Preface	xv
Acknowledgements	xix
CHAPTER 1: RELIABILITY, MAINTENANCE AND LOGISTIC SUPPORT – INTRODUCTION	1
1.1 INTRODUCTION	1
1.2 THE LIFE CYCLE OF A SYSTEM	5
1.3 CONCEPT OF FAILURE	7
1.4 APOLLO 13 – CASE STUDY	9
CHAPTER 2: PROBABILITY THEORY	13
2.1 PROBABILITY TERMS AND DEFINITIONS	13
2.2 ELEMENTARY THEORY OF PROBABILITY	15
2.2.1 Axioms of Probability	15
2.2.2 Rules of Probability	16
2.2.3 Joint Events	17
2.2.4 Conditional Probability	18
2.3. PROBABILITY AND EXPERIMENTAL DATA	19
2.4. PROBABILITY DISTRIBUTION	20
2.5. RANDOM VARIABLE	20
2.5.1 Types of random variables	22
2.6. THE PROBABILITY DISTRIBUTION OF RANDOM VARIABLE	23
2.6.1 Functional Method	24
2.6.2 Parametric Method	28

2.7. DISCRETE THEORETICAL PROBABILITY DISTRIBUTIONS	32
2.7.1 Bernoulli Trials	32
2.7.2 The Binomial Distribution	34
2.7.3 The Poisson Distribution	35
2.8. CONTINUOUS THEORETICAL PROBABILITY DISTRIBUTIONS	38
2.8.1 Exponential Distribution	39
2.8.2 Normal Distribution (Gaussian Distribution)	41
2.8.3 Lognormal Distribution	45
2.8.4 Weibull Distribution	47
CHAPTER 3: RELIABILITY MEASURES	51
3.1. FAILURE FUNCTION	53
3.1.1 Failure function of system under multiple failure Mechanisms	59
3.2. RELIABILITY FUNCTION	61
3.2.1 Reliability function for items under multiple failure Mechanisms	63
3.2.2 Mission Reliability Function	65
3.3. DESPATCH RELIABILITY	67
3.4. HAZARD FUNCTION (HAZARD RATE OR INSTANTANEOUS FAILURE RATE)	67
3.4.1 Cumulative hazard function	71
3.4.2 Cumulative hazard function and the Expected number of failures	72
3.4.3 Typical Forms of Hazard Function	73
3.4.4 Failure rate	75
3.5. MEAN TIME TO FAILURE (MTTF)	76
3.5.1 Mean Residual Life	78
3.5.2 MTTF of a maintained system	81
3.5.3 Variance of Mean Time To Failure	84
3.6. MEAN OPERATING TIME BETWEEN FAILURES (MTBF)	85
3.7. PERCENTILE LIFE (TTF_p OR $B_{p\%}$)	87
3.8. MAINTENANCE FREE OPERATING PERIOD (MFOP)	88
3.8.1 Maintenance Free Operating Period Survivability Prediction	88
3.9. SOFTWARE RELIABILITY CHARACTERISTICS	91
3.9.1 Software Reliability	93
3.9.2 Mean Time To Failure of Software	93
3.9.3 Software failure rate	94
3.9.4 Jelinski-Moranda Model	94
3.9.5 Goel-Okumoto Model	95

CHAPTER 4: SYSTEMS RELIABILITY	97
4.1. RELIABILITY BLOCK DIAGRAM	98
4.2. RELIABILITY MEASURES FOR SERIES CONFIGURATION	98
4.3. LIFE EXCHANGE RATE MATRIX	110
4.4. PARALLEL CONFIGURATION	113
4.5. R-OUT-OF-N SYSTEMS	117
4.6. SERIES AND PARALLEL CONFIGURATION	120
4.7. REDUNDANT SYSTEMS	122
4.8. COMPLEX RELIABILITY BLOCK DIAGRAMS	127
4.9. CUT SET APPROACH FOR RELIABILITY EVALUATION	130
4.10. CASE STUDY ON AIRCRAFT ENGINES	131
4.11. SYSTEMS RELIABILITY EVALUATION - STOCHASTIC MODELS	138
4.12. STOCHASTIC PROCESSES	138
4.13. MARKOV PROCESS	140
4.14. NON-HOMOGENEOUS POISSON PROCESS (NHPP)	144
4.15. RENEWAL PROCESS	149
 CHAPTER 5: MAINTAINABILITY AND MAINTENANCE	 155
5.1. CONCEPT OF MAINTAINABILITY	156
5.2. MEASURES OF MAINTAINABILITY	159
5.2.1 Maintenance Elapsed-Time	159
5.2.2 Maintenance Man Hour (MMH)	163
5.2.3 Maintenance Frequency Factors	165
5.2.4 Maintenance cost factors	166
5.3. MAINTAINABILITY DEMONSTRATION	167
5.4. MAINTENANCE	170
5.5. MAINTENANCE CONCEPT	171
5.6. LEVELS OF MAINTENANCE	172
5.6.1 User level (organisational)	172
5.6.2 Intermediate level	173
5.6.3 Depot level	173
5.6.4 Hole-in-the-Wall	173
5.7. MAINTENANCE TASK CLASSIFICATION	174
5.7.1 Corrective Maintenance Task	175
5.7.2 Preventive Maintenance Task	176
5.7.3 Conditional (Predictive) Maintenance Task	177
5.8. MAINTENANCE POLICIES	178
5.8.1 Failure-Based Maintenance Policy	179
5.8.2 Time-Based Maintenance Policy	180
5.8.3 Condition Based Maintenance (Predictive Maintenance)	183
5.9. MAINTENANCE RESOURCES	194
5.10. MAINTENANCE INDUCED FAILURES	195

