

CONTENTS

Drag and Aeroacoustic Noise Characteristics Generated by Surfaces Featuring Coupled Roughness and Blowing <i>A. L. Laganelli and J. Sontowski</i>	1
Skin Friction and Heat Transfer for Combined Roughness and Mass Addition <i>G. H. Christoph.</i>	9
Analytical Study of Turbulent Heat Transfer to Polymer Solutions in Tubes With Constant Heat Flux <i>H. K. Yoon and A. J. Ghajar</i>	17
Effect of Drag Reducing Additives Upon the Development and Separation of Turbulent Boundary Layer With Adverse Pressure Gradient <i>L. H. Rabie.</i>	23
Numerical Investigations Into the Mechanisms of Microbubble Drag Reduction <i>N. K. Madavan, C. L. Merkle, and S. Deutsch</i>	31
Parametric Studies of Flat Plate, Turbulence Manipulators Including Direct Drag Results and Laser Flow Visualisation <i>J. C. Mumford and A. M. Savill</i>	41
The Effects of Damping on the Hydrodynamic Stability of Flows Over Kramer-Type Compliant Surfaces <i>P. W. Carpenter.</i>	53
Turbulent Flow in a Channel With a Wall With Progressive Waves <i>G. D. Kuhn, P. Moin, J. Kim, and J. Ferziger</i>	61
On the Use of Linearized Boundary Conditions in the Computation of Flow Over Wavy Walls <i>M. D. Kelleher and R. Balasubramanian</i>	73
A Rapid Eigenvalue Finder for Flows Over a Compliant Surface <i>M. Gaster and G. J. K. Willis</i>	79
Mechanical Properties of Compliant Coating Materials <i>D. L. Hunston, C. Yu, and G. W. Bullman</i>	85
Heuristic Comments on Turbulent Flow Over Compliant Viscoelastic Surfaces <i>J. W. Fitzgerald.</i>	91
NASA Research on Viscous Drag Reduction II <i>D. M. Bushnell</i>	93
A Review of Compliant Coating Drag Reduction Research at ONR <i>M. M. Reischman.</i>	99
Foreign Research in Support of Marine Applications of Boundary Layer Control <i>B. R. Blackburn and K. J. Moore</i>	107
Comments and Observations on Turbulent Boundary Layer Noise Reduction <i>H. P. Bakewell, Jr.</i>	113
Comments on Turbulent Flow/Compliant Surface Interaction and the Connection Between Noise and Drag Using Wave Models <i>J. E. Ffowcs-Williams.</i>	121
Comments on Liquid/Solid Surface Slip Effects in Shear Flows <i>E. M. Uram</i>	123
Laminarization Effects on the Dynamics of a Disk Levitated by Incompressible Fluid Flow <i>D. K. Warinner and J. T. Pearson</i>	125
Instability and Transition in Supersonic Boundary Layers <i>M. R. Malik</i>	139
Laminar-to-Turbulent Transition on a Body of Revolution With an Extended Favorable Pressure Gradient Forebody <i>R. J. Hansen and J. G. Hoyt</i>	149
Boundary Layer Control as a Means of Reducing Drag on Fully Submerged Bodies of Revolution <i>B. Bar-Haim and D. Weihs.</i>	163
Turbulence Measurements and Modeling of Viscoelastic Fluid in a Rectangular Open Channel <i>H. S. Lee and T. F. Irvine, Jr.</i>	171
