

CONTENTS

Preface and Acknowledgments	xi
1 Why a Book on Human Factors in Assistive Technology?	1
“Jim”—A Case Example to Begin	1
The Importance of Human Factors	2
Resources in Human Factors	4
Study Questions	6
2 Tools, Transparency, and Assistive Technology	7
Who Are Tool Users?	7
Transparent, Translucent, and Opaque Assistive Technologies	10
Assistive Technology: Special Tools Just for Special People?	13
A Brief History of Assistive Technology	14
Component Areas of Assistive Technology	17
1. <i>Augmentative and Alternative Communication (AAC)</i>	17
2. <i>Adapted Computer Access</i>	18
3. <i>Assistive Listening and Seeing Devices</i>	19
4. <i>Environmental Control</i>	20
5. <i>Adapted Play and Recreation</i>	21
6. <i>Seating and Positioning</i>	21
7. <i>Mobility and Powered Mobility</i>	23
8. <i>Prosthetics</i>	24
9. <i>Rehabilitation Robotics</i>	24
10. <i>Integration of Assistive Technology into Home, School, and Community</i>	24

Who Are the Primary Users of Assistive Technology?	26
The Professionals and Others Who Work with	
Assistive Technology	30
Who Uses Assistive Technology? Case Examples	34
Some Final Comments	37
Study Questions	37
3 What Are Human Factors?	39
Human Factors in Assistive Technology	40
Human Factors in Daily Life	43
A Quick Human Factors Quiz—Some Practical Realities	43
Essential Areas of Human Factors in AT: Details and	
Case Examples	55
A Framework for Understanding Human Factors in AT:	
Baker's Basic Ergonomic Equation	59
Physical Effort	60
Cognitive Effort	61
Linguistic Effort	61
Time	62
Some Final Comments	65
Study Questions	66
4 Human Factors and Assistive Technology Goals	67
Human Factors and Intents of Assistive Technology	69
Details and Applications of Baker's Basic	
Ergonomic Equation	71
Enhancing User Motivation	72
Reducing Physical Effort	75
Reducing Cognitive Effort	77
Reducing Linguistic Effort	78
Reducing Time Load	79
Some Final Comments	85
Study Questions	85
5 Essential Human Factors in Assistive Technology	87
Specific Human Factors in AT	88
Transparency	89
Cosmesis	91
Mappings	93
Affordances	96
Learned or Taught Helplessness	97
Feedback	99
Knowledge of Technology Use within the User or within	
the Device	101
Constraints of AT Use	102

Forcing or Fail-Safe Functions of AT Systems	104
Preventing Mistakes and Errors	105
Some Final Comments	106
Study Questions	107
6 Switches and Controls: The Pass Keys to Assistive Technology	109
Switches and Controls: Definitions and Examples	110
Specific Human Factors Regarding Switches and Controls	113
<i>Sensitivity</i>	114
<i>Selectivity</i>	117
<i>Resolution</i>	120
<i>Contrast</i>	122
<i>Feedback</i>	125
<i>Latching and Variability</i>	126
<i>Positioning and Mounting</i>	127
<i>Composition and Construction</i>	129
<i>Cosmesis</i>	134
<i>Sensory Defensiveness of the User</i>	138
A Brief International Perspective on Switches and Controls	139
Assistive Technology and Fitts' Law	140
<i>Physical Effort</i>	142
<i>Cognitive and Linguistic Effort Factors</i>	148
<i>Time</i>	151
Some Final Comments	154
Study Questions	155
7 CRT, LCD, and LED Screens: The Gateways to Assistive Technology	157
How Screens Work—A Brief Overview	159
Screens in Everyday Life	162
Essential Human Factors Related to Screens	163
<i>Contrast, Brightness, Resolution, Flicker, and Focus</i>	163
<i>Glare and Reflectivity</i>	173
<i>Font Sizes, Types, Contrast, and Labeling</i>	180
Some Final Comments	189
Study Questions	190
8 AT Levels, Technological Literacy, and Life Span Issues	191
Levels of Assistive Technology	191
<i>No-Tech AT Systems</i>	191
<i>Low-Tech AT Systems</i>	192
<i>High-Tech AT Systems</i>	193
Toward Technological Literacy	207

Components of AT Diagnosis and Intervention	213
<i>Assessment</i>	214
<i>Evaluation</i>	214
<i>Diagnosis</i>	214
<i>Intervention</i>	215
Technology Issues Across the Life Span	219
<i>Early Childhood</i>	220
<i>Childhood and Early Teen Years</i>	221
<i>Young Adults and Middle-Aged Adults</i>	222
<i>Older Adults</i>	224
Some Final Comments	228
Study Questions	229
9 Why AT Fails: A Human Factors Perspective	231
Factors Related to the People Who Surround the AT User	234
<i>Evaluation and Communication of Diagnostic Information</i>	234
<i>Support and Training</i>	236
<i>Practicalities of Funding</i>	238
<i>Service Delivery and Scheduling</i>	239
<i>Cultural Factors</i>	242
Factors Related to the AT User	244
<i>Matching Device Features to the User (Not User to Device)</i>	244
<i>Cultural Factors</i>	245
<i>Age</i>	246
<i>Transitions among Settings and Devices</i>	246
<i>Literacy Potential</i>	247
<i>Gender</i>	248
Factors Related to the AT Device Itself	249
<i>Inattention to Essential Human Factors in Design and Acquisition</i>	249
<i>Mechanical and Electrical Safety and Functioning</i>	251
<i>Weight and Size</i>	253
<i>Power Supply</i>	253
<i>Durability and Repairability</i>	255
Some Final Comments: Looking Over the Horizon	255
Study Questions	259
Appendix: Resources for More Information on Human Factors and Assistive Technology	261
Glossary	263
References	270
Index	293
