Preface..... xiii

**Part I: Factors Affecting Driver Perception**

**Chapter 1: Introduction** ..... 3

1.1 Purpose and Scope ..... 3

1.2 Human Factors in Accident Reconstruction ..... 4

    A. Introduction..... 4

    B. History..... 6

    C. Human Factors in Product Evaluation and Development..... 7

    D. Applicability of Human Factors to Accident Reconstruction ..... 9

1.3 Human Variability ..... 10

    A. The Problem..... 10

    B. Descriptive Statistics..... 11

    C. Correlation ..... 18

    D. Inferential Statistics ..... 20

    E. The Concept of Threshold..... 21

1.4 Expectancy..... 21

    A. What It Is..... 21

    B. Driver Expectancy..... 22

1.5 Chapter Overview ..... 24

References..... 25

**Chapter 2: Light and Its Measurement** ..... 27

2.1 Introduction..... 27

2.2 The Nature of Light..... 28

2.3 Definitions..... 28

    A. Light-Reflecting Surfaces ..... 30

    B. Miscellaneous Visibility-Enhancing Materials ..... 34

2.4 Photometry..... 35

    A. Luminous Intensity and Illuminance ..... 35

    B. Luminance..... 37

    C. Means of Measurement..... 38

2.5 Chapter Overview ..... 38

Reference ..... 38

**Chapter 3: Vision, Audition, Vibration and The Processing of**

|                                               |           |
|-----------------------------------------------|-----------|
| <b>Information.....</b>                       | <b>39</b> |
| 3.1 Introduction.....                         | 39        |
| 3.2 Vision .....                              | 40        |
| A. Measurement of Visual Performance.....     | 40        |
| B. Structure and Performance of the Eye ..... | 44        |
| C. Glare.....                                 | 56        |
| D. The Useful Field of View.....              | 58        |
| E. The Twilight Period.....                   | 58        |
| 3.3 Auditory Issues.....                      | 62        |
| A. Problems with Sound.....                   | 62        |
| B. Noise .....                                | 63        |
| 3.4 Vibration.....                            | 64        |
| 3.5 Information Processing .....              | 65        |
| 3.6 Memory Questions.....                     | 68        |
| 3.7 Chapter Overview .....                    | 69        |
| References.....                               | 71        |

**Chapter 4: Driver Eye Movements and Visual Attention..... 75**

|                                                                                  |    |
|----------------------------------------------------------------------------------|----|
| 4.1 Introduction.....                                                            | 75 |
| A. Terminology .....                                                             | 76 |
| B. Methodology .....                                                             | 77 |
| 4.2 Driver Eye Movements .....                                                   | 78 |
| 4.3 Driver Experience .....                                                      | 78 |
| 4.4 Negotiating Curves .....                                                     | 79 |
| 4.5 Effects of Drugs and Alcohol.....                                            | 80 |
| 4.6 Effects of Fatigue.....                                                      | 80 |
| 4.7 Vehicle Characteristics.....                                                 | 80 |
| 4.8 Age and Sex .....                                                            | 81 |
| 4.9 Interior Glances.....                                                        | 81 |
| 4.10 Effect of In-Vehicle Devices .....                                          | 82 |
| 4.11 Use of Mirrors.....                                                         | 82 |
| A. Duration of Routine Mirror Glances .....                                      | 83 |
| B. Duration of Mirror Glances in Connection with Merges and Lane<br>Changes..... | 83 |
| C. Mirror and Direct Rearward Glances When Changing Lanes and<br>Merging.....    | 83 |
| D. The Timing of Rearward Glances with Respect to the Gore .....                 | 84 |
| 4.12 The Effect of Secondary Glances on Accident Avoidance.....                  | 84 |
| 4.13 Chapter Overview .....                                                      | 86 |
| References.....                                                                  | 87 |

