

Contents

Introduction	6
1 Possibilities of using renewable energy sources	7
2 The influence of selected factors on the acquisition of wind energy	17
3 The impact of astrone and zone climatic factors on wind energy	39
3.1. Climate factors affecting the use of wind energy	42
3.2. Distribution of wind plants in the context of climatic conditions	47
4 Characteristics of wind plants	49
4.1. Wind power plants with vertical axes perpendicular to the direction of wind inflow	53
4.2. Wind power plants with horizontal axes parallel to the wind direction	62
5 Simplified design calculations of the wind plant	65
5.1. Horizontal axis wind power plants	66
5.2. Vertical axis wind power plants	81
6 Modern wind plants	84
6.1. Construction of a wind power plant with a horizontal axis of rotation	89
6.2. Wind turbine rotor	92
6.3. Wind turbine rotor blades	93
6.4. Wind turbine nacelle	96
6.5. Main shaft and gearbox	97
6.6. Wind turbine generators	99
6.7. Regulation of the wind plant	104
6.8. Tower of the wind power plant	112
6.9. Cooperation with the power grid	117
6.10.Examples of modern wind power plants	117
6.11.Storage and use of energy obtained from wind	123