5.11. MAINTENANCE COST	197
5.11.1 Cost of Maintenance Task	197
5.11.2 Direct cost of maintenance task	198
5.11.3 Indirect cost of maintenance task	198
5.11.4 Total cost of maintenance task	199
5.11.5 Factor Affecting Maintenance Costs	200
5.12. AIRCRAFT MAINTENANCE - CASE STUDY	201
 CHAPTER 6: MAINTENANCE OPTIMISATION	 205
6.1 PREVENTIVE MAINTENANCE AND RELIABILITY	206
6.2 OPTIMAL REPLACEMENT TIMES	208
6.2.1 Optimal Replacement Under Minimal Repair	210
6.3 REPAIR VS REPLACEMENT	211
6.4 RELIABILITY CENTRED MAINTENANCE	215
6.4.1 RCM Process	218
6.4.2 RCM Decision Logic Process	224
6.4.3 Potential Failure and P-F Curve	234
6.5 AGE RELATED MAINTENANCE	235
6.5.1 Age related maintenance - Case Study on Aircraft Engine	240
6.6 TOTAL PRODUCTIVE MAINTENANCE	243
6.7 COMPUTERISED MAINTENANCE MANAGEMENT SYSTEM	246
 CHAPTER 7: SUPPORTABILITY AND LOGISTICS	 249
7.1 SUPPORTABILITY – TERMS AND DEFINITIONS	251
7.1.1 Supportability	251
7.1.2 Supportability Engineering	252
7.1.3 Logistic Delay Time (LDT) or Time to Support (TTS)	253
7.1.4 Support Resources	253
7.1.5 Arising	256
7.2 SUPPORTABILITY MEASURES	257
7.3 RECONDITION	260
7.4 OBSOLESCENCE	261
7.5 LEVEL OF REPAIR ANALYSIS	262
7.6 TESTABILITY, INSPECTION AND DIAGNOSTICS	264
7.6.1 Built in Test (BIT)	265
7.6.2 Built-in-Test-Equipment (BITE)	268
7.6.3 Health and Usage Monitoring Systems (HUMS)	268
7.7 NO FAULT FOUND (NFF)	270
7.8 COMMERCIAL OFF THE SHELF (COTS) AND SUPPORTABILITY	272
7.9 CONTINUOUS ACQUISITION AND LIFE CYCLE SUPPORT (CALs)	272
7.10 CASE STUDY: SUPPORTABILITY AND LOGISTICS AT BRITISH AIRWAYS	273

