Preface	xv
Chapter 1 Transient Engine Startup and Shutdown Processes	1
<i>By Wai K. Cheng</i>	
1.1 Introduction	1
1.2 The Engine Shutdown Process for Port Fuel Injected Engines....	2
1.2.1 General Behavior During the Shutdown Process	2
1.2.2 Impact of the Shutdown Process on Hydrocarbon Emissions.....	4
1.3 The Engine Startup Process for Port Fuel Injected Engines.....	5
1.3.1 Initial Conditions for Engine Startup	5
1.3.2 General Behavior During the Startup Process.....	6
1.3.3 Mixture Preparation in the Startup Transient	10
1.3.4 Combustion in the Startup Transient	20
1.3.5 Hydrocarbon Emissions in the Startup Transient	20
1.4 The Engine Startup Process for Direct Injection Spark Ignition Engines	22
1.5 Summary	25
1.6 References	26
Chapter 2 Mixture Formation Processes	31
<i>By Ron Matthews and Matt Hall</i>	
2.1 Introduction	31
2.2 Liquid Fuel as a Source of Hydrocarbon Emissions	32
2.3 Fuel Injection Hardware and Controls	44
2.3.1 Injector Types	44

2.3.2	Injection Timing	47
2.3.3	Other Injection Parameters	51
2.4	Flow Field Effects	56
2.5	Strategies to Improve Fuel Preparation and Reduce Liquid Fuel Effects During Cold Start and Warm-Up	60
2.6	Summary	64
2.7	References	69

Chapter 3 Cold-Start Hydrocarbon Emissions Mechanisms 79
By James A. Eng

3.1	Introduction	79
3.2	Global Engine Behavior During a Cold Start.....	80
3.2.1	Required Fueling Levels.....	83
3.2.2	Fuel Accounting.....	84
3.3	Hydrocarbon Storage Mechanisms	86
3.3.1	Storage in Crevices	88
3.3.2	Absorption in Oil Layers and Deposits	90
3.3.3	Liquid Fuel	92
3.3.4	Quench Layers.....	96
3.3.5	Partial Burns	98
3.3.6	Rich Air/Fuel Operation	100
3.4	Hydrocarbon Transport Mechanisms	100
3.4.1	Transport Mechanisms at Warm Conditions	101
3.4.2	Transport Mechanisms at Cold Conditions	103
3.5	Hydrocarbon Oxidation.....	104
3.5.1	Hydrocarbon Oxidation Mechanisms.....	105
3.5.2	Hydrocarbon Consumption Rates.....	106
3.5.3	Post-Flame Hydrocarbon Consumption in Engines ...	109
3.6	Summary	112
3.7	References	114

Chapter 4	Characterization of Cold Engine Processes	121
	<i>By Choongsik Bae</i>	
4.1	Introduction	121
4.2	Fuel Injection Characteristics and Fuel Delivery into the Engine Cylinder.....	122
4.2.1	Fuel Sprays	122
4.2.2	Wall Wetting	127
4.2.3	Fuel Delivery into the Engine Cylinder.....	130
4.3	Mixture Distribution and Its Interaction with Flow	134
4.4	Combustion Processes and Pollutant Formation.....	142
4.5	Summary	145
4.6	References	146
 Chapter 5	 Spark Retardation for Improving Catalyst Light-Off Performance	 157
	<i>By Stephen Russ</i>	
5.1	Introduction	157
5.2	Calibration Actions for Improving Catalyst Light-Off.....	157
5.3	Engine Operation with Retarded Ignition	160
5.4	Approaches for More Robust Operation with Ignition Retard	163
5.4.1	Enhanced Charge Motion	163
5.4.2	Dual Spark Ignition	167
5.5	Summary	168
5.6	References	169
 Chapter 6	 Secondary Air Injection for Improving Catalyst Light-Off Performance.....	 173
	<i>By Fuquan (Frank) Zhao and Mark Borland</i>	
6.1	Introduction	173
6.2	Principle and System Layout of Secondary Air Injection	174

