Preface.....xvii

Authors.....xix

Chapter 1 General Introduction..... 1

1.1 Zero Energy Buildings..... 1

1.2 The Sun and the Earth 2

1.2.1 The Sun 2

1.2.2 The Earth..... 4

1.2.3 Sun–Earth Angles..... 5

1.2.4 Solar Radiation..... 9

1.3 Climate 13

1.3.1 Climatic Conditions..... 13

1.3.2 Weather Conditions 15

1.3.3 Macro- and Microclimate..... 15

1.3.3.1 Macroclimate 15

1.3.3.2 Microclimate 15

1.4 Passive Houses..... 16

1.4.1 Strategies for Passive Design 16

1.4.1.1 Solar Access 16

1.4.1.2 Wind Control..... 16

1.5 Architectural Design of Passive Buildings 17

1.5.1 Site Planning 17

1.5.1.1 Building Location and Orientation 17

1.5.1.2 Building Orientation 18

1.5.1.3 Clustering..... 18

1.5.2 Envelope Design or Building Envelope 18

1.5.2.1 Building Shape..... 18

1.5.2.2 Entrances and Windows 19

1.5.2.3 Solar Shading Techniques..... 19

1.5.2.4 Insulation..... 20

1.5.2.5 Infiltration Reduction 22

1.5.3 Interior Design..... 22

1.6 Bioclimatic Design 23

1.6.1 History..... 23

1.6.2 Building Design Strategies Depending on Climatic Conditions 25

1.7 Energy Conservation 26

1.7.1 Introduction 26

1.7.2 Energy Consumption..... 26

1.7.3 Energy Efficiency 26

1.8 Design Approach to ZEB..... 28

1.8.1 Stage 0: Research 28

1.8.2 Stage 1: Reduce..... 29

1.8.3 Stage 2: Reuse 31

1.8.4 Stage 3: Produce..... 32

1.9 Case Study of an Energy Neutral Building 34

Objective Questions..... 35

Answers	36
Problems	37
References	37
Chapter 2 Basic Heat Transfer	41
2.1 Introduction	41
2.2 Conduction	41
2.2.1 Temperature Field	42
2.2.2 Fourier's Heat Conduction Equation	42
2.2.3 Thermal Conductivity	43
2.2.4 Thermal Diffusivity	43
2.2.5 Conductive Heat Transfer Coefficient	44
2.2.6 Dimensionless Heat Conduction Parameters	44
2.2.6.1 Biot Number (Bi)	44
2.2.6.2 Fourier Number	45
2.3 Convection	46
2.3.1 Dimensionless Heat Convection Parameters	46
2.3.1.1 Nusselt Number (Nu)	47
2.3.1.2 Reynolds Number (Re)	47
2.3.1.3 Prandtl Number (Pr)	47
2.3.1.4 Grashof Number (Gr)	48
2.3.1.5 Rayleigh Number (Ra)	48
2.3.2 Types of Convection	56
2.3.2.1 Free Convection	56
2.3.2.2 Forced Convection	56
2.3.2.3 Mixed-Mode Convection	59
2.4 Convective Heat Transfer Coefficient	59
2.5 Radiation	60
2.5.1 Radiation Involving Real Surfaces	60
2.5.2 Kirchhoff's Law	61
2.5.3 Laws of Thermal Radiation	61
2.5.3.1 Planck's Law	61
2.5.3.2 Wien's Displacement Law	62
2.5.3.3 Stefan-Boltzmann Law	62
2.5.3.4 Sky Radiation	62
2.5.4 Radiative Heat Transfer Coefficient	64
2.6 Evaporation (Mass Transfer)	66
2.7 Total Heat Transfer Coefficient	68
2.8 Overall Heat Transfer Coefficient	69
2.8.1 Parallel Slabs	70
2.8.2 Parallel Slabs with Air Cavity	71
2.9 Thermal Circuit Analysis	73
2.9.1 Composite Wall	73
2.9.2 Composite Roof	74
2.10 Energy Balance	75
2.10.1 Energy Balance for Winter's Day	75
2.10.2 Energy Balance on a Cloudy Day	75
2.10.3 Energy Balance on a Summer's Day in an Air-Conditioned Building	77
2.10.4 Energy Balance for Intermediate Season Like Spring and Autumn	78
Objective Questions	79

