## **SESSION 1: NOVEL APPLICATIONS**

|           |  |    |
|-----------|--|----|
| C1340/040 | HyBoost – An intelligently electrified optimised downsized gasoline engine concept<br><i>J King, M Heaney, E Bower, N Jackson, N Owen, Ricardo; J Saward, A Fraser, Ford Motor Company; G Morris, P Bloore, Controlled Power Technologies, UK; T Cheng, J Borges-Alejo, M Criddle, Valeo, France</i> | 3  |
| C1340/072 | Turbo-Discharging for improved engine torque and fuel economy<br><i>A M Williams, A T Baker, C P Garner, Loughborough University, UK</i>   | 15 |

## **SESSION 2A: HIGH-BOOST AND TWO-STAGE SYSTEMS**

|           |   |    |
|-----------|---|----|
| C1340/073 | Boost system selection for a heavily downsized spark ignition prototype engine<br><i>C Copeland, University of Bristol; R Martinez-Botas, Imperial College London; J Turner, R Pearson, N Luard, Lotus Engineering; C Carey, S Richardson, Jaguar Cars Limited; P Di Martino, P Chobola, Honeywell Turbo Technologies, UK</i> | 27 |
| C1340/069 | R2S™ – modelling and consequences for the boost control<br><i>O Weber, R Christmann, V Gauckler, R Sauerstein, BorgWarner Turbo Systems Engineering GmbH, Germany</i>   | 43 |
| C1340/031 | Application of two stage turbocharging systems on large engines<br><i>E Codan, T Huber, ABB Turbo Systems Ltd, Switzerland</i>  | 55 |

## **SESSION 2B: TURBINE FATIGUE AND STRUCTURAL**

|           |  |    |
|-----------|--|----|
| C1340/056 | A new approach to thermo mechanical fatigue shown on turbocharger housings<br><i>M Nagode, University of Ljubljana, Slovenia; F Längler, BorgWarner Turbosystems Engineering GmbH; M Hack, LMS Deutschland, Germany</i>  | 73 |
| C1340/010 | On the influence of thermal boundary conditions on the Thermo Mechanical Analysis of turbine housing of a turbocharger<br><i>C Oberste-Brandenburg, M Gugau, F Kruse, BorgWarner Turbo Systems Engineering GmbH, Germany; K Shoghi, BorgWarner Turbo Systems Ltd, UK</i> | 83 |
| C1340/022 | Compressor wheel low cycle fatigue calculations for off highway applications – an approach to accurately calculate application duty cycle<br><i>K Ohri, IPSD Caterpillar; K Shoghi, BorgWarner Turbo Systems Ltd, UK</i>   | 97 |

## **SESSION 3A: COMPRESSOR AERO-DESIGN OPTIMISATION (CFD)**

|           |  |     |
|-----------|--|-----|
| C1340/030 | Variable trim compressor – a new approach to variable compressor geometry<br><i>P Grigoriadis, S Müller, A Benz, M Sens, IAV GmbH, Germany</i>   | 111 |
| C1340/021 | Design optimisation of an impeller with CFD and Meta-Model of optimal Prognosis (MoP)<br><i>F Frese, Voith Turbo Aufladungssysteme; J Einzinger, ANSYS; J Will, Dynardo, Germany</i>   | 121 |
| C1340/074 | Development of advanced centrifugal compressor for turbocharger, applying control of internal unsteady flow structure<br><i>M Ebisu, T Shiraishi, I Tomita, Mitsubishi Heavy Industries, Ltd; M Furukawa, Kyushu University, Japan</i> | 135 |

## **SESSION 3B: ROTORDYNAMICS AND VIBRATIONS**

|           |   |     |
|-----------|---|-----|
| C1340/048 | Shaft coking resolution using multiple variable bearing system design optimization for commercial vehicle turbochargers<br><i>A Bhattacharya, M A Hake, T V Barbarie, Honeywell Turbo Technologies, USA; J-M Geoffroy, Honeywell Turbo Technologies, France</i> | 147 |
| C1340/075 | Advanced rotordynamic simulation of turbochargers using coupled multibody and finite element models<br><i>M Busch, L Esmaeili, D Lu, B Schweizer, University of Kassel; P Koutsovasilis, U Tomm, BorgWarner Turbo Systems Engineering GmbH, Germany</i>         | 159 |
| C1340/011 | Turbocharger blade vibration: Measurement and validation through laser tip-timing<br><i>J M Allport, M L Jupp, Cummins Turbo Technologies; A Pezouvanis, G W Janicki, A I Pierończyk, A J Day, P Olley, B Mason, M K Ebrahimi, University of Bradford, UK</i>   | 173 |

## **SESSION 4A: ADVANCING SIMULATION AND VALIDATION**

|           |   |     |
|-----------|---|-----|
| C1340/018 | On wide mapping of a mixed flow turbine with regard to compressor heat flows during turbocharger testing<br><i>B Lüddecke, D Filsinger, IHI Charging Systems International GmbH; M Bargende, Universität Stuttgart, Germany</i> | 185 |
| C1340/067 | Turbocharger matching methodology for improved exhaust energy recovery<br><i>A Pesiridis, W S-I W Salim, R F Martinez-Botas, Imperial College London, UK</i>  | 203 |
| C1340/038 | Experimental investigation under unsteady flow conditions on turbocharger compressors for automotive gasoline engines<br><i>S Marelli, M Capobianco, University of Genoa, Italy</i>   | 219 |

