<b>1</b>	<b>Interactions Between Physical Fields in Different Geological Objects</b>	<b>1</b>
1.1	Electrokinetic Processes in a Heterophase Geological Medium	4
1.2	Effect of Elastic Vibrations on Physical Properties of a Heterophase Medium	8
1.3	Oil and Gas Deposit as a Physical Heterogeneity of Geological Media	10
	References	12
<b>2</b>	<b>Geological Medium Models Used in Laboratory Investigations</b>	<b>15</b>
2.1	Methods of Modelling Artificial Rock Samples and Boreholes	15
	References	19
<b>3</b>	<b>Effects of Electric and Acoustic Field Interaction in Porous Media Saturated with Water or Hydrocarbons: Laboratory Modeling</b>	<b>21</b>
3.1	Electric Resistivity of Electrolytes and Petroleum in an Ultrasonic Field	21
3.2	The Theoretical Model	27
3.3	Model of a Borehole in Ultrasonic Field	32
	References	35
<b>4</b>	<b>Electrical Polarization Processes in Porous Rock Media in Elastic Wave Field</b>	<b>37</b>
4.1	Sorption Processes in Ultrasonic Field	38
4.2	Measurements of Electrokinetic Potentials Under Resonance Excitation of Capillary Effect	41
4.3	Polarization Excited in Porous Media by Acoustic Waves	46
4.4	Application of Ultrasonic Stimulation in Borehole Investigations Using Natural Polarization Potentials	51
	References	54

<b>5</b>	<b>Electroacoustic and Seismoelectric Processes Induced in Sedimentary Rocks . . . . .</b>	<b>57</b>
5.1	Induced Polarization Method and Ultrasonic Field . . . . .	57
5.2	Laboratory Investigations of the Seismoelectrical Properties of Sedimentary Rocks . . . . .	61
5.3	Investigation of the Relaxation of Electrically Induced (with Direct Current) Polarization Signals . . . . .	65
5.4	Acoustically Stimulated Electromagnetic Radiation in Saturated Porous Media . . . . .	69
5.5	Resonance Excitation of Secondary Electromagnetic Radiation in Saturated Porous Media (Pore Resonance) . . . . .	80
5.6	Direct-Current Induced Acoustic Emission in Saturated Sedimentary Rocks . . . . .	84
5.7	Longitudinal Waves in DC Electric Field . . . . .	91
5.8	Methodology of Investigations . . . . .	92
5.9	The Results of Experiments . . . . .	93
	References . . . . .	98
<b>6</b>	<b>Exemplary Applications of Physical Field Interactions in Geological Media in Field Investigations . . . . .</b>	<b>101</b>
6.1	Vibrostimulated Electromagnetic Radiation Observed Above Deposits of Hydrocarbons . . . . .	101
6.2	Vibrostimulated SP Potentials Observed Above Deposits of Hydrocarbons . . . . .	107
	References . . . . .	114
