<i>Preface</i>	ix
<i>Authors</i>	xi
<i>List of Symbols</i>	xiii

1 Introduction	1
-----------------------	----------

1.1 <i>Introduction to connection behaviour under fire</i>	1
1.2 <i>Introduction to connection design for fire safety</i>	3
1.3 <i>Introduction to the book</i>	4
<i>References</i>	6

2 Structural analysis of connections in fire	9
---	----------

2.1 <i>A brief summary of connection behaviour in fire</i>	9
2.2 <i>Key stages of connection behaviour</i>	13
2.3 <i>Simplified methods to calculate internal forces of different key stages of connection behaviour at elevated temperatures</i>	16
2.3.1 <i>Key stage 1: maximum compression force</i>	16
2.3.2 <i>Stage 2: connection bending moment</i>	18
2.3.3 <i>Stage 3: bending moment and tensile force</i>	18
2.3.3.1 <i>Stage 3a (before reaching the peak catenary tensile force)</i>	19
2.3.3.2 <i>Stage 3b (after reaching peak tensile force)</i>	20
2.3.3.3 <i>Demand on rotation</i>	20
2.3.4 <i>Stage 4: maximum force at ambient temperature after cooling</i>	22
2.3.5 <i>Worked examples</i>	23
2.4 <i>Numerical modelling</i>	26
2.4.1 <i>Introduction</i>	26

2.4.2	<i>Techniques to overcome numerical convergence problems</i>	27	
2.4.2.1	<i>Material failure (fracture)</i>	27	
2.4.2.2	<i>Dealing with temporary loss of stability</i>	27	
2.4.3	<i>Excessive computational time</i>	28	
2.5	<i>Summary</i>	30	
	<i>References</i>	31	
3	Connection temperatures in fire		33
3.1	<i>Introduction</i>	33	
3.2	<i>Local section factors for connection components</i>	34	
3.3	<i>New version of EN1993-1-2</i>	36	
3.4	<i>Coatback</i>	36	
3.5	<i>Worked examples</i>	42	
	<i>References</i>	44	
4	Connection components and their force–displacement relations		47
4.1	<i>Introduction</i>	47	
4.2	<i>Identification of components for common types of connections</i>	48	
4.3	<i>Force–displacement relations of active connection components</i>	49	
4.3.1	<i>T-Stub model Figure</i>	52	
4.3.2	<i>Column web in tension (iv)</i>	58	
4.3.3	<i>Plate in tension or compression (v)</i>	58	
4.3.4	<i>Plate in bearing (vi)</i>	59	
4.3.5	<i>Bolt in shear (vii)</i>	61	
4.3.6	<i>Welds (viii)</i>	63	
4.3.7	<i>Column web in compression (ix)</i>	63	
4.3.8	<i>Beam flange in compression(x)</i>	65	
4.4	<i>Other considerations</i>	65	
	<i>References</i>	66	
5	Application of the component-based method for beam–column connection design in fire		69
5.1	<i>Introduction</i>	69	
5.2	<i>Detailed implementation of calculation procedures</i>	71	

5.2.1	<i>Flowchart A: Detailed calculations to check connection at peak catenary action force</i>	71
5.2.2	<i>Flowchart B – check connection failure temperature before reaching peak catenary force ($\delta_{cap}(supply) < \delta_{peak}(demand)$)</i>	74
5.2.3	<i>Flowchart C – Check connection failure temperature after reaching peak catenary force ($\delta_{cap}(supply) > \delta_{peak}(demand)$)</i>	76
5.3	<i>Numerical examples</i>	78
5.3.1	<i>Basic data</i>	78
5.3.2	<i>Beam axial force – temperature and maximum deflection–temperature curves</i>	79
5.3.3	<i>Checking the connection at peak catenary action force (Flowchart A)</i>	80
5.3.4	<i>Flowchart B, finding connection failure temperature before peak catenary force in the beam</i>	81
5.3.5	<i>Flowchart C, finding connection failure temperature after reaching peak catenary force in the beam</i>	93
	<i>Reference</i>	95
6	Hollow section connections	97
6.1	<i>Introduction</i>	97
6.2	<i>Load-carrying capacity of welded tubular connections</i>	99
6.2.1	<i>Brace member in axial load</i>	101
6.2.2	<i>Brace members in bending</i>	102
6.3	<i>Increase in brace member force in fire</i>	102
6.3.1	<i>Worked example</i>	104
	<i>References</i>	106
7	Methods of improving connection performance	107
7.1	<i>Introduction</i>	107
7.2	<i>Using ductile connection components</i>	110
7.3	<i>Developing more ductile connection components</i>	111
7.3.1	<i>Reverse channel connection</i>	111
7.3.2	<i>Semi-circular web cleat</i>	112
7.3.3	<i>Bolt sleeve</i>	114
7.4	<i>Summary</i>	115
	<i>References</i>	115

<i>Appendix A: Thermal and mechanical properties of different types of steel at elevated temperatures</i>	117
<i>Appendix B: Examples of Checking for shear and bending of connections</i>	129
<i>Index</i>	143
