
Contents

SECTION I: CHEMISTRY OF EXPLOSIVES 1

Chapter 1: Organic Chemical Nomenclature 3

- 1.1 Basic Organic Structures 3
- 1.2 Alkanes 4
- 1.3 Alkenes 7
- 1.4 Alkynes 7
- 1.5 Cyclic Forms 9
- 1.6 Aromatics 10
- 1.7 Polycyclic Aromatic Structures 16

Chapter 2: Oxidation 19

- 2.1 Oxidation Reactions 19
- 2.2 Effects of Stiochiometry 20
- 2.3 Reaction Product Hierarchy 20
- 2.4 Oxygen Balance 24

Chapter 3: Pure Explosives 27

- 3.1 Grouping Explosives by Structure 27
- 3.2 Aromatic Explosive Compounds 28

3.3 Aliphatic Explosive Compounds	40
3.4 Inorganic Explosives	48

Chapter 4: Use Forms of Explosives 51

4.1 Pressings	51
4.2 Castables	52
4.3 Plastic Bonded (PBX)	53
4.4 Putties	53
4.5 Rubberized	53
4.6 Extrudables	57
4.7 Binary	58
4.8 Blasting Agents	58
4.9 Slurries and Aqueous Gels	60
4.10 Dynamites	61

Chapter 5: Estimating Properties of Explosives 67

X 5.1 Estimation of Theoretical Maximum Density (TMD)	67
X 5.2 Estimation of Detonation Velocity at TMD	73
X 5.3 Detonation Velocity as Function of Density	76
X 5.4 Estimating Detonation Velocity of Mixtures	77
5.5 Estimating Detonation Pressure	79

Chapter 6: Decomposition 81

6.1 Decomposition Reactions	81
6.2 Thermal Stability Tests	83
6.3 Chemical Compatibility	87
References	88

SECTION II: ENERGETICS OF EXPLOSIVES 91

Chapter 7: Basic Terms of Thermodynamics 93

7.1 Energy	93
7.2 Temperature and Heat	94
7.3 Internal Energy	94
7.4 Energy in Transition: Heat and Work	95
7.5 Energy Units	95
7.6 Enthalpy	97

Chapter 8: Thermophysics 99

8.1 Heat Capacity of Gases	99
8.2 Heat Capacity of Liquids	104
8.3 Heat Capacity of Solids	105
8.4 Latent Heat of Fusion	107
8.5 Heat of Vaporization	110
8.6 Heat of Transition	112
8.7 Summary	112

Chapter 9: Thermochemistry 117

9.1 Heat of Reaction	117
9.2 Heat of Formation	118
9.3 Heats of Reaction from Heats of Formation	124
9.4 Heat of Combustion	126
9.5 Heat of Detonation or Explosion	131
9.6 Heat of Afterburn	132

Chapter 10: Group Additivity 135

10.1 Group Additivity Notation	136
10.2 Data for the Ideal Gas State	137
10.3 Data for the Solid State	146

Chapter 11: Reaction Temperature 147

11.1 Reaction Temperature at Constant Pressure	147
11.2 Reaction Temperature at Constant Volume	150

Chapter 12: Closed-Vessel Calculations 153

12.1 Effect of Free Volume	153
12.2 Heat Produced	155
12.3 Temperature of the Gases	155
12.4 Pressure in the Vessel	156
12.5 Summary	158

Chapter 13: Estimating Detonation Properties 159

13.1 KJ Assumed Product Hierarchy	159
13.2 Detonation Velocity	160
13.3 Detonation (CJ) Pressure	161
13.4 Modifications of the KJ Method	161
References	162

SECTION III: SHOCK WAVES 165**Chapter 14: Qualitative Description of a Shock Wave 167**

- 14.1 Stress-Strain 167
- 14.2 Sound, Particle, and Shock Velocities 169
- 14.3 Attenuation Behind Shock Waves 172

Chapter 15: The Bead Model 175

- 15.1 Arrangement of the Model 175
- 15.2 Wave and Particle Velocity 175
- 15.3 Energy Partition 178
- 15.4 Density Changes 178

