

Annex B (informative) Guidance on design current values for cathodic protection of hulls of ships	29
B.1 Typical design current densities for the cathodic protection of bare steel (J_b)	29
B.2 Coating breakdown of conventional paint systems (f_c)	29
B.3 Typical current densities for global approach of the cathodic protection of coated ships (J_g)	30
Annex C (informative) Anode resistance, current and life duration formulae	31
C.1 Anode resistance formulae	31
C.2 Calculation of the anode resistance at the end of life	32
C.3 Electrolyte resistivity	33
C.4 Galvanic anode current output	35
C.5 Anode life	35
C.6 Minimum Net Weight Requirement	35
Annex D (informative) Electrical bonding systems	37
Annex E (informative) Monitoring of electrical bonding of a ship's propeller	39
Annex F (informative) Impressed current system for ships based on an aft (stern) system only	40
Annex G (informative) Location of galvanic anodes in the stern area	41
Annex H (informative) Electrochemical characteristics of impressed current anodes	42
Annex I (informative) Cofferdam arrangements	43
Annex J (informative) Cathodic protection of a moored ship using suspended galvanic anodes	45
Bibliography	46

Foreword.....4

Introduction5

1 Scope6

1.1 General.....6

1.2 Structures6

1.3 Materials6

1.4 Environment.....6

2 Normative references6

3 Terms and definitions7

4 Competence of personnel.....7

5 Design basis.....8

5.1 General.....8

5.2 Cathodic protection criteria.....8

5.3 Design process9

5.4 Design parameters.....10

5.5 Current demand10

5.6 Cathodic protection systems13

5.7 Electrical continuity.....14

5.8 Fitting out period14

6 Impressed current system14

6.1 Objectives.....14

6.2 Design considerations14

6.3 Equipment considerations.....15

7 Galvanic anodes system.....19

7.1 Objectives.....19

7.2 Design considerations19

7.3 Anode materials19

7.4 Factors determining the anode current output and operating life20

7.5 Location of anodes20

8 Commissioning, Operation and Maintenance21

8.1 Objectives.....21

8.2 Measurement Procedures.....21

8.3 Commissioning: Galvanic Systems.....21

8.4 Commissioning: Impressed Current Systems.....22

8.5 Operation and maintenance23

8.6 Dry-docking period24

9 The protection of ships' hulls during fitting out and when laid up25

9.1 Fitting out period25

9.2 Lay up period25

10 Documentation.....25

10.1 Objectives.....25

10.2 Impressed current system.....26

10.3 Galvanic anode systems.....26

Annex A (informative) Impressed current system for hulls of ships based on two cathodic protection zones28