Answers	81
Problems	81
References	82
 Chapter 3 Thermal Comfort	85
3.1 Introduction	85
3.2 Physical Aspects	86
3.2.1 Air Temperature	86
3.2.2 Relative Humidity	86
3.2.3 Air Movement	87
3.2.4 Mean Radiant Temperature	88
3.2.5 Air Pressure	90
3.2.6 Air Ingredients	90
3.2.7 Air Electricity	90
3.2.8 Acoustics	90
3.2.9 Daylighting	90
3.2.9.1 Windows and Fenestrations	91
3.2.9.2 Skylights	92
3.2.9.3 Solar Tubes	92
3.2.9.4 Semi-Transparent Solar Photovoltaic Lighting System (SSPLS) and Transparent Facades	92
3.2.9.5 Light Shelves	93
3.2.9.6 Sawtooth Roofs	94
3.2.9.7 Heliostats	94
3.2.9.8 Smart Glass Windows	94
3.2.9.9 Hybrid Solar Lighting (HSL)	95
3.3 Physiological Aspects	95
3.3.1 Nutritional Intake	95
3.3.2 Age	95
3.3.3 Ethnic Influences	95
3.3.4 Gender Differences	95
3.3.5 Constitution	95
3.4 Behavioral Aspects	96
3.4.1 Clothing	96
3.4.2 Activity Level	96
3.4.3 Adaptation and Acclimatization	97
3.4.4 Time of the Day/Season	98
3.4.5 Occupancy	98
3.4.6 Psychological Factors	98
3.5 The Comfort Equation	99
3.5.1 Conduction	99
3.5.2 Convection	100
3.5.3 Radiation	101
3.5.4 Evaporation	102
3.5.5 Respiration	103
3.6 Thermal Comfort Indices	103
3.6.1 Predicted Mean Vote (PMV) Index	103
3.6.2 Predicted Percentage Dissatisfied (PPD) Index	104
3.6.3 Adaptive Comfort Standard	106
3.6.3.1 Field Studies and Rational Indices	106
3.6.3.2 Rational Approach	106

3.6.4	Visual Comfort	106
3.7	Building Performance Parameters	106
3.7.1	Thermal Load Leveling (TLL)	106
3.7.2	Decrement Factor	107
3.8	Related Standards	107
	Objective Questions.....	107
	Answers.....	108
	References	109
Chapter 4	Energy and Exergy Analysis	111
4.1	Introduction	111
4.1.1	Brief History of Thermodynamics	111
4.2	Laws of Thermodynamics	111
4.2.1	The Zeroth Law of Thermodynamics.....	112
4.2.2	The First Law of Thermodynamics	112
4.2.3	The Second Law of Thermodynamics.....	112
4.2.4	The Third Law of Thermodynamics.....	114
4.3	Energy Analysis.....	114
4.3.1	Introduction	114
4.3.2	Energy Matrices	115
4.3.3	Embodied Energy Analysis	115
4.3.4	Energy Density Analysis	115
4.3.4.1	Process Analysis.....	116
4.3.4.2	Input-Output Analysis	116
4.3.4.3	Hybrid Analysis	116
4.3.5	An Overall Thermal Energy	116
4.3.5.1	Energy Payback Time (EPBT).....	116
4.3.6	Energy Production Factor (EPF)	118
4.3.7	Life Cycle Conversion Efficiency (LCCE)	118
4.3.8	Energy Matrices of Photovoltaic (PV) Module.....	121
4.4	Exergy Analysis.....	122
4.4.1	Low-Grade and High-Grade Energy	124
4.4.1.1	Exergy as a Process.....	124
4.4.2	Exergy Efficiency	125
4.4.3	Solar Radiation Exergy.....	126
4.4.3.1	Exergy Analysis Methods	127
4.4.4	Exergy Analysis of Photovoltaic Thermal (PVT) Systems	129
4.5	Case Study with Roof-Mounted BiPVT System	130
4.5.1	Description	130
4.5.2	Overall Embodied Energy, EPBT, EPF.....	131
	Objective Questions.....	133
	Answers.....	134
	Problems.....	135
	References	135
Chapter 5	Solar Cell Materials, PV Modules and Arrays	139
5.1	Introduction	139
5.2	Basics of Semiconductors and Solar Cells	139
5.2.1	Intrinsic Semiconductor	141
5.2.2	Non-Intrinsic Semiconductor	142