|                                                          |     |
|----------------------------------------------------------|-----|
| <b>Chapter 5: Conspicuity</b> .....                      | 91  |
| 5.1 Introduction.....                                    | 91  |
| 5.2 Motorcycle and Bicycle Conspicuity.....              | 94  |
| 5.3 The Conspicuity of Emergency Vehicles.....           | 97  |
| 5.4 Truck Conspicuity.....                               | 98  |
| 5.5 Pedestrian and Pavement Delineation Conspicuity..... | 102 |
| 5.6 Chapter Overview.....                                | 103 |
| References.....                                          | 104 |
| <b>Chapter 6: Driver Perception</b> .....                | 107 |
| 6.1 Introduction.....                                    | 107 |
| 6.2 Perception as Contrasted to Sensation.....           | 108 |
| A. Definition.....                                       | 108 |
| B. The Nature of Perception.....                         | 109 |
| 6.3 Illusions.....                                       | 110 |
| 6.4 Applications.....                                    | 111 |
| 6.5 Difficulties in Perception While Driving.....        | 114 |
| A. Problems with the Roadway.....                        | 114 |
| B. Violations of Expectancy.....                         | 115 |
| C. Judging Distance to Lights.....                       | 116 |
| 6.6 The Intruding Vehicle.....                           | 116 |
| 6.7 Positive Guidance.....                               | 118 |
| 6.8 Eyewitness Testimony.....                            | 120 |
| 6.9 Chapter Overview.....                                | 124 |
| References.....                                          | 125 |
| <b>Chapter 7: Judgments of Speed and Distance</b> .....  | 129 |
| 7.1 Introduction.....                                    | 129 |
| 7.2 Perception of Distance.....                          | 130 |
| 7.3 Perception of Speed.....                             | 131 |
| 7.4 Threshold for Closing Speed.....                     | 135 |
| 7.5 Speed Perception and Vehicle Size.....               | 141 |
| 7.6 Chapter Overview.....                                | 141 |
| References.....                                          | 142 |
| <b>Chapter 8: The Driver's Field of View</b> .....       | 145 |
| 8.1 Introduction.....                                    | 145 |
| 8.2 What a Driver Must See.....                          | 146 |
| 8.3 Field-of-View Targets.....                           | 147 |
| 8.4 Driver Eye Locations.....                            | 148 |
| 8.5 Binocular and Ambinocular Vision.....                | 149 |
| 8.6 Obstruction of the Forward Field of View.....        | 149 |
| 8.7 A-Pillar Obstruction of Intersecting Vehicles.....   | 150 |

|                                                                                     |     |
|-------------------------------------------------------------------------------------|-----|
| 8.8 A-Pillar Obstruction of Pedestrians and Bicyclists.....                         | 157 |
| 8.9 Measuring Pillar Obstructions in the Field.....                                 | 159 |
| A. Measuring the Ambinocular A-Pillar Obstruction of a Pedestrian .....             | 159 |
| B. Measuring the Ambinocular A-Pillar Obstruction of an Intersecting Vehicle .....  | 161 |
| 8.10 Obstructions to the Side and Rear.....                                         | 164 |
| A. A Note on Convex Mirrors ("Objects in Mirror Are Closer than They Appear") ..... | 164 |
| B. Mirrors and Overtaking Vehicles .....                                            | 165 |
| C. Pillar Obstructions to the Side and Rear Direct Fields-of-View .....             | 166 |
| 8.11 The Field of View from Large Trucks.....                                       | 167 |
| 8.12 Measuring the Field of View in Large Trucks .....                              | 169 |
| 8.13 Chapter Overview .....                                                         | 170 |
| References.....                                                                     | 172 |

## Part II: Driving at Night

|                                                                            |            |
|----------------------------------------------------------------------------|------------|
| <b>Chapter 9: The Visibility Provided by Vehicle Lighting Systems.....</b> | <b>175</b> |
| 9.1 Introduction.....                                                      | 175        |
| 9.2 The Importance of Target Contrast .....                                | 177        |
| A. Definition .....                                                        | 177        |
| B. Calculating Contrast.....                                               | 178        |
| 9.3 The Reflectivity of Objects in the Real World.....                     | 181        |
| 9.4 Driver Vision at Night.....                                            | 186        |
| A. Vehicle Lighting Systems .....                                          | 186        |
| B. The Visibility Provided by Automotive Headlamps .....                   | 195        |
| 9.5 Nighttime Driving Speeds.....                                          | 208        |
| 9.6 When Drivers "Overdrive" Their Headlamps.....                          | 209        |
| 9.7 Chapter Overview .....                                                 | 210        |
| References.....                                                            | 211        |

