

TABLE OF CONTENTS

Chapter - 1	State Variable Analysis and Design	(1 - 1) to (1 - 16)
1.1	Background	1 - 2
1.1.1	Limitations of Conventional Approach.	1 - 2
1.1.2	Advantages of State Variable Analysis	1 - 2
1.2	Concept of State	1 - 3
1.2.1	Important Definitions	1 - 5
1.3	State Model of Linear Systems	1 - 6
1.3.1	State Model of Single Input Single Output System	1 - 10
1.4	State Diagram Representation	1 - 10
1.4.1	State Diagram of Standard State Model	1 - 11
1.5	Non Uniqueness of State Model	1 - 12
1.6	Linearization of State Equation.....	1 - 13
Chapter - 2	State Space Representation	(2 - 1) to (2 - 82)
2.1	State Variable Representation using Physical Variables.....	2 - 2
2.1.1	Advantages	2 - 5
2.2	State Space Representation using Phase Variables	2 - 5
2.2.1	State Model from Differential Equation	2 - 5
2.2.2	State Model from Transfer Function	2 - 9
2.2.3	Advantages	2 - 19
2.2.4	Limitations.....	2 - 19
2.3	State Space Representation using Canonical Variables.....	2 - 20
2.3.1	Jordan's Canonical Form	2 - 23

2.3.2 Advantages of Canonical Variables	2 - 27
2.3.3 Disadvantages of Canonical Variables.	2 - 27
2.4 State Model by Cascade Programming.....	2 - 30
Examples with Solutions.....	2 - 32
Review Questions	2 - 79
University Questions	2 - 82

Chapter - 3 Matrix Algebra and Derivation of Transfer Function **(3 - 1) to (3 - 48)**

3.1 Background.....	3 - 2
3.2 Definition of Matrix	3 - 2
3.2.1 Types of Matrices	3 - 3
3.2.2 Important Terminologies	3 - 4
3.3 Elementary Matrix Operations	3 - 6
3.4 Inverse of a Matrix.....	3 - 8
3.4.1 Properties of Inverse of a Matrix.	3 - 8
3.5 Derivation of Transfer Function from State Model	3 - 9
3.5.1 Characteristic Equation	3 - 11
3.5.2 MIMO System	3 - 12
3.6 Eigen Values.....	3 - 13
3.7 Eigen Vectors	3 - 14
3.8 Modal Matrix M	3 - 14
3.8.1 Vander Monde Matrix	3 - 15
3.9 Diagonalisation	3 - 19
3.10 Generalised Eigen Vectors.....	3 - 23
3.10.1 Vander Monde Matrix for Generalised Eigen Vectors.	3 - 24
Examples with Solutions.....	3 - 25
Review Questions	3 - 47
University Questions	3 - 48

4.1 Background	4 - 2
4.1.1 Homogeneous Equation	4 - 2
4.1.2 Nonhomogeneous Equation	4 - 2
4.2 Review of Classical Method of Solution.....	4 - 3
4.2.1 Zero Input Response	4 - 4
4.3 Solution of Nonhomogeneous Equation.....	4 - 4
4.4 Properties of State Transition Matrix	4 - 6
4.5 Solution of State Equation by Laplace Transform Method.....	4 - 7
4.6 Computation of State Transition Matrix.....	4 - 8
4.7 Laplace Transform Method.....	4 - 8
4.8 Power Series Method	4 - 10
4.9 Cayley Hamilton Method	4 - 11
4.9.1 Procedure to Calculate e^{At}	4 - 12
4.10 Similarity Transformation Method	4 - 16
4.11 Controllability and Observability	4 - 23
4.12 Controllability	4 - 23
4.12.1 Kalman's Test for Controllability	4 - 24
4.12.2 Condition for State Controllability in s-Plane	4 - 27
4.12.3 Gilbert's Test for Controllability	4 - 27
4.12.4 Output Controllability	4 - 30
4.13 Observability.....	4 - 30
4.13.1 Kalman's Test for Observability	4 - 31
4.13.2 Condition for Complete Observability in s-Plane	4 - 34
4.13.3 Gilbert's Test for Observability	4 - 34
Examples with Solutions.....	4 - 36
Review Questions	4 - 91
University Questions	4 - 94