5.2.3	Fermi Level in Semiconductor	142
5.2.4	p-n Junction	143
5.2.5	Photovoltaic Effect	143
5.2.6	Solar Cell (Photovoltaic) Materials	144
5.2.6.1	Silicon (Si)	145
5.2.6.2	Single-Crystal Solar Cell	145
5.2.7	Basic Parameters of Solar Cells	147
5.3	Photovoltaic (PV) Modules and PV Arrays	151
5.3.1	Single-Crystal Solar Cells PV Module	151
5.3.2	Thin-Film PV Modules	151
5.3.3	Packing Factor (β_p) of PV Module	152
5.3.4	Efficiency of PV Modules	152
5.3.5	Energy Balance Equations for PV Modules	153
5.3.5.1	For Opaque (Glass to Tedlar) PV Modules	153
5.3.5.2	For Semi-Transparent (Glass-to-Glass) PV Modules	154
5.3.6	Series and Parallel Combination of PV Modules	156
5.3.7	Degradation of Solar Cell Materials	156
5.3.7.1	Dust Effect	156
5.3.7.2	Aging Effect	156
	Objective Questions	157
	Answers	158
	References	159

Chapter 6 Static Design Concept for a Light-Structured Building for Cold Climatic

	Conditions	161
6.1	Introduction	161
6.2	Sol-Air Temperature	161
6.2.1	Bare Surface	161
6.2.2	Wetted Surface	163
6.2.3	Blackened and Glazed Surface	163
6.3	Thermal Gain	164
6.3.1	Direct Gain	164
6.3.1.1	Direct Gain through Semi-Transparent Photovoltaic (SPV) System	165
6.3.1.2	Direct Gain through Glazed Windows	167
6.3.1.3	Net Thermal Energy Gains	168
6.3.2	Indirect Gains	170
6.3.2.1	Thermal Storage Wall/Roofs	171
6.3.2.2	Trombe Walls	171
6.3.2.3	Waterwalls	174
6.3.2.4	Trans Walls	174
6.3.2.5	Solariums	174
6.3.3	Isolated Gain	175
6.3.4	Direct and Indirect Gain through Photovoltaic Thermal (PVT) Systems Integrated with Building	176
6.3.4.1	Semi-Transparent Photovoltaic (SPV) Roof Integrated with Building's Rooftop	176
6.3.4.2	Photovoltaic Thermal (PVT) Trombe Walls	177
6.3.4.3	Integration of Roof (with Vent) with Semi-Transparent Photovoltaic Modules	177
6.3.4.4	Integration of Roof with Opaque Photovoltaic Modules	179

6.3.4.5	PVT Solariums.....	180
	Objective Questions.....	180
	Answers	181
	References	181
Chapter 7	Dynamic Design Concepts for Hot Climatic Conditions	183
7.1	Introduction	183
7.2	Phase Change Materials (PCMs).....	183
7.3	Infiltration/Natural Ventilation.....	184
7.3.1	Smart Windows	186
7.3.2	Literature Study: Infiltration/Natural Ventilation	186
7.3.3	Shading.....	186
7.3.4	Windows.....	187
7.3.4.1	Self-Inflating Curtains.....	187
7.3.4.2	Window Quilt Shade	187
7.3.4.3	Venetian Blind between the Glasses	188
7.3.4.4	Transparent Heat Mirrors.....	188
7.3.4.5	Solar Shading Devices	188
7.3.4.6	Roofs.....	188
7.3.5	Walls.....	188
7.3.5.1	Heat Trap.....	188
7.3.5.2	Optical Shutter	188
7.3.5.3	Shading by Textured Surface	189
7.3.5.4	Trees and Vegetation	189
7.4	Literature Study: Shading.....	189
7.5	Thermotropic and Thermochromic Coatings	190
7.6	Courtyards	190
7.7	Air Cavities.....	191
7.7.1	Literature Study: Air Cavity.....	191
7.8	Green Roofs/Cool Roofs	192
7.8.1	Literature Study: Cool Roof.....	193
7.8.2	Evaporative Cooling.....	193
7.8.3	Literature Study: Evaporative Cooling.....	195
7.9	Radiative Cooling	195
7.9.1	Literature Study: Radiative Cooling.....	196
7.10	Movable Insulation	197
7.11	Dynamic Insulation Walls.....	197
7.11.1	Exterior Insulation.....	197
7.11.2	Interior Insulation	197
7.12	Wind Towers.....	197
7.12.1	Literature Study: Wind Towers.....	198
7.13	Air Vents	198
7.14	Rock Bed Regenerative Cooler	199
7.15	Earth Coupling.....	199
7.15.1	Earth-Air Heat Exchanger (EAHE).....	199
7.15.1.1	Literature Study: EAHE.....	202
7.16	Roof Pond.....	203
7.16.1	Literature Study: Roof Pond-Passive Cooling	203
7.16.2	Trombe Walls.....	204
7.17	Different Compositions of Trombe Wall	205