6.3	Thermal Oxidation Versus Catalytic Oxidation	178
6.4	Role of Temperature and Mixing in Enhancing the Thermal Oxidation Process.....	181
6.5	Requirements for Engine Enrichment and Secondary Air Injection Quantity	191
6.6	Secondary Air Injection Control and Onboard Diagnostics.....	193
6.6.1	Open-Loop Control	194
6.6.2	Closed-Loop Control	194
6.6.3	Sensors for Feedback Control	196
6.7	Other Application Considerations for Secondary Air Injection.....	197
6.7.1	Application of Secondary Air Injection to Vee Engines	197
6.7.2	Application of Secondary Air Injection to Turbocharged Engines	198
6.7.3	Other Application Issues.....	199
6.8	Summary	200
6.9	References	201

Chapter 7	Effects of Fuel Properties and Fuel Reforming on Cold-Start Hydrocarbon Emissions and Catalyst Light-Off.....	205
	<i>By James A. Eng</i>	

7.1	Introduction	205
7.2	Gasoline Properties	207
7.2.1	Composition	207
7.2.2	Volatility	208
7.2.3	Driveability.....	211
7.2.4	Reformulated Gasoline.....	214
7.3	Fuel Effects on Hydrocarbon Emissions.....	215
7.4	Onboard Fuel Reformers.....	220
7.4.1	Steam Reforming.....	222

7.4.2	Partial Oxidation Reforming	223
7.4.3	Autothermal Reforming.....	225
7.4.4	Cold-Start Performance Improvements.....	226
7.4.5	Improved Catalyst Light-Off.....	227
7.4.6	Cold-Starting Alcohol-Fueled Vehicles	228
7.5	Onboard Fuel Distillation.....	229
7.6	Summary	233
7.7	References	234
Chapter 8	Advanced Catalyst Design.....	241
	<i>By Paul J. Andersen, Todd H. Ballinger, and David S. Laftyatis</i>	
8.1	Introduction	241
8.2	Advanced Three-Way Catalyst Concepts and Design.....	247
8.3	Catalyst System Design Principles for Meeting Partial Zero Emissions Vehicle Emissions Standards.....	255
8.4	Summary	263
8.5	References	264
Chapter 9	The Hydrocarbon Trap.....	269
	<i>By Kimiyoshi Nishizawa</i>	
9.1	Introduction	269
9.2	Functions of the Hydrocarbon Trap	269
9.2.1	Hydrocarbon Trap System	269
9.2.2	Materials	270
9.3	Factors to Control Efficiency	272
9.3.1	Selecting and Developing Trapping Material.....	273
9.3.2	Selecting and Developing the Catalyst Coating	275
9.3.3	Selecting the Shape of the Catalyst Substrate	276
9.4	Measures for Improving System Efficiency.....	277

9.4.1	Actively Controlled Systems	277
9.4.2	Improved Passive Systems	279
9.5	Summary	281
9.6	References	281
Chapter 10	Three-Way Catalytic Converter System Modeling	283
	<i>By Tariq Shamim</i>	
10.1	Introduction	283
10.2	Modeling Approaches	284
10.2.1	Single-Channel-Based One-Dimensional Modeling ..	284
10.2.2	Multidimensional Modeling	286
10.3	Chemical Reaction Mechanisms	289
10.3.1	Three-Step Chemical Reaction Mechanism	290
10.3.2	Four-Step Chemical Reaction Mechanism	291
10.3.3	Modified Four-Step Chemical Reaction Mechanism	292
10.3.4	Five-Step Chemical Reaction Mechanism	292
10.3.5	Six-Step Chemical Reaction Mechanism	294
10.3.6	Thirteen-Step Chemical Reaction Mechanism	296
10.3.7	Multistep Chemical Reaction Mechanism with Elementary Reaction.....	297
10.3.8	Influence of Catalyst Deactivation on Reaction Mechanism	298
10.4	Oxygen Storage Mechanism	299
10.4.1	Simple Single-Step Oxygen Storage Capacity Mechanism	299
10.4.2	Detailed Nine-Step Oxygen Storage Capacity Mechanism	301
10.5	Heat and Mass Transfer Phenomena	302
10.6	Inlet Flow Distribution	304
10.6.1	Flow Distribution Index	308
10.6.2	Improvement of Flow Uniformity	309

