|------------------------------------------------------------------------|----|
| Foreword.....                                                          | 4  |
| 1 Scope .....                                                          | 5  |
| 2 Normative references .....                                           | 5  |
| 3 Terms and definitions, symbols and units.....                        | 6  |
| 3.1 Terms and definitions .....                                        | 6  |
| 3.2 Symbols and units .....                                            | 8  |
| 4 Test equipment .....                                                 | 9  |
| 4.1 General.....                                                       | 9  |
| 4.2 Furnace .....                                                      | 9  |
| 4.3 Loading equipment.....                                             | 9  |
| 5 Test conditions .....                                                | 9  |
| 5.1 General.....                                                       | 9  |
| 5.2 Support and restraint conditions .....                             | 10 |
| 5.3 Loading conditions.....                                            | 10 |
| 6 Test specimens .....                                                 | 10 |
| 6.1 Number of test specimens .....                                     | 10 |
| 6.2 Size of test specimens .....                                       | 11 |
| 6.3 Construction of test specimens .....                               | 11 |
| 6.4 Composition of test specimen component materials .....             | 13 |
| 6.5 Properties of test materials .....                                 | 14 |
| 6.6 Verification of the test specimen .....                            | 15 |
| 7 Installation of the test construction .....                          | 15 |
| 8 Conditioning of the test construction.....                           | 15 |
| 9 Application of instrumentation.....                                  | 16 |
| 9.1 General.....                                                       | 16 |
| 9.2 Instrumentation for measurement of furnace temperature .....       | 16 |
| 9.3 Instrumentation for measurement of test specimen temperature ..... | 16 |
| 9.4 Instrumentation for measurement of pressure.....                   | 17 |
| 9.5 Instrumentation for measurement of deformation .....               | 17 |
| 9.6 Instrumentation for measurement of applied load .....              | 17 |
| 10 Test procedure .....                                                | 17 |
| 10.1 General.....                                                      | 17 |
| 10.2 Furnace temperature and pressure .....                            | 17 |
| 10.3 Application and control of load .....                             | 17 |
| 10.4 Temperature of test specimen.....                                 | 17 |
| 10.5 Deformation .....                                                 | 18 |
| 10.6 Observations .....                                                | 18 |
| 10.7 Termination of test.....                                          | 18 |
| 11 Test results .....                                                  | 18 |
| 11.1 Acceptability of test results .....                               | 18 |
| 11.2 Presentation of test results .....                                | 19 |
| 12 Test report .....                                                   | 19 |
| 13 Assessment.....                                                     | 20 |

|              |                                                                                                                            |    |
|--------------|----------------------------------------------------------------------------------------------------------------------------|----|
| 13.1         | General .....                                                                                                              | 20 |
| 13.2         | Profiled steel sheet temperature .....                                                                                     | 21 |
| 13.3         | Equivalent thickness of concrete .....                                                                                     | 21 |
| 13.4         | Limiting exposure time .....                                                                                               | 22 |
| 13.5         | Insulation .....                                                                                                           | 22 |
| 14           | Report of the assessment .....                                                                                             | 22 |
| 15           | Limits of applicability of the results of the assessment .....                                                             | 23 |
| 16           | Additional limits of applicability of the results of the assessment for suspended ceilings used as protection system ..... | 25 |
| 16.1         | Height of the cavity .....                                                                                                 | 25 |
| 16.2         | Exposed width of test specimen .....                                                                                       | 25 |
| 16.3         | Properties of the horizontal protective membrane .....                                                                     | 25 |
| 16.4         | Size of panels within the horizontal protective membrane .....                                                             | 25 |
| 16.5         | Fixtures and fittings .....                                                                                                | 25 |
| 16.6         | Gaps between grid members and test frame or walls .....                                                                    | 25 |
| Annex A      | (normative) Test method to the smouldering fire or slow heating curve .....                                                | 32 |
| A.1          | General .....                                                                                                              | 32 |
| A.2          | Test conditions .....                                                                                                      | 32 |
| A.3          | Termination of the test .....                                                                                              | 32 |
| A.4          | Evaluation of the results .....                                                                                            | 33 |
| Annex B      | (normative) Measurement of properties of fire protection materials .....                                                   | 35 |
| B.1          | General .....                                                                                                              | 35 |
| B.2          | Thickness of fire protection materials .....                                                                               | 35 |
| B.3          | Density of applied fire protection materials .....                                                                         | 36 |
| B.4          | Moisture content of applied fire protection materials .....                                                                | 36 |
| Bibliography | .....                                                                                                                      | 38 |
