thermoplastic Hose	514
<i>Charles H. Artus</i>	
Around Control Valves	524
<i>John D. Constance</i>	
4 Pipeline Design	
Dynamic Programming	530
<i>Robert J. Tsal, Edward Gordon, Kenneth O. Simpson, and Robert R. Olson</i>	
Manifolds	560
<i>James B. Riggs</i>	
Non-Newtonian Flow	569
<i>A. A. Sultan</i>	
Slurry Systems	585
<i>Nigel I. Heywood, David C.-H. Cheng, and A. J. Carleton</i>	

4 Pipeline Design (Cont.)	
Slurry Systems, Energy Reduction	622
<i>Nigel I. Heywood</i>	
Two-Phase Flow, Pressure Drop and Holdup Equations	647
<i>John A. Barnette</i>	
Waxy Crude Oils	658
<i>Ram Prasad</i>	
Permafrost Considerations	663
<i>Graeme G. King</i>	
Flow Basics	673
<i>David C.-H. Cheng and Nigel I. Heywood</i>	
Loops or Expansion Joints	707
<i>Robert K. Broyles</i>	
Materials—Selection, Costs, Installation	714
<i>Arthur H. Tuthill</i>	
5 Buried Pipelines	
Corrosion Control	745
<i>Joseph S. Dorsey</i>	
Design	763
<i>Graeme G. King</i>	
Heat Loss	778
<i>Adam Zanker</i>	
6 Pipeline Support Design	
Pipeline Support Design	782
<i>C. V. Char</i>	
7 Pipeline Shortcut Methods	
Collapsing Pressure	814
<i>Mileta Mikasinovic and Peter A. Marcucci</i>	
Collapsing Pressure, Nomograph	822
<i>Adam Zanker</i>	
Discharge from Horizontal Pipes	825
<i>Adam Zanker</i>	
Discharge from Vertical Pipes	828
<i>Adam Zanker</i>	
Economic Pipe Sizes	831
<i>Adam Zanker</i>	
Expansion of Pipe Materials	835
<i>Adam Zanker</i>	
Flow Rates	836
<i>Adam Zanker</i>	
Friction Losses, Contraction or Expansion	839
<i>Adam Zanker</i>	
Friction Losses, Fittings	844
<i>John D. Constance</i>	
Friction Losses, Incompressible and Compressible Flow	848
<i>Ralph A. Crozier</i>	

7 Pipeline Shortcut Methods (Cont.)	
Friction Losses, Nonstandard Ducts	854
<i>John D. Constance</i>	
Friction Losses, Straight Pipes	859
<i>Adam Zanker</i>	
Gas Flow	862
<i>Adam Zanker</i>	
Looped Lines	865
<i>John J. McKetta</i>	
Parallel Lines	867
<i>Adam Zanker</i>	
Parallel Lines, Computer Method	870
<i>Leigh A. Smith and Edwin P. Russo</i>	
Pressure Drop Calculations	873
<i>Michael L. Bradford</i>	
Relative Capacities of Pipes	880
<i>Adam Zanker</i>	
Sizing for Steam Traps	883
<i>Michael V. Calogero and Arthur W. Brooks</i>	
Steel Pipe Properties	886
<i>Adam Zanker</i>	
Two-Phase Flow	890
<i>C. E. Yamashiro, L. G. Sala Espiell, and I. H. Farina</i>	
Weight of Piping	894
<i>Adam Zanker</i>	
8 Pipeline Operation and Maintenance	
Friction Reduction	897
<i>C. B. Lester</i>	
Cleaning	933
<i>Peter Kipin</i>	
Coatings	943
<i>Peter Kipin</i>	
Wear	948
<i>David Mills</i>	
Repairing, In-Service	956
<i>Paul Rietjens</i>	
Service Problems	968
<i>John F. Kiefner and Robert J. Eiber</i>	
Freezing, Prevention of by Bleeding	990
<i>John D. Constance</i>	
Leak Detection	991
<i>Thomas C. Lippitt</i>	
Leak Detection Using SCADA Information	1002
<i>W. R. Wade and H. H. Rachford, Jr.</i>	
9 Pipeline Failure	
Pipeline Failure	1024
<i>Robert J. Eiber, Dana J. Jones, and Gregory S. Kramer</i>	

9 Pipeline Failure (Cont.)	
Outside-Force Damage	1031
<i>Willard A. Maxey</i>	
Subsidence Strains	1060
<i>John F. Kiefner</i>	
Rupture	1079
<i>T. N. Baker, G. G. Rochfort, and R. N. Parkins</i>	
Replacement Projects, Risk Analysis	1105
<i>C. E. Myrick, H. J. Van Dyke, and G. R. Mayer</i>	
10 Pipeline Economics and Costs	
Pipeline Economics and Costs	1115
<i>Warren R. True</i>	
Construction, Worldwide	1167
<i>Edited by John J. McKetta</i>	
Index	1185
