

Detailed Contents

1. About Gypsum	1–22
1.1 The History of Gypsum and Gypsum Plaster	1
1.1.1 Minoans to the Romans	2
1.1.2 Gypsum in the Middle Ages	2
1.1.3 The Gypsum Plaster in Baroque and Rococo Period	3
1.1.4 Gypsum in Modern Times	3
1.2 The $\text{CaSO}_4 \cdot \text{H}_2\text{O}$ Crystal System	4
1.2.1 Phases	4
1.2.2 Laboratory Synthesis	7
1.2.3 Industrial Dehydration of Gypsum	8
1.2.4 Energy Aspects	9
1.2.5 Structure, Isomorphism, Mixed Compounds and Solubility Structure	9
1.3 Calcium Sulfate	10
1.4 Adducts	10
1.5 Solubility	10
1.6 Occurrence and Raw Materials	10
1.6.1 Gypsum and Anhydrite Availability	10
1.6.2 Gypsum in India	12
1.7 By-Product Gypsum	18
1.8 Flue-Gas Gypsum	18
1.8.1 Phosphogypsum	19
1.8.2 Fluorogypsum/Fluoroanhydrite	20
1.8.3 Other Variety of By-product Gypsum	20
1.9 Production	20
1.9.1 Natural Gypsum to Calcined Products	20
<i>References</i>	21

2. Production of Calcined Gypsum or Gypsum Plaster	23–66
2.1 Historic Background of Use of Gypsum Plaster	23
2.1.1 Conservation and Rehabilitation of Structures with Plaster	24
2.2 β -Hemi hydrate Plasters	26
2.2.1 Rotary Kiln Process	26
2.2.2 Kettle Process	27
2.2.3 Continuous Type Gypsum Kettles (Horizontal/ Conical Kettle Types)	37
2.3 Anhydrous and Multiphase Plasters	47
2.3.1 Alpha Hemihydrate	49
2.3.2 Process Control Parameters	49
2.4 Calcined Products from By-product Gypsum	50
2.4.1 β -Hemihydrate and Multiphase Plasters	50
2.4.2 Methods of α -Hemihydrate Plaster	52
2.5 Z-Gypsum Plaster	56
2.6 Anhydrite Plaster	56
2.7 Medical Plasters	57
2.7.1 Dental Plaster	57
2.7.2 Bandage Plaster	57
2.7.3 Surgical Plaster	58
2.8 Plaster of Paris for Ceramic Industries	58
2.9 Properties of Gypsum Plasters and Products and Anhydrite Plasters	59
2.9.1 Hydration, Setting and Hardening	59
2.9.2 The Assessment of Plaster	63
<i>References</i>	65
3. By-Product Gypsum	67–100
3.1 By-Product Gypsum	67
3.1.1 Waste Phosphogypsum	67
3.1.2 Fluoroanhydrite/Fluorogypsum	69
3.1.3 By-product Gypsum from Different Sources	69
3.2 Details of Phosphogypsum	70
3.2.1 Characterization of Phosphogypsum	70
3.2.2 Beneficiation of Phosphogypsum	75
3.3 Role of Phosphogypsum Impurities on Compressive Strength and Microstructure of β -Hemihydrate/Selenite Plaster	88
3.3.1 Morphology and Physical Characteristics of Selenite and Phosphogypsum Plasters	90

3.3.2 Combined Effect of Phosphatic Compounds with and without Organic Matter on the Selenite Plaster	90
--	----

<i>References</i>	98
-------------------	----

4. Gypsum in Cement Industry **101–122**

4.1 Manufacture of Cement	101
4.2 Effect of Phosphogypsum (Unprocessed) on the Properties of Portland Cement	103
4.2.1 Effect of Phosphates, Fluorides and Organic Matter	104
4.2.2 Retarding Mechanism of Water-Soluble Phosphates and Fluorides	105
4.2.3 Effect of Phosphates, Fluorides, and Organic Matter on the Compressive Strength of Cement	107
4.2.4 Effect of Beneficiated Phosphogypsum on Properties of Portland Cement	111
4.2.5 Studies on Heat of Hydration	113
4.3 Effect of By-product Gypsum on Hydration and Strength of Blended Cements	115
4.4 Influence of Blended Gypsum on the Properties of Portland Cement and Portland Slag cement	116
4.4.1 Energy Saving	120
<i>References</i>	121

5. Use of By-Product Gypsum in the Production of Super Sulphated Cement **123–148**

5.1 Raw Materials	123
5.1.1 Phosphoanhydrite	123
5.1.2 Granulated Blast Furnace Slag	124
5.1.3 Cement Clinker	124
5.2 Preparation of Super-sulphated Cement, Concrete and its Assessment	124
5.2.1 Concrete Making Properties of SSC	124
5.2.2 Effect of Temperature on Hydration of SSC	124
5.2.3 Grind-ability of Slag and Cement Clinker	125
5.2.4 Heat of Hydration	125
5.3 Phosphoanhydrite	125
5.4 Granulated Blast-Furnace Slag	126
5.4.1 Bulk Density, Glass Content and Refractive Index of Slags	127
5.4.2 Cement Clinker	127