|                                                                                                  |            |
|--------------------------------------------------------------------------------------------------|------------|
| <b>Chapter 10: Factors That Affect Driver Visibility Under Nighttime Driving Conditions.....</b> | <b>215</b> |
| 10.1 Introduction.....                                                                           | 215        |
| 10.2 PCDETECT .....                                                                              | 216        |
| 10.3 The Distance-Squared Law and Visibility Level .....                                         | 218        |
| 10.4 Comparisons .....                                                                           | 220        |
| A. Target Reflectance.....                                                                       | 221        |
| B. Target Location .....                                                                         | 223        |
| C. Target Size.....                                                                              | 223        |
| D. Driver Age.....                                                                               | 224        |
| E. Contrast Sensitivity .....                                                                    | 225        |
| F. Headlamp Misaim.....                                                                          | 226        |

|                               |     |
|-------------------------------|-----|
| G. Headlamp Intensity .....   | 227 |
| H. Glare .....                | 228 |
| I. Lamp Mounting Height ..... | 230 |
| J. Lateral Separation .....   | 233 |
| 10.5 Chapter Overview .....   | 233 |
| References .....              | 234 |

## **Chapter 11: Lighting Sources Other Than Vehicle Headlamps..... 235**

|                                                                  |     |
|------------------------------------------------------------------|-----|
| 11.1 Introduction .....                                          | 235 |
| 11.2 Fixed Lighting Sources .....                                | 236 |
| A. Mercury .....                                                 | 236 |
| B. High-Pressure Sodium .....                                    | 237 |
| C. Metal Halide .....                                            | 237 |
| D. Fluorescent .....                                             | 237 |
| E. Low-Pressure Sodium .....                                     | 237 |
| F. Light-Emitting Diodes (LED) .....                             | 238 |
| 11.3 The Distribution of Illuminance from Street Lamps .....     | 238 |
| 11.4 Loss in Performance of Light Sources .....                  | 241 |
| 11.5 The Scene When Illuminated by Fixed Sources .....           | 242 |
| 11.6 Research on the Performance of Fixed Lighting Systems ..... | 245 |
| 11.7 Recommendations for Street Lighting .....                   | 249 |
| 11.8 Assessment of Visibility in a Field Investigation .....     | 253 |
| 11.9 Chapter Overview .....                                      | 255 |
| References .....                                                 | 256 |

## **Chapter 12: Evaluation of Visibility in the Field..... 257**

|                                                 |     |
|-------------------------------------------------|-----|
| 12.1 Introduction .....                         | 257 |
| 12.2 Why Do a Field Investigation? .....        | 258 |
| 12.3 Preparatory Phase .....                    | 259 |
| A. Physical Facilities .....                    | 260 |
| B. Vehicles .....                               | 263 |

## **Chapter 13: Problems in the Use of Nighttime Photography as Evidence in Litigation..... 277**

|                                                  |     |
|--------------------------------------------------|-----|
| 13.1 Introduction .....                          | 277 |
| 13.2 Limitations in the Camera-Film System ..... | 280 |
| 13.3 Perceptual-Cognitive Issues .....           | 284 |
| A. Field of View .....                           | 284 |

|                                        |     |
|----------------------------------------|-----|
| B. Static versus Dynamic Viewing ..... | 284 |
| C. Viewing Time .....                  | 285 |
| D. Adaptation Level .....              | 285 |
| E. Image Size .....                    | 287 |
| F. Depth Perception .....              | 287 |
| G. Glare .....                         | 287 |
| H. Observer Expectancy .....           | 288 |
| 13.4 Implications .....                | 289 |
| 13.5 Chapter Overview .....            | 289 |
| References .....                       | 291 |