Chapter - 5 Pole Placement Technique **(5 - 1) to (5 - 78)**

5.1 Introduction	5 - 2
5.2 Pole Placement Design	5 - 2
5.3 Necessary and Sufficient Condition for Arbitrary Pole Placement	5 - 11
5.4 Evaluation of State Feedback Gain Matrix K	5 - 26
5.4.1 Use of Transformation Matrix T	5 - 26
5.4.2 Direct Substitution Method	5 - 27
5.4.3 Ackermann's Formula.	5 - 27
5.5 Selection of Location of Desired Closed Loop Poles	5 - 30
5.6 State Observers.....	5 - 35
5.7 Concept of State Observer.....	5 - 36
5.8 Dual Problem	5 - 38
5.9 Necessary and Sufficient Condition for State Observation.....	5 - 39
5.10 Evaluation of State Observer Gain Matrix K_e	5 - 39
5.11 Selection of Suitable Value of Observer Gain Matrix K_e	5 - 42
5.12 Reduced Order State Observers	5 - 47
5.13 Observer Based Controller.....	5 - 49
Review Questions	5 - 74
University Questions	5 - 76

Chapter - 6 Controllers **(6 - 1) to (6 - 50)**

6.1 Background	6 - 2
6.2 Properties of Controller	6 - 2
6.2.1 Error	6 - 3
6.2.2 Variable Range	6 - 3
6.2.3 Controller Output Range	6 - 4
6.2.4 Control Lag	6 - 4
6.2.5 Dead Zone	6 - 4

6.3 Classification of Controllers	6 - 5
6.4 Continuous Controller Modes.....	6 - 5
6.5 Proportional Control Mode	6 - 6
6.5.1 Characteristic of Proportional Mode.	6 - 7
6.5.2 Offset	6 - 7
6.5.3 Applications.	6 - 8
6.6 Integral Control Mode	6 - 8
6.6.1 Step Response of Integral Mode	6 - 10
6.6.2 Characteristics of Integral Mode	6 - 10
6.6.3 Applications.	6 - 11
6.7 Derivative Control Mode	6 - 11
6.7.1 Characteristics of Derivative Control Mode	6 - 12
6.7.2 Applications.	6 - 13
6.8 Composite Control Modes	6 - 13
6.9 Proportional + Integral Mode (PI Control Mode)	6 - 13
6.9.1 Characteristics of PI Mode	6 - 15
6.9.2 Applications.	6 - 16
6.10 Proportional + Derivative Mode (PD Control Mode)	6 - 16
6.10.1 Characteristics of PD Mode	6 - 17
6.10.2 Applications.	6 - 18
6.11 Three Mode Controller (PID Control Mode)	6 - 18
6.12 Response of Controllers to Various Inputs	6 - 22
6.13 Effect of Composite Controllers on 2 nd Order System	6 - 23
6.14 PD Type of Controller.....	6 - 24
6.15 PI Type of Controller	6 - 25
6.16 PID Type of Controller.....	6 - 27
6.17 Rate Feedback Controller (Output Derivative Controller)	6 - 27
6.18 Review of Second Order System Specifications.....	6 - 29

