
Contents

Preface.....	ix
Authors	xi
1 Overview	1
1.1 Introduction	1
1.2 Towards Intelligent Traffic Flow Prediction.....	1
1.3 Broad Factors Impacting Traffic Flow	2
1.4 Prediction Techniques on Traffic Flow	2
1.5 Generic Traffic Flow Prediction Models and Measurements	3
1.6 Motivation	4
1.7 Problem Statement and Research Objective.....	5
1.7.1 Problem Statement.....	5
1.7.2 Research Objectives.....	5
1.8 Outline of the Book.....	5
2 Related Works	7
2.1 Introduction	7
2.2 Traffic Flow Prediction	7
2.2.1 Parametric Approaches.....	10
2.2.2 Nonparametric Approaches	11
2.3 Traffic Incident Detection.....	11
2.4 Smart Traffic Prediction and Congestion Avoidance System	13
2.4.1 Approaches to Congestion Control	15
2.5 Short-Term Traffic Prediction Model.....	18
2.6 Traffic Light Controller and Deviation System.....	19
2.7 IoT-Based Intelligent Transportation Systems	20
2.8 Summary.....	23
3 Smart Traffic Prediction and Congestion Avoidance System (S-TPCA) Using Genetic Predictive Models for Urban Transportation	25
3.1 Introduction	25
3.2 Smart Traffic Prediction	25
3.3 Congestion Avoidance System	26
3.4 Preliminaries	26
3.5 TPCA System	27
3.5.1 Gathering Traffic Data.....	28
3.5.2 Identification of Traffic State	29
3.5.2.1 Min–Max Normalization	30
3.5.3 Traffic Prediction and Congestion Avoidance	31
3.5.4 Rerouting and Fuel Consumption Model	32
3.6 Experiment Results and Discussion.....	33
3.7 Summary.....	48

- 4 Short-Term Traffic Prediction Model (STTPM) 49
 - 4.1 Introduction 49
 - 4.2 Need for Traffic Flow Prediction 49
 - 4.3 Dataset Collection 50
 - 4.4 Traffic Flow Analysis 51
 - 4.5 Short-Term Traffic Flow Prediction 55
 - 4.5.1 Locally Weighted Learning (LWL) 55
 - 4.5.2 Traffic Flow Structure Pattern Based Prediction Method 56
 - 4.6 Experiment Results and Discussion 58
 - 4.7 Summary 66

- 5 An Efficient Intelligent Traffic Light Control and Deviation System 69
 - 5.1 Introduction 69
 - 5.2 An Efficient Intelligent Traffic Light Control and Deviation System 70
 - 5.2.1 Elements of the Proposed Framework 70
 - 5.2.1.1 Sensors 70
 - 5.2.1.2 Data Collector Agent 71
 - 5.2.1.3 Data Processor Agent 71
 - 5.2.1.4 Intelligent Traffic Light Controller 71
 - 5.2.1.5 Intelligent Traffic Deviation System 72
 - 5.2.2 Vehicle Detection and Counting 72
 - 5.2.3 Vehicle Categorization 72
 - 5.2.4 Compute Vehicle Length Depending on Speed 72
 - 5.2.5 Light Control System and Measurement of Vehicle 74
 - 5.2.6 Traffic Deviation System 74
 - 5.3 Results and Discussion 74
 - 5.3.1 Conversion of Map to Graph 76
 - 5.3.2 Validation 77
 - 5.4 Summary 80

- 6 IoT-Based Intelligent Transportation System (IoT-ITS) 81
 - 6.1 Introduction 81
 - 6.2 Internet of Things 81
 - 6.3 Intelligent Transport System 84
 - 6.4 IoT-Based Intelligent Transport System 85
 - 6.5 S-ITS System Overview and Preliminaries 86
 - 6.5.1 Design Requirements of ITS System 86
 - 6.5.2 Design Goals 86
 - 6.5.2.1 Scalability 87
 - 6.5.2.2 Reliability 87
 - 6.5.2.3 User-Friendliness 87
 - 6.5.3 Experimental Design 87
 - 6.5.3.1 Vehicular Location Tracking 89
 - 6.5.3.2 Intelligent Vehicle Parking System 89
 - 6.5.3.3 Communication within a VANET 90
 - 6.5.3.4 Vehicular Big-Data Mining 90
 - 6.5.4 Implementation 90
 - 6.5.4.1 Big Data Techniques in ITS 90
 - 6.5.4.2 Classification of Multivariate Techniques 91

6.5.4.3	Multiple Regression Analysis.....	91
6.5.4.4	Multiple Discriminant Analysis	91
6.5.4.5	Logistic Regression	92
6.5.4.6	Conjoint Analysis	92
6.5.4.7	Cluster Analysis	93
6.6	Experiment Results and Discussions.....	93
6.7	Summary	98
7	Intelligent Traffic Light Control and Ambulance Control System	99
7.1	Introduction	99
7.2	Intelligent Traffic Light Control System.....	99
7.3	Ambulance Control System.....	100
7.3.1	Traffic Coordination at Road Intersections	101
7.4	Intelligent Traffic Light Control with an Ambulance Control System.....	102
7.4.1	Prototype Design Specification.....	103
7.4.2	Hardware Design and Connections.....	104
7.4.3	Compass Sensor Library – ADAFRUIT	104
7.4.4	Software Design and Coding.....	107
7.4.4.1	Traffic Light Control System Module	107
7.4.4.2	Ambulance Control System Module	109
7.4.4.3	Codes Download Constraints in Arduino, i.e. Uploading Coding into Arduino Board	112
7.4.4.4	Device Driver Installation.....	112
7.4.4.5	Benefits of Intelligent Traffic Light Control System with Ambulance Control System	112
7.4.4.6	Limitations of the Intelligent Traffic Light Control System with Ambulance Control System.....	112
7.5	Results and Discussion	113
7.6	Summary	117
8	Conclusions and Future Research.....	119
8.1	Conclusions.....	119
8.2	Scope for Future Research	121
	Bibliography.....	123
	Index	131
