Preface vii

Acknowledgments ix

Editors xi

Contributors xiii

1. Introduction to Foams 1

NIKHIL GUPTA

1.1. Lightweight Materials 3

1.2. Foams 4

1.3. Syntactic Foams 10

1.4. Outline of the Book 13

1.5. Acknowledgments 14

1.6. References 14

2. Hollow Particles 17

OLIVER M. STRBIK III, P.E.

2.1. Structure 17

2.2. Manufacturing Methods 23

2.3. References 26

3. Synthesis of Metal Matrix Syntactic Foams 29

BENJAMIN F. SCHULTZ and PRADEEP K. ROHATGI

3.1. Solidification Processing of Metal Matrix
 Syntactic Foams 30

3.2. Powder Metallurgy Processing of Metal Matrix Syntactic Foams	50
3.3. Concluding Remarks	53
3.4. Acknowledgements	54
3.5. References	54
4. Aluminum Matrix Syntactic Foams	59
D. P. MONDAL and NIDHI JHA	
4.1. Aluminum Syntactic Foams	59
4.2. Possible Applications	61
4.3. Hollow Particles	62
4.4. Methods of Preparations	69
4.5. Microstructure	77
4.6. Compressive Deformation	79
4.7. Tribological Behavior	98
4.8. Corrosion Behavior	108
4.9. Techno- and Socio-economic Analysis	111
4.10. Conclusions	111
4.11. References	112
5. Magnesium Matrix Syntactic Foams	117
TOMOKO SANO, VINCENT HAMMOND and KYU CHO	
5.1. Introduction	117
5.2. Processing and Microstructure	118
5.3. Concluding Remarks	131
5.4. Reference	132
6. Zinc Matrix Syntactic and Composite Foams	137
A. DAOUD	
6.1. Introduction	137
6.2. Hollow Particles	138
6.3. Zn Matrix Alloys	140
6.4. Processing Methods of Syntactic Foams	141
6.5. Structures of Syntactic Metal Matrix Composite Foams	144
6.6. Properties of Interest to the Syntactic Foam Application Designers	146
6.7. Suggested Applications of Syntactic Metal Matrix Composite Foams	152

6.8. Research Imperatives 155

6.9. References 155

7. Titanium Matrix Syntactic Foams 159

XUE XIAOBING and ZHAO YUYUAN

7.1. Introduction 159

7.2. Manufacture 160

7.3. Structure and Mechanical Properties 163

7.4. Conclusions 195

7.5. References 197

8. Iron Matrix Syntactic Foams 201

DIRK LEHMHUS, JÖRG WEISE and
JOACHIM BAUMEISTER

8.1. Introduction 201

8.2. Production Processes 202

8.3. Pore and Microstructure 221

8.4. Mechanical Properties 227

8.5. Thermal and other Properties 239

8.6. Conclusion, Outlook and Application Potential 241

8.7. References 243

9. Modeling and Simulations 247

DUNG D. LUONG and NIKHIL GUPTA

9.1. Introduction 247

9.2. Density and Porosity 248

9.3. Elastic Properties 251

9.4. Strength 257

9.5. Effect of Strain Rate on Stress-Strain Curves 259

9.6. Finite Element Analysis 261

9.7. Acknowledgments 269

9.8. References 269

10. Modeling Unconstrained Compression of Metal Matrix Syntactic Foams 271

J. B. FERGUSON, JOSEPH A. SANTA MARIA,
BENJAMIN F. SCHULTZ and PRADEEP K. ROHATGI

10.1. Modeling of Metal Matrix Syntactic Foams 275

10.2. Case Study—Modeling the Mechanical Properties of Al-Alloy/ Al_2O_3 Hollow Particle Metal Matrix Syntactic Foams	277
10.3. Concluding Remarks	296
10.4. Acknowledgements	296
10.5. Nomenclature	297
10.6. References	298
11. Weight Saving Potential of Metal Matrix Syntactic Foams	301
NIKHIL GUPTA, DUNG D. LUONG and DINESH PINISETTY	
11.1. Material Selection for Component Design	302
11.2. Relations Between Density and Mechanical Properties	307
11.3. Acknowledgements	323
11.4. References	323
12. Applications of Metal Matrix Syntactic Foams	327
GONZALO A. ROCHA RIVERO, BENJAMIN F. SCHULTZ and PRADEEP K. ROHATGI	
12.1. Ground Transportation	329
12.2. Electronic Packaging	335
12.3. Aerospace	336
12.4. Defense	336
12.5. Biomedical	341
12.6. Building Applications	342
12.7. Summary Remarks	343
12.8. Acknowledgements	343
12.9. References	344
