Foreword

ix

1. Multi-Criteria Decision-Making

1.1 Introduction	1
1.2 MCDM: elements and classification	3
1.3 Types of MCDM problems	5
1.4 Categorization of MCDM methods	6
1.5 MCDM methods	8
1.6 Structure of the book	8
References	9

2. Multiple-Criteria Decision-Making sorting method

2.1 Introduction	13
2.2 Background	14
2.2.1 Basic concepts concerning MCDM sorting	14
2.2.2 The categorization of MCDM sorting methods	16
2.3 Publications on sorting methods	20
2.3.1 Contributions and applications of the MCDM sorting methods	22
2.4 Trends and future directions for MCDM sorting	37
References	38

3. MCDM sorting methods

3.1 AHPSort: a sorting method based on AHP	51
3.1.1 Analytic hierarchy process	51
3.1.2 AHPSort	54
3.1.3 AHPSort II	57
3.2 ANPSort: a sorting method based on ANP	62
3.2.1 ANP	62
3.2.2 ANPSort	65
3.3 FlowSort: a sorting method based on PROMETHEE	69
3.3.1 PROMETHEE	69
3.3.2 FlowSort and extensions	77

3.4	UTADIS (UTilités Additives DIScriminantes): a multi-criteria classification method	88
3.4.1	UTADIS	88
3.4.2	PREFDIS: decision support system for sorting problems	92
3.4.3	UTADIS GMS-GROUP	94
3.5	ELECTRE TRI: a sorting method based on ELECTREE	103
3.5.1	ELECTRE III	103
3.5.2	ELECTRE TRI and extensions	105
3.6	TOPSIS-Sort: a sorting method based on TOPSIS	114
3.6.1	TOPSIS	114
3.6.2	TOPSIS-Sort and extensions	116
3.7	VIKORSort: a sorting method based on VIKOR	126
3.7.1	VIKOR	126
3.7.2	VIKORSort	128
3.8	CODAS-SORT: a new CODAS-based method for sorting problems	137
3.8.1	CODAS	137
3.8.2	CODAS-SORT	139
3.9	MACBETHSort: a multiple-criteria decision-aid procedure for sorting problems	143
3.9.1	MACBETH	143
3.9.2	MACBETHSort	145
3.10	DEASort: data envelopment analysis based on sorting	149
3.10.1	DEA	149
3.10.2	DEASort	152
	References	156

4. Fuzzy sets and MCDM sorting

4.1	Fuzzy sets: concepts	161
4.1.1	Fuzzy basic definitions	163
4.1.2	Operations and properties	165
4.1.3	Fuzzy numbers	168
4.1.4	Linguistic variables	171
4.1.5	Fuzzy relations	173
4.1.6	Defuzzification	175
4.1.7	Left and right (LR) representation	175
4.2	Fuzzy MCDM sorting methods	176
4.2.1	Fuzzy FlowSort	176
4.2.2	SMAA fuzzy-FlowSort	179
4.2.3	ELECTRE TRI-C and trapezoidal fuzzy numbers	181
4.2.4	Continuous cooperation fuzzy sorting	185
4.3	MCDM fuzzy sorting approaches	188
4.3.1	AHP-FuzzySort	188
4.3.2	Intuitionistic fuzzy outranking sorting for group decision making	194
4.4	Conclusion	197

References	197
5. Analysis of MCDM sorting methods	
5.1 Suitability and necessity	201
5.1.1 AHPSort II	201
5.1.2 UTADIS	201
5.1.3 ELECTRE TRI	202
5.1.4 FlowSort	202
5.1.5 DEASort	203
5.1.6 TOPSIS-SORT	204
5.1.7 Preference disaggregation analysis (PDA)	204
5.1.8 Group decision-making for sorting	205
5.2 Characterization	206
5.2.1 Risk assessment	206
5.2.2 Education	210
References	215
6. Applications of MCDM sorting	
6.1 GIS aware decisions	219
6.1.1 Geographic Information System (GIS)	220
6.1.2 The spatial criteria	221
6.2 Real-world case studies	222
6.2.1 Environmental management	222
6.2.2 The security level of cities	231
6.2.3 Solar energy	237
6.2.4 Economic attractiveness of the landscape	243
6.2.5 Geographical marginality	246
References	251
7. Future research and remarks on MCDM sorting	
7.1 MCDM sorting: trends and new avenues	255
7.2 Concluding remarks	259
References	259
Index	263