5.5	Evaluation of Super-sulphated Cement	127
5.5.1	Properties of Super-sulphated Cement	127
5.5.2	Concrete Making Properties	130
5.5.3	Effect of Temperature on Hydration of SSC	131
5.5.4	Grind-ability of Slag and Clinker	132
5.5.5	Heat of Hydration	132
5.6	Use of Fluorogypsum in Making Super-sulphated Cement	133
5.6.1	Materials and Methods	134
5.6.2	Preparation of Super-Sulphated Cement, Concrete and its Assessment	134
5.6.3	Concrete Making Properties of SSC	135
5.6.4	Effect of Temperature on Hydration of SSC	135
5.6.5	Properties of Super-Sulphated Cement	135
5.6.6	Concrete Making Properties	138
5.6.7	Effect of Temperature on Hydration of SSC	138
5.6.8	Heat of Hydration	139
5.7	Super-sulphated Cement through Activation of β -Hemi-hydrate Plaster ($\text{CaSO}_4 \cdot \frac{1}{2} \text{H}_2\text{O}$)	140
5.7.1	Raw Materials	141
5.7.2	Preparation of Super-sulphated Cement (SSC)	141
5.7.3	Properties of SSC	142
	<i>References</i>	147
6.	Gypsum Building Products	149–198
6.1	Water-Resistant Gypsum Binder	150
6.1.1	Production and Properties of Gypsum Binder	150
6.1.2	Hydration Mechanism of Water-Resistant Gypsum Binder	153
6.2	Durability of Gypsum Binder	155
6.2.1	Effect of Outside Exposure on the Gypsum Binder	155
6.2.2	Performance of the Gypsum Binder in High Atmospheric Temperature and High Humidity	156
6.2.3	Water Absorption of Gypsum Binder	156
6.2.4	Efflorescence Studies on Gypsum Binder	157
6.3	Suitability of Gypsum Binder for Masonry Mortars	158
6.3.1	Compressive Strength	158
6.3.2	Bond Strength	158
6.3.3	Water Retaining Capacity	158

6.3.4 Predesign, Cost Estimates for the Production of Gypsum Binder	158
6.4 Masonry Cement from Phosphogypsum	162
6.5 Gypsum Plaster Boards	163
6.5.1 Production of Fibrous Gypsum Plaster Boards	164
6.5.2 Raw Materials	164
6.5.3 Properties of Fibrous Plaster Boards	165
6.5.4 Thermal Conductivity	166
6.5.5 Predesign, Cost Estimates for the Production of Fibrous Gypsum Plaster Boards	167
6.5.6 Casting of Large Size Plaster Boards	168
6.6 Glass Reinforced Gypsum Binder Composites	169
6.6.1 Microstructure at the Interface	172
6.6.2 Durability of Glass Fibre	173
6.6.3 Gypsum Fibre Board	175
6.7 Gypsum Bonded Particle Board	177
6.7.1 End-use Characteristics and Applications for Gypsum Bonded Particle Boards	178
6.7.2 Gypsum Door Shutters	179
6.8 Gypsum Blocks	180
6.8.1 Casting of Large Size Blocks	182
6.8.2 Gypsum Bricks	182
6.8.3 Prefabricated Gypsum Building Components	183
6.8.4 Water Proof Gypsum Cabinet	186
6.8.5 Polymerized Gypsum	187
6.9 New Plaster Compositions from Gypsum	190
6.9.1 Development of Multiphase Plaster	190
6.9.2 Applications of Multiphase Plaster	191
6.9.3 Waste Gypsum from Intermediate Dye Industries	191
<i>References</i>	196

7. Anhydrite Plaster Based Building Products 199–248

7.1 Preparation of Phosphonahydrate	199
7.1.1 Properties of Anhydrite Plaster	200
7.1.2 Physical Testing and Evaluation of Anhydrite Cement/Plaster	202
7.1.3 Assessment of Anhydrite Plaster	203
7.1.4 Hydration Mechanism of Anhydrite	211
7.1.5 Microstructure of Hydrated Anhydrite	213