Chapter 16: Rankine-Hugoniot Jump Equations 179

- 16.1 Mass Balance 180
- 16.2 Momentum Balance 181
- 16.3 Energy Balance 182

Chapter 17: The Hugoniot Planes, $U-u$, $P-v$, $P-u$ 185

- 17.1 The Hugoniot 185
- 17.2 The $U-u$ Plane 186
- 17.3 The $P-v$ Plane 189
- 17.4 The $P-u$ Plane 199

Chapter 18: Interactions of Shock Waves 203

- 18.1 Impact of Two Slabs 203
- 18.2 Shock at a Material Interface Case a, $Z_A < Z_B$ 208
- 18.3 Shock at a Material Interface Case b, $Z_A > Z_B$ 213
- 18.4 Collision of Two Shock Waves 216
- 18.5 Summary of Shock Waves and Interactions 221

Chapter 19: Rarefaction Waves 223

- 19.1 Development of a Rarefaction Wave 223
- 19.2 Interactions Involving Rarefactions 228
- 19.3 Summary of Rarefactions 250
- References 250

SECTION IV: DETONATION 251

Chapter 20: Detonations, General Observations 253

- 20.1 Simple Theory of Steady Ideal Detonation 253
- 20.2 Estimating Detonation Parameters 257
- 20.3 Detonation Interactions 268
- 20.4 Summary 273

Chapter 21: Real Effects in Explosives 275

- 21.1 The Reaction Zone 275
- 21.2 Diameter Effects 277
- 21.3 Density Effects 287
- 21.4 Temperature Effects 293
- 21.5 Geometry Effects (L/D) 294
- 21.6 Summary 297
- References 297

SECTION V: INITIATION AND INITIATORS 299

Chapter 22: Theories of Initiation 301

- 22.1 Initiation of Deflagration 301
- 22.2 Initiation of Detonation 310
- 22.3 Deflagration-to-Detonation Transition 319

Chapter 23: Nonelectric Initiators 321

- 23.1 Flame or Spark Initiators 321
- 23.2 Friction-Initiated Devices 323
- 23.3 Stab Initiators 323
- 23.4 Percussion Initiators 325
- 23.5 Energy-Power Relationship 329

Chapter 24: Hot-Wire Initiators 335

- 24.1 Electric Matches 335
- 24.2 Electric Blasting Caps 337
- 24.3 Short Lead and Connectorized Initiators 340
- 24.4 Energy-Power Relationship 341
- 24.5 Firing at Minimum Energy 345

- 24.6 Safety Considerations in Design 349
- 24.7 Quality Control Testing 351

Chapter 25: Exploding Bridgewire Detonators 353

- 25.1 Construction of EBWs 353
- 25.2 Explosion of the Bridgewire 354
- 25.3 Detonation of Initial Pressing 359
- 25.4 Effects of Cables 361
- 25.5 Function Time 364
- 25.6 Series and Parallel Firing Considerations 366
- 25.7 Safety Considerations 367
- References 367

SECTION VI: ENGINEERING APPLICATIONS 369

Chapter 26: Theories of Scaling 371

- 26.1 Units and Dimensions 371
- 26.2 Scaling by Geometric Similarity 372
- 26.3 Scaling by Dimensional Analysis 377
- 26.4 Work Functions or Available Energy 382

Chapter 27: Acceleration, Formation, and Flight of Fragments 385

- 
- 27.1 Acceleration of the Gurney Model 385
 - 27.2 Fragmentation of Cylinders 394
 - 27.3 Flight of Fragments 399

Chapter 28: Blast Effects in Air, Water, and on the Human Body 405

- 28.1 Scaling Air Shock 405
- 28.2 Scaling Shocks in Water 411
- 28.3 Physiological Response to Air Blast 417

Chapter 29: Scaling Craters 421

- 29.1 Crater Formation Mechanisms 421
- 29.2 Surface Bursts 424
- 29.3 Above-Surface Bursts 429
- 29.4 Buried Bursts 430

**Chapter 30: Jetting, Shaped Charges, and Explosive
Welding 435**

30.1 Shaped Charges	435
30.2 Explosive Welding	444
References	451