## **SESSION 4B: TURBINE DEVELOPMENT TRENDS**

|           |   |     |
|-----------|---|-----|
| C1340/051 | Development of a common dual axle VNT™ for single- and two-stage off-highway applications<br><i>J Wilson, M Avila, P Davies, N Theiss, B Zollinger, Honeywell International, Honeywell Turbo Technologies, USA and France</i>                                       | 233 |
| C1340/007 | An experimental assessment of the effects of stator vane clearance location on an automotive turbocharger turbine<br><i>J R Walkingshaw, S W T Spence, D Thornhill, Queen's University Belfast, UK; J Ehrhard, IHI Charging Systems International GmbH, Germany</i> | 243 |
| C1340/055 | Testing turbine expanders for high efficiency diesels<br><i>E Halliwell, Cummins Turbo Technologies, UK</i>   | 257 |

## **SESSION 5: SYSTEMS AND TRANSIENT RESPONSE**

|           |   |     |
|-----------|---|-----|
| C1340/057 | The role of turbocompound in the era of emissions reduction<br><i>R W Kruiswyk, Caterpillar Inc., USA</i>   | 269 |
| C1340/061 | Characterization of a low pressure turbine for turbocompounding applications in a mild-hybrid gasoline engine<br><i>A M I Bin Mamat, A Romagnoli, R F Martinez-Botas, Imperial College London, UK</i> | 281 |
| C1340/019 | The transient response of turbocharger turbines<br><i>H Chen, Honeywell UK Ltd, UK; T Cai, P Li, Honeywell Integrated Technology (China) Ltd, China</i>   | 295 |

## **SESSION 6: COMPRESSOR DEVELOPMENT TRENDS**

|           |   |     |
|-----------|---|-----|
| C1340/063 | Performance of a small-size two-stage centrifugal compressor<br><i>R Numakura, IHI Corporation, Japan</i>   | 307 |
| C1340/024 | Effect of diffuser width and tip clearance on the static pressure distributions in a vaneless diffuser of a high-speed centrifugal compressor<br><i>A Jaatinen, A Grönman, T Turunen-Saaresti, Lappeenranta University of Technology, Finland</i> | 319 |

|           |   |     |
|-----------|---|-----|
| C1340/032 | Experimental and numerical analysis of a classical bleed slot system for a turbocharger compressor<br><i>S Sivagnanasundaram, S Spence, J Early, Queen's University of Belfast; B Nikpour, Cummins Turbo Technologies, UK</i> | 325 |
|-----------|---|-----|

## SESSION 7: NOVEL PRESSURE CHARGING AND HIGH EFFICIENCY SYSTEMS

|           |   |     |
|-----------|---|-----|
| C1340/052 | Dual boost compressor development<br><i>V-M Lei, M Nejedly, V Houst, V Kares, Honeywell Turbo Technologies, UK</i>  | 345 |
| C1340/002 | Electrically driven supercharger using the TurboClaw® compressor for engine downsizing<br><i>K R Pullen, City University London; S Etemad, W Thornton, Dynamic Boosting Systems Limited; J Villegas, AVL Powertrain, UK</i> | 357 |
| C1340/064 | Development of new turbocharger technologies for energy efficiency and low emissions<br><i>Y Ono, K Shiraishi, K Sakamoto, Y Ito, Mitsubishi Heavy Industries, Ltd, Japan</i>   | 365 |

## SESSION 8: TURBINE UNSTEADY FLOW

|           |  |     |
|-----------|--|-----|
| C1340/053 | Experimental investigation on the effect of pulsations on exhaust manifold-related flows aiming at improved efficiency<br><i>A Kalpakti, R Örlü, N Tillmark, P H Alfredsson, Royal Institute of Technology, Sweden</i>   | 377 |
| C1340/068 | A comparison of timescales within a pulsed flow turbocharger turbine<br><i>C D Copeland, University of Bristol; P Newton, R F Martinez-Botas, Imperial College London, UK; M Seiler, ABB Turbo Systems Ltd, Switzerland</i>  | 389 |
| C1340/020 | Experimental analysis of turbocharger interaction with a pulsatile flow through time-resolved flow measurements upstream and downstream of the turbine<br><i>F Laurantzon, R Örlü, A Segalini, N Tillmark, P H Alfredsson, Royal Institute of Technology, Sweden</i> | 405 |

## **ADDITIONAL PAPERS NOT PRESENTED AT THE CONFERENCE**

|           |   |     |
|-----------|---|-----|
| C1340/013 | Reduced model for the radial turbine based on proper orthogonal decomposition<br><i>N Winkler, E Alenius, L Fuchs, KTH – The Royal Institute of Technology, Sweden</i>  | 419 |
| C1340/015 | Unsteady flow-based aeroacoustics analysis in centrifugal compressor<br><i>M Qi, L Cao, Beijing University of Technology; L Hu, J Zhang, National Key Laboratory of Diesel Engine Turbocharging Technology, China</i> | 429 |

## **AUTHOR INDEX**