7.1.6	Effect of Temperature	213
7.1.7	Uses of Phosphogypsum Anhydrite in Construction Works	214
7.2	Polymerised Anhydrite Plaster for Use in Flooring Composition	219
7.2.1	Methodology	219
7.2.2	Production of Anhydrite from Phosphogypsum	220
7.2.3	Preparation of Flooring Tiles	220
7.2.4	Properties of Phosphoanhydrite and Its Hydration	221
7.2.5	Hydration of Anhydrite in Presence of Polymer	222
7.2.6	Properties of Flooring Tiles	222
7.2.7	Durability of Phosphogypsum Tiles	223
7.2.8	Techno-economic Feasibility	224
7.2.9	Newer Applications of Polymerised Gypsum	225
7.3	Phosphogypsum Based Water-Resistant Anhydrite Binder	226
7.3.1	Durability of Phospho Anhydrite Binder	226
7.4	Utilization of By-product Fluorogypsum	229
7.4.1	Beneficiation of Fluorogypsum	230
7.4.2	Preparation of Gypsum Binder/Plaster	231
7.4.3	Properties of Fluorogypsum Plaster/Binder	232
7.4.4	Water Absorption and Porosity of Fluorogypsum Binder/Plaster	234
7.4.5	Effect of Lime Sludge on the Fluorogypsum Binder Produced by Blending Activators	234
7.4.6	Development of Bricks from Fluorogypsum Binders	235
7.5	Fluorogypsum Based Cementitious Binders	238
7.5.1	Preparation of Cementitious Binders	239
7.5.2	Durability of Cementitious Binder	241

8. Rapid Wall Gypsum Panels/Gypcrete **249–266**

8.1	Rapid Wall Panels for Buildings	249
8.2	Rapid Wall Panels	249
8.3	Residential Buildings Using Rapid Wall Panels	250
8.3.1	Low Cost Mass Housing	250
8.4	Manufacture of Wall Panels in India	251
8.4.1	Production of RWP	252
8.4.2	Manufacture of Gypsum Plaster	253

8.5 Characteristics of RWP	256
8.5.1 How Gypcrete buildings will be able to resist earthquakes better compared to conventional load bearing brick/concrete block construction?	256
8.5.2 Protection against Corrosion	257
8.6 Rapid Wall Panels for Use in Rapid Construction	258
8.6.1 Rapid Construction Method	258
8.6.2 Joints	258
8.6.3 Concrete Infill	259
8.6.4 Embedded RCC tie Beam All Around at Each Level Floor/Roof Slab	260
8.6.5 Rapid Wall for Floor/ Roof Slab in Combination with RCC	260
8.6.6 Finishing Work	261
8.7 Concluding Remarks	262

9. Radioactivity in Gypsum	267–290
9.1 European and National Regulations of Natural Radioactivity of Building Materials	268
9.2 Industrial By-products Incorporated in Building Materials	271
9.3 Radon Emanation from Building Materials and Regulations	273
9.4 Radiation in Waste Gypsum	274
9.4.1 Radiation Exposures in Phosphogypsum Disposal Environment	277
9.5 Dissolution Characteristics of ^{226}Ra from Phosphogypsum	284
9.5.1 Collection of Phosphogypsum Samples and Methodology	284
9.5.2 Leaching Performance of Phosphogypsum	286
<i>References</i>	289
10. Market Potential Assessment of Gypsum Industry	291–324
10.1 Market Potential Assessment	291
10.2 Markets Trend and Consumption	296
10.2.1 Top Producers	298
10.2.2 Technology Trends	299
10.2.3 Products Trends	299

10.3 Chemical Gypsum	300
10.3.1 Phosphogypsum	300
10.4 Premixed Lightweight Gypsum Plasters	304
10.4.1 Vermiculite Plasters	304
10.5 Properties and Uses of Perlite	311
10.5.1 Perlite	311
10.5.2 Analysis of Perlite	311
10.5.3 Properties of Ready-Mix Gypsum - Perlite Plaster	312
10.5.4 Advantages	312
10.5.5 The Filling Compound for Dry Perlite Mixes	312
10.5.6 Advantages of Perlite Dry Mixtures	313
10.5.7 Heat-Insulating Mixes, Method of Application	313
10.5.8 Applications of Expanded Perlite in Gypsum Products	314
10.6 Agricultural Uses of Phosphogypsum and Gypsum	317
10.6.1 Phosphogypsum	317
<i>References</i>	322
11. Standardisation of Gypsum and Gypsum Products	325–350
11.1 Types of Gypsum	326
11.1.1 Mineral Gypsum	326
11.1.2 By-product Gypsum	327
11.2 Aims of Study	329
11.2.1 Standards Specifications for Gypsum	329
11.2.2 Indian Standards Specifications for Gypsum for Various Uses	329
11.3 Indian Standards Specifications for Plaster of Paris for Ceramic Industries (IS : 2333–1992)	338
11.4. Requirements of Gypsum Building Plaster (IS : 2547–1976)	340
11.5 American Standards Specifications	341
11.6 Specifications of Various Types of Gypsum Consumed in Cement Industry	343
11.7 Global Trends of Gypsum	344