6.19 Steady State Error	6 - 31
Examples with Solutions	6 - 32
Review Questions	6 - 49
Chapter - 7 Nonlinear Systems	(7 - 1) to (7 - 10)
7.1 Introduction to Nonlinear Systems.....	7 - 2
7.2 Properties of Nonlinear Systems	7 - 2
7.3 Classification of Nonlinearities	7 - 3
7.4 Inherent Nonlinearities.....	7 - 3
7.4.1 Saturation	7 - 3
7.4.2 Deadzone	7 - 4
7.4.3 On-Off Nonlinearity	7 - 4
7.4.4 On-Off Nonlinearity with Hysteresis	7 - 4
7.4.5 Nonlinear Friction	7 - 5
7.4.6 Backlash	7 - 6
7.4.7 Nonlinear Spring	7 - 6
7.5 Absolute Value Nonlinearity	7 - 7
7.6 Intentional Nonlinearities	7 - 8
Review Questions	7 - 8
University Questions	7 - 8
Chapter - 8 Phase Plane Method	(8 - 1) to (8 - 54)
8.1 Introduction	8 - 2
8.2 Limit Cycle.....	8 - 2
8.3 Jump Resonance	8 - 2
8.4 The Phase Plane Method	8 - 4
8.5 Basic Concept of Phase-Plane Method	8 - 6
8.6 Isocline Method for Construction of Phase Trajectory	8 - 8

8.7 Application of Phase-Plane Method to Linear Control System	8 - 12
8.8 Second Order Nonlinear System on Phase Plane	8 - 14
8.9 Different Types of Phase Portraits.....	8 - 15
8.9.1 Phase Portraits for Type 0 System.	8 - 16
8.9.1.1 Stable System with Complex Roots	8 - 16
8.9.1.2 Unstable System with Complex Roots	8 - 17
8.9.1.3 Marginally Stable System with Complex Roots	8 - 18
8.9.1.4 Stable System with Real Roots	8 - 18
8.9.1.5 Unstable System with Positive Real Roots	8 - 19
8.9.1.6 Unstable System with One Positive and One Negative Real Root.	8 - 20
8.9.2 Forced Second Order Type 0 System	8 - 20
8.9.3 Phase Portraits for Type 1 System.	8 - 21
8.9.4 Phase Portraits for Type 2 System.	8 - 23
8.10 Singular Points of a Nonlinear System.....	8 - 27
8.11 Delta Method.....	8 - 28
Review Questions	8 - 52
University Questions	8 - 52

Chapter - 9	Liapunov's Stability Analysis	(9 - 1) to (9 - 46)
--------------------	--------------------------------------	----------------------------

9.1 Introduction	9 - 2
9.2 Concept of Stability.....	9 - 2
9.3 Stability of Control Systems	9 - 4
9.4 Zero Input and Asymptotic Stability	9 - 9
9.4.1 Remarks about Asymptotic Stability	9 - 10
9.5 Stability in the Sense of Liapunov	9 - 11
9.6 Asymptotic Stability	9 - 12
9.7 Asymptotic Stability in the Large	9 - 12
9.8 Instability	9 - 12

9.9 Graphical Representation	9 - 12
9.10 Some Important Definitions	9 - 13
9.10.1 Positive Definiteness	9 - 13
9.10.2 Negative Definiteness	9 - 13
9.10.3 Positive Semidefiniteness	9 - 14
9.10.4 Negative Semidefinite	9 - 14
9.10.5 Indefiniteness	9 - 14
9.11 Quadratic Form.....	9 - 14
9.12 Hermitian Form.....	9 - 14
9.13 Liapunov's Second Method.....	9 - 15
9.14 Liapunov's Stability Theorem.....	9 - 15
9.15 Stability of Linear and Nonlinear Systems	9 - 19
9.16 Construction of Liapunov's Functions for Nonlinear Systems by Krasovskii's Method	9 - 20
9.17 The Direct Method of Liapunov and the Linear System	9 - 23

Solved Question Papers of VTU	(S - 1) to (S - 50)
July - 2013	(S - 1) to (S - 18)
January - 2014.....	(S - 19) to (S - 21)
July - 2014	(S - 22) to (S - 40)
January - 2015.....	(S - 41) to (S - 50)