10.7	Modeling of Catalyst Dynamic Behavior.....	309
10.8	Summary	313
10.9	Mathematical Nomenclature	317
10.10	References	320
10.11	Appendix	328
Chapter 11	Evaporative Emissions Reduction	333
	<i>By Jenny Spravsow and Christopher Hadre</i>	
11.1	Introduction	333
11.1.1	Overview of Evaporative Emissions Standards.....	333
11.1.2	Types of Evaporative Emissions.....	334
11.1.3	Evaporative Emissions Test Procedures	334
11.2	Types of Evaporative Emissions Control Systems.....	336
11.3	Reducing Evaporative Emissions.....	337
11.3.1	Seals.....	339
11.3.2	Connectors	340
11.3.3	Materials	340
11.3.4	Canister and Engine Control Technology.....	342
11.4	Summary	345
11.5	References	345
Chapter 12	Onboard Diagnostics.....	347
	<i>By Glenn Zimlich, Kathleen Grant, and Timothy Gernant</i>	
12.1	Introduction	347
12.1.1	Emissions Failure Thresholds for Diagnostic Monitors	348
12.1.2	Proper Identification of Diagnostic Failures.....	350
12.2	Catalyst System Monitor.....	351
12.2.1	Theory, Application, and Regulatory Implications.....	351
12.2.2	Catalyst Monitor Operation.....	353
12.3	Comprehensive Component Monitor	354

12.4	Cold-Start Emissions Reduction Control Strategy Monitor.....	354
12.5	Engine Misfire Monitor.....	355
12.5.1	Theory, Application, and Regulatory Implications.....	355
12.5.2	Misfire Monitor Operation	356
12.6	Evaporative System Monitor.....	356
12.6.1	Theory, Application, and Regulatory Implications.....	356
12.6.2	Initial Vacuum Decay-Based Method for Leak Detection.....	356
12.6.3	Positive Pressure Decay Leak Detection	358
12.6.4	Natural Vacuum-Based Leak Detection	358
12.7	Exhaust Gas Recirculation System Monitor	360
12.8	Fuel System Monitor	360
12.8.1	Theory, Application, and Regulatory Implications.....	360
12.8.2	Fuel System Monitor Operation	361
12.9	Oxygen Sensor Monitor	363
12.9.1	Theory, Application, and Regulatory Implications.....	363
12.9.2	Oxygen Sensor Monitor Operation	363
12.10	Secondary Air System Monitor.....	364
12.11	Variable Valve Timing/Control System Monitor.....	364
12.12	In-Use Performance Tracking	365
12.13	Summary	366
12.14	References	367
Chapter 13	Emissions Measurements.....	369
	<i>By Michael Akard</i>	
13.1	Introduction	369
13.2	Exhaust Emissions.....	370
13.3	Constant Volume Sampler	372
13.3.1	Dilution Air.....	372
13.3.2	Exhaust Dilution	375
13.3.3	Dilution Ratio Optimization	376

13.3.4	Bag Sampling	376
13.3.5	Bag Materials.....	379
13.3.6	Flow Rate Measurement and Control.....	382
13.3.7	Sample Transfer from Bags to Analyzers.....	383
13.4	Bag Mini-Diluter.....	384
13.4.1	Bag Mini-Diluter Dilution Gas.....	389
13.4.2	Oxygen Interference	394
13.4.3	Modeled Performance for Sampling Systems	396
13.4.4	Differences Among Bag Mini-Diluters	396
13.4.5	System Verification.....	397
13.5	Analyzer Accuracy	398
13.5.1	Calibration Gas Requirements.....	399
13.5.2	Utilities and System Components	400
13.6	Summary	401
13.7	References	402

Chapter 14 Near-Zero-Emission Gasoline-Powered Vehicle Systems

By Fuquan (Frank) Zhao

14.1	Introduction	407
14.2	System Requirements for a Near-Zero-Emissions Gasoline-Powered Vehicle	408
14.3	BMW Partial Zero Emissions Vehicle System.....	410
14.4	Ford Partial Zero Emissions Vehicle System	411
14.5	Honda Ultra-Clean Gasoline-Powered Vehicle System	413
14.6	Nissan Partial Zero Emissions Vehicle System.....	416
14.7	Toyota Partial Zero Emissions Vehicle System.....	424
14.8	Toyota Ultra-Clean Hybrid Vehicle System.....	428
14.9	Summary	432
14.10	References	432