7.17.1	Vented Trombe Wall	205
7.17.2	Phase Change Material (PCM) Trombe Wall	205
7.17.3	Photovoltaic Integrated Phase Change Materials (PV-PCM) Wall	207
7.17.4	Heat Transfer in Trombe Walls.....	207
7.17.4.1	U-Value	207
7.17.4.2	Rate of Heat Transfer	209
7.17.5	Efficiency Analysis of Trombe Wall.....	209
7.17.5.1	Vent	209
7.17.5.2	Size.....	209
7.17.5.3	Fan.....	210
7.17.5.4	Material and Color	210
7.17.5.5	Insulation.....	210
7.18	Solar Cooling.....	211
7.18.1	Solar Photovoltaic Cooling.....	211
	Objective Questions.....	211
	Answers.....	212
	Problems.....	213
	References	213

Chapter 8	Building Integrated Photovoltaic Thermal System (BiPVT)	219
8.1	Introduction	219
8.2	Literature Review of BiPV/ BiPVT Systems	220
8.3	Types of PV Integrations with Buildings.....	220
8.3.1	Rooftop.....	220
8.3.2	Facade.....	221
8.3.3	Other Applications.....	221
8.4	Building Integrated Opaque Photovoltaic Systems (BiOPV).....	223
8.4.1	Opaque Photovoltaic System Integrated with Rooftop	223
8.4.2	Opaque Photovoltaic System Integrated with Façade	224
8.5	Building Integrated Semi-Transparent Photovoltaic (BiSPVT) System	225
8.5.1	Semi-Transparent Photovoltaic System Integrated with Rooftop.....	225
8.5.2	Facade-Building Integrated Semi-Transparent Photovoltaic (BiSPVT) System	226
8.6	BiOPVT and BiSPVT System on Rooftop and Façade.....	227
8.7	Use of PV Modules in an Urban Settings.....	227
8.8	Energy and Exergy Analysis of BiSPVT System	228
8.8.1	Working Principle.....	229
8.8.2	Thermal Modeling.....	229
8.8.3	Basic Energy Balance Equations.....	230
8.8.4	Comparative Statement of Proposed Cases (a–d)	237
8.9	Performance Evaluation of the Proposed Systems	241
8.9.1	For BiSPVT System (Case a)	241
8.9.2	For BiSPVT System with Water Flow (Case b)	241
8.9.3	For BiSPVT System with Heat Capacity (Case c).....	241
8.9.4	For BiSPVT System with Heat Capacity and Water Flow (Case d).....	243
8.9.5	BiSPVT System Heat Capacity with Movable Insulation and South-Facing Window (Case e)	243

8.10	Input Variables of BiSPVT System: Case Studies.....	246
8.10.1	Number of Air Changes.....	246
8.10.2	Velocity of the System.....	248
8.10.3	Packing Factor.....	248
8.10.4	Relative Humidity	248
8.10.5	Transmissivity of Glass	248
8.10.6	Mass of Water.....	248
8.10.7	Mass Flow Rate	249
8.11	BiSPVT System Based on the PV Cell Type.....	249
8.11.1	Literature Study	249
8.11.2	Performance of BiSPVT System Based on PV Types: A Case Study	250
	Objective Questions.....	252
	Answers	253
	References	254

