

Contents

Introduction	1
1 Basics of thermodynamics	3
1.1 Structure of matter	3
1.2 Heat and temperature	4
1.3 Thermal expansion	6
1.4 Ideal gas law	8
1.4.1 Dalton's law	9
1.5 First law of thermodynamics	10
1.6 Specific heat capacity	13
1.7 Phase transitions	16
1.8 Building energy balance	19
1.9 Heat pumps and engines	21
1.9.1 Introduction	22
1.9.2 Gas processes	23
1.9.3 Carnot cycle	25
2 Heat transfer	31
2.1 Introduction	31
2.2 Conduction	31
2.2.1 Fourier's law	32
2.2.2 Thermal resistance of multiple layers	34
2.2.3 Multidimensional conduction	36
2.2.4 Dynamic conduction	38
2.2.5 Contact of two materials at different temperatures	42
2.2.6 Half-space material with the harmonic change of temperature	43
2.3 Convection	48
2.3.1 Newton's law of cooling	49
2.3.2 Heat and enthalpy exchangers	52
2.4 Radiation	53
2.4.1 Grey bodies	56
2.4.2 Net radiation exchange between surfaces	59
2.4.3 Radiative transfer between the wall surface and the environment	64
2.4.4 Infrared thermography	67
3 Heat transfer in building components	71
3.1 Homogeneous building components	71
3.1.1 Solid wall	71

3.1.2	Determination of characteristic temperatures . . .	74
3.1.3	Wall with airspace	78
3.1.4	Double-glazed window	81
3.1.5	Solar gain	85
3.2	Inhomogeneous building components and thermal bridges	90
3.2.1	Simplified calculation	91
3.2.2	Thermal bridges	93
3.2.3	Dimension systems	97
3.2.4	Linear thermal bridges	98
3.2.5	Point thermal bridges	99
3.2.6	Thermal transmittance of windows	101
3.3	Overall heat losses of the building	102
3.3.1	Direct heat losses	103
3.3.2	Heat losses through the ground	104
3.3.3	Heat losses through unconditioned spaces	107
3.3.4	Heat losses through ventilation	108
3.3.5	Transmission and overall heat losses	111
3.4	Passive house	111
4	Moisture in building components	117
4.1	Introduction	117
4.2	Air humidity	120
4.3	Psychrometrics	124
4.4	Building components moisture	129
4.4.1	Hygroscopic damping	130
4.4.2	Capillary damping	133
4.5	Water vapour diffusion	137
4.5.1	Fick's first law	137
4.5.2	Mass convection	140
4.5.3	Water vapour diffusion through the building component	141
4.5.4	Determination of characteristic water vapour pressures	143
4.5.5	Multidimensional diffusion	147
4.5.6	Dynamic diffusion	148
4.6	Moisture transfer with condensation	152
4.6.1	Glaser method	152
4.6.2	Dynamic moisture and heat transfer	158
4.7	Requirements concerning building components	161
4.8	Comfort conditions	163
5	Basics of waves	169
5.1	Disturbance and pulse	169
5.2	Travelling waves	171
5.3	Wave equation	173
5.4	Pulse interactions	175
5.4.1	Reflection	176
5.4.2	Transmission	177
5.4.3	Superposition	178
5.5	Standing waves	179

6	Sound propagation	185
6.1	Introduction	185
6.1.1	Wave function	187
6.1.2	Power and energy transfer	190
6.1.3	Logarithmic description of sound power and intensity	193
6.2	Sound sources and their properties	195
6.2.1	Isotropic point sound source	196
6.2.2	Isotropic linear sound source	197
6.2.3	Isotropic surface sound source	198
6.2.4	Directivity correction	199
6.2.5	Spectral characteristics	200
6.3	Human perception of sound and sound rating	201
6.3.1	Noise	201
6.3.2	Physiological perception	201
6.3.3	Psychological perception	203
6.4	Determination of the environmental sound pressure level	206
6.4.1	Measurement of environmental noise	207
6.4.2	Calculation of environmental noise	209
6.4.3	Road traffic	210
6.5	Noise abatement	212
7	Building acoustics	217
7.1	Acoustic properties of materials	217
7.2	Room acoustics	219
7.2.1	Echo	219
7.2.2	Diffuse sound field	220
7.2.3	Reverberation time	223
7.3	Sound absorbers	225
7.3.1	Porous sound absorbers	226
7.3.2	Membrane sound absorbers	227
7.3.3	Helmholtz sound absorbers	228
7.4	Sound transmission and insulation	229
7.4.1	Mass law	232
7.4.2	Measuring and rating the airborne sound reduction index	234
7.4.3	Measuring and rating the impact sound pressure level	236
8	Illumination	243
8.1	Introduction	243
8.2	Optical properties of materials	245
8.3	Photometry	247
8.3.1	Wavelength perception	247
8.3.2	Directivity perception	249
8.3.3	Diffusive light sources	254
8.3.4	View factor	256
8.4	Light sources	257
8.4.1	Position of the Sun	257
8.4.2	Natural light sources	262
8.4.3	Artificial light sources	264

8.5	Calculation of illuminance	266
8.6	Requirements regarding building illumination	268
