FOREWORD	5
INTRODUCTION	7
1 Scope	8
2 Normative references	8
3 Terms and definitions	11
4 Abbreviated terms	17
5 General	17
6 Classification	17
6.1 General	17
6.2 Power transfer technology	18
6.3 Environmental condition	18
6.4 Electric connection to supply network	18
6.5 Access	18
6.6 Protection against electrical shock	18
7 General supply device requirements	18
7.1 General architecture	18
7.2 Power transfer requirements	19
7.3 Efficiency	19
7.4 Alignment	19
7.5 Activities provided by WPT system	19
8 Communication	19
9 Power transfer interoperability	19
10 Protection against electric shock	20
10.1 General requirements	20
10.2 Degrees of protection against access to hazardous-live-parts	20
10.3 Stored energy – Discharge of capacitors	20
10.3.1 Stored energy under abnormal or fault conditions	20
10.3.2 Disconnection of plug and cable connected supply device	20
10.4 Fault protection	20
10.5 Protective conductor dimensions	21
10.6 Residual current protection device	21
10.7 Telecommunication network	22
11 Specific requirements for WPT systems	22
11.1 General	22
11.2 Touch current	22
11.3 Insulation resistance	22
11.4 Dielectric withstand characteristic	23
11.4.1 AC dielectric withstand	23
11.4.2 Impulse dielectric withstand (1,2/50 μ s)	23
11.5 Overcurrent protection and short circuit withstand	24
11.5.1 General	24
11.5.2 Maximum current for plug and cable connected supply device	24
11.6 Temperature rise and protection against thermal incidents	25
11.6.1 General	25
11.6.2 Permissible surface temperature of accessible parts of the WPT system	25

11.6.3	Temperature limits for materials	25
11.6.4	Protection against burns from heating of foreign objects	26
11.7	Resistance to abnormal heat and fire due to internal electric effects	26
11.7.1	General	26
11.7.2	Resistance of insulating materials to heat	26
11.7.3	Resistance of insulating materials to abnormal heat and fire due to internal electric effects	26
11.8	Protection from electromagnetic field	27
11.9	Emergency service disconnect (optional)	27
12	Power cable requirements	27
13	Constructional requirements	27
13.1	Supply device dimensions and installation requirements	27
13.2	Connection of plug and cable connected supply device	27
13.3	Earthing electrode and continuity	27
13.4	IP degrees	28
13.5	Breaking capacity of switching devices	28
13.5.1	Switch and switch-disconnector	28
13.5.2	Contactors	28
13.5.3	Circuit-breaker	28
13.5.4	Relays	28
13.6	Clearance and creepage distances	28
14	Strength of materials and parts	29
14.1	General	29
14.2	Verification of mechanical strength for the enclosure of the supply device	29
14.3	Resistance to corrosion	29
14.4	Properties of insulating materials	30
14.4.1	Verification of thermal stability of enclosures	30
14.4.2	Resistance to fire (glow wire)	30
14.4.3	Ball pressure test	30
14.4.4	Resistance to tracking	30
14.4.5	Resistance to ultraviolet radiation	30
15	Service and test conditions	30
15.1	General	30
15.2	Environmental test	31
15.2.1	Ambient air temperature	31
15.2.2	Ambient humidity	31
15.2.3	Dry heat	32
15.3	Heat test under solar radiation	32
16	Electromagnetic compatibility (EMC)	32
16.1	Load and operating conditions	32
16.1.1	Load conditions	32
16.1.2	Operating conditions	32
16.2	Immunity requirements	33
16.3	Disturbance requirements	35
16.3.1	General	35
16.3.2	Limits and test conditions for disturbances in the low frequency (LF) range	36
16.3.3	Limits and test conditions for disturbances in the radio frequency (RF) range	36