Chapter 9	Environmental Aspects.....	259
9.1	Introduction	259
9.2	Life Cycle Assessment	259
9.2.1	Basic Definitions of Life Cycle Assessment	261
9.2.2	The Main Stages of Life Cycle Assessment.....	261
9.3	Embodied Energy	261
9.3.1	Embodied Energy of Different Materials	262
9.3.2	Embodied Energy of Different Construction Materials	262
9.3.3	Embodied Energy in Floor/Roofing Systems.....	263
9.3.4	Embodied Energy in Transportation of Building Materials	264
9.3.5	Embodied Energy of PV Module	264
9.3.5.1	Energy for Non-Silicon PV Modules.....	266
9.3.5.2	Energy for Balance of System (BOS).....	266
9.3.6	Embodied Energy and Annual Output of Renewable Energy Technologies	267
9.3.7	Guidelines for Reducing Embodied Energy.....	267
9.4	Modeling of Embodied Energy for BiPVT Systems.....	268
9.4.1	Masonry Building.....	268
9.4.2	Photovoltaic Thermal (PVT) System	268
9.4.3	Balance of System (BOS).....	269
9.5	Embodied Carbon.....	270
9.5.1	Example of Estimation of Embodied Carbon Dioxide for Concret.....	270
9.6	Carbon Dioxide Emissions	271
9.7	Earned Carbon Credits and Carbon Dioxide Mitigation	274
9.7.1	Formulation	275
9.8	Case Study with the BiPVT System	276
9.9	Kyoto Protocol and the United Nations Framework Convention on Climate Change	276
9.9.1	The Protocol and the Green Growth.....	278
9.10	Carbon Dioxide Mitigation with Use of Photovoltaics	278
	Objective Questions.....	279
	Answers.....	280
	References	280

Chapter 10	Life Cycle Analysis	283
10.1	Introduction	283
10.2	Cash Flow Diagram	284
10.3	Cost Analysis	285
10.3.1	Capital Recovery Factor	285
10.3.2	Uniform Annual Cost	297
10.3.3	Sinking Fund Factor	299
10.3.4	Linear Gradient Series Present Value Factor	304
10.3.5	Gradient to Equal Payment Series Conversion Factor	306
10.3.6	Linear Gradient Series Future Value Factor	307
10.4	Capitalized Cost	308
10.5	Cost Comparisons with Equal Duration	309
10.6	Net Present Value (NPV)	311
10.6.1	Limitations of the NPV Method	312
10.7	Cost Comparisons with Unequal Duration	312
10.7.1	Single Present Value Method (Method I)	313
10.7.2	Annual Cost Method (Method II)	314
10.7.3	Capitalized Cost Method (Method III)	315
10.7.4	Method IV	315
10.8	Payback Time	316
10.8.1	Analytical Expression for Payback Time	316
10.8.2	Payback Period without Interest	318
10.8.3	Payback Period with Interest	318
10.9	Benefit–Cost Analysis	320
10.9.1	Types of Benefit–Cost Analysis	322
10.9.1.1	Aggregate B/C Ratio	322
10.9.1.2	Net B/C Ratio	322
10.9.2	Advantages and Disadvantages of B/C Ratio	323
10.10	Internal Rate of Return	327
10.10.1	Iterative Method to Compute IRR	328
10.10.2	Multiple Values of IRR	331
10.11	Effect of Depreciation	332
10.11.1	Expression for Book Value	334
10.11.2	Straight-Line Depreciation	334
10.11.3	Sinking Fund Depreciation	335
10.11.4	Accelerated Depreciation	336
10.12	Cost Comparison after Taxes	338
10.12.1	Without Depreciation	338
10.12.2	With Depreciation	339
10.13	Estimating Cost of a Project	342
10.13.1	Capital Cost	342
10.13.2	Variable Cost	342
10.13.3	Step-Variable Cost	342
10.13.4	Non-Product Cost	342
10.14	A Case Study of Building Integrated Photovoltaic Thermal (BiPVT) Systems	343
10.14.1	Cost Estimation	343
10.14.2	Modeling of Annualized Uniform Cost	344
10.14.3	Methodology	344
10.14.4	Results and Discussions	345
