

Contents

<i>Preface</i>	v
Issues in Developing Software for Safety Critical Systems JOHN A. McDERMID (<i>UK</i>)	1
Design Fault Tolerance J. C. KNIGHT & P. E. AMMANN (<i>USA</i>)	25
Formal Methods in the Production and Assessment of Safety Critical Software R. E. BLOOMFIELD, P. K. D. FROOME & B. Q. MONAHAN (<i>UK</i>)	51
Formal Design Verification of Digital Circuitry RICKY W. BUTLER & JON A. SJOGREN (<i>USA</i>)	67
On the Use and the Performance of Software Reliability Growth Models PETER A. KEILLER & DOUGLAS R. MILLER (<i>USA</i>)	95
Testing for the Achievement of Software Reliability M. A. HENNELL (<i>UK</i>)	119
The Software Maintenance of Large Software Systems: Manage- ment, Methods and Tools K. H. BENNETT (<i>UK</i>)	135
NASA Software Failure Characterization Experiments. GEORGE B. FINELLI (<i>USA</i>)	155

Paradigms for Experimentation and Empirical Studies in Software Engineering	171
VICTOR R. BASILI & RICHARD W. SELBY (<i>USA</i>)	
Liability for Defective Software	193
I. LLOYD (<i>UK</i>)	
<i>Index</i>	209