### Part III: Roadway Issues

|                                                        |            |
|--------------------------------------------------------|------------|
| <b>Chapter 14: Roadway Design and the Driver .....</b> | <b>295</b> |
| 14.1 Introduction .....                                | 295        |
| 14.2 Perception of the Road .....                      | 297        |
| 14.3 Visual Search .....                               | 298        |
| 14.4 Driver Workload .....                             | 299        |
| 14.5 Sight Distance .....                              | 300        |
| A. Decision Sight Distance .....                       | 300        |
| B. Stopping Sight Distance .....                       | 300        |
| C. Passing Sight Distance .....                        | 300        |
| D. Intersection Sight Distance .....                   | 301        |
| E. Additional Sight Distance Factors .....             | 301        |
| 14.6 Roadway Design .....                              | 302        |
| A. Roadway Width .....                                 | 302        |
| B. Intersections .....                                 | 303        |
| C. Roundabouts .....                                   | 304        |
| D. Curves .....                                        | 305        |
| 14.7 Traffic Calming .....                             | 309        |
| 14.8 Road Safety Audits .....                          | 310        |
| 14.9 Chapter Overview .....                            | 310        |
| References .....                                       | 311        |

## **Part IV: Driver Issues**

|                                                          |            |
|----------------------------------------------------------|------------|
| <b>Chapter 18: Driver Perception-Response Time .....</b> | <b>375</b> |
| 18.1 Introduction .....                                  | 376        |
| 18.2 Background .....                                    | 378        |
| A. Definition .....                                      | 378        |
| B. Stages of Perception-Response Time .....              | 380        |
| 18.3 Human Perception-Response Time .....                | 382        |

|                                                                     |            |
|---------------------------------------------------------------------|------------|
| A. Background.....                                                  | 382        |
| B. Driver Perception-Response Time .....                            | 383        |
| 18.4 Decision Sight Distance.....                                   | 404        |
| 18.5 Overview of Research.....                                      | 406        |
| 18.6 Factors Affecting Perception-Response Time.....                | 407        |
| A. Detection.....                                                   | 409        |
| B. Identification .....                                             | 410        |
| C. Decision .....                                                   | 411        |
| D. Response .....                                                   | 411        |
| E. Night vs. Day.....                                               | 412        |
| F. Chemicals, Driver Fatigue .....                                  | 413        |
| G. Age and Gender .....                                             | 414        |
| H. Cognitive Load .....                                             | 415        |
| I. Angular Position of the Target.....                              | 417        |
| 18.7 Situations that Do Not Fit the Perception-Response Model ..... | 420        |
| A. No Clearly Defined Entry .....                                   | 420        |
| B. Erroneous Assumption or Identification .....                     | 422        |
| 18.8 Chapter Overview .....                                         | 423        |
| References.....                                                     | 425        |
| <b>Chapter 19: Weather and Driving.....</b>                         | <b>431</b> |
| 19.1 Adverse Weather .....                                          | 431        |
| A. Rain.....                                                        | 434        |
| B. Snow.....                                                        | 435        |
| C. Fog .....                                                        | 437        |
| D. Glare.....                                                       | 439        |
| 19.2 Traffic Control Devices.....                                   | 441        |
| 19.3 Pedestrian Behavior.....                                       | 443        |
| 19.4 Chapter Overview .....                                         | 443        |
| References .....                                                    | 444        |
| <b>Chapter 20: The Older Driver.....</b>                            | <b>447</b> |
| 20.1 Older Drivers: Who Are These Guys? .....                       | 447        |
| 20.2 Driving by the Elderly .....                                   | 450        |
| 20.3 Sensory Changes.....                                           | 455        |
| A. Vision .....                                                     | 455        |
| B. Other Senses.....                                                | 459        |
| 20.4 Judgment of Closing Speed—Gap Acceptance .....                 | 460        |
| 20.5 Cognitive and Motor Performance.....                           | 461        |
| A. Attention and Cognition.....                                     | 461        |
| B. Perception of Roadway Hazards .....                              | 463        |
| C. Motor Performance .....                                          | 463        |
| 20.6 Strategies for Improvement.....                                | 464        |