CHAPTER 8: SPARE PARTS PROVISIONING AND MANAGEMENT	281
8.1 BASIC CONCEPTS AND DEFINITIONS	283
8.2 MODELLING DEMAND RATE	286
8.3 MATHEMATICAL MODELS FOR DEMAND PREDICTION	287
8.3.1 Homogeneous Poisson Process Models for Forecasting Spares	287
8.3.2 Renewal Process Models for forecasting Spares	297
8.4 DEMAND FOR SPARES – CONSTANT VS INCREASING FAILURE RATE	300
8.5 FORECASTING MODELS FOR CONSUMABLE (DISCARDABLE) SPARE PARTS	301
8.6 MODELS FOR REPAIRABLE SPARE PARTS	303
8.6.1 Birth and Death Process Model for Repairable Spare Parts	303
8.6.2 Palm's Theorem and its Application in Spares provisioning for repairable items	308
8.7 MULTI-INDENTURE SPARE MODEL	312
8.8 MULTI-ECHELON SPARE MODELS	314
8.9 SPARES PROVISIONING UNDER SPECIAL CONTRACTUAL REQUIREMENTS	317
8.10 INVENTORY MANAGEMENT	319
8.10.1 Economic Order Quantity	320
8.11 OPTIMISATION METHODS	323
8.11.1 Zero-one non-linear integer programming Model	324
8.11.2 Marginal Analysis	325
8.12 SIMULATION	327
8.12.1 Monte Carlo Simulation	328
8.12.2 Discrete Event Simulation	333
8.13 USE OF SIMULATION MODELS IN SPARES PROVISIONING	336
8.14 OPTIMISATION USING SIMULATION	340
 CHAPTER 9: INTEGRATED LOGISTIC SUPPORT	 345
9.1 HISTORY OF ILS	346
9.1.1 The concept of ILS	349
9.1.2 The Case Study of Airline Costs	349
9.1.3 Case Study on Air Force's Cost	351
9.2. RELIABILITY PLANS	354
9.2.1 Reliability Demonstrations	356
9.2.2 Case Study of a Turbine Disc	357
9.2.3 Reliability testing	359
9.3. WHOLE LIFE COST	363
9.4. MAINTENANCE PLANNING	364
9.4.1 Repair or Replace	364

9.5. TECHNICAL PUBLICATIONS	366
9.6. SOFTWARE CONFIGURATION CONTROL	367
9.7. PACKAGING, HANDLING, STORAGE AND TRANSPORTATION (PHS&T)	367
9.8. SUPPORT AND TEST EQUIPMENT	369
9.9. SOFTWARE TESTING	370
9.10. TRAINING AND TRAINING EQUIPMENT	372
9.11. LOGISTIC SUPPORT ANALYSIS (LSA)	375
CHAPTER 10: AVAILABILITY	377
10.1 POINT AVAILABILITY	378
10.1.1 Average Availability	381
10.1.2 Inherent Availability	381
10.1.3 System Availability of different reliability block diagrams	383
10.2. ACHIEVED AVAILABILITY	385
10.3. OPERATIONAL AVAILABILITY	387
CHAPTER 11: DESIGN FOR RELIABILITY, MAINTINABILITY AND SUPPORTABILITY	389
11.1. RELIABILITY ALLOCATION	389
11.1.1 AGREE Method for Reliability Allocation	391
11.1.2 Equal Apportionment Technique	393
11.1.3 The ARINC Apportionment Technique	394
11.2. MAINTAINABILITY ALLOCATION	396
11.3. SUPPORTABILITY ALLOCATION	398
11.4. FAILURE MODES, EFFECTS AND CRITICALITY ANALYSIS	399
11.4.1 Procedural steps in the FMECA analysis	400
11.4.2 Risk Priority Number	402
11.5. FAULT TREE ANALYSIS	404
11.6. FAULT TREE ANALYSIS CASE STUDY – PASSENGER ELEVATOR	406
11.7. FAULT TOLERANT SOFTWARE	411
11.7.1 Recovery Blocks	411
11.7.2 N-Version Programming	413
11.8. LIFE CYCLE COSTING	414
11.8.1 Components of Life Cycle Costing	415
11.8.2 Life Cycle Costing Procedures	417
11.8.3 Factors affecting LCC appraisal	418

CHAPTER 12: ANALYSIS OF RELIABILITY, MAINTENANCE AND SUPPORTABILITY DATA	423
12.1. RELIABILITY, MAINTENANCE AND SUPPORTABILITY DATA	425
12.2. ESTIMATION OF PARAMETERS - EMPIRICAL APPROACH	426
12.2.1 Estimation of Performance Measures - Complete Ungrouped Data	426
12.2.2 Confidence Interval	428
12.2.2 Analysis of Grouped Data	433
12.3. ANALYSIS OF CENSORED DATA	436
12.4. FITTING PROBABILITY DISTRIBUTIONS GRAPHICALLY	437
12.4.1 Fitting an exponential distribution to data graphically	440
12.4.2 Fitting a Normal Distribution Graphically	441
12.4.3 Fitting a Log-Normal Distribution Graphically	442
12.4.4 Fitting a Weibull Distribution Graphically	444
12.5. REGRESSION	446
12.5.1 Correlation Co-efficient	448
12.5.2 Linear Regression for Exponential Distribution	449
12.5.3 Linear Regression for Weibull Distribution	451
12.5.4 Linear regression for Normal Distribution	452
12.5.5 Linear Regression for Log-normal Distribution	454
12.6. MAXIMUM LIKELIHOOD ESTIMATION	454
12.6.1 Complete and Uncensored Data	455
12.6.2 Interval Data	469
Appendix	473
