1 AN OVERVIEW OF GEOSYNTHETICS 1

1.0 Introduction 1

1.1 Basic Description of Geosynthetics 2

1.1.1 Families of Geosynthetics 3

1.1.2 Market Activity 6

1.2 Polymeric Materials 6

1.2.1 Brief Overview 7

1.2.2 Polymer Identification 11

1.2.3 Polymer Formulations 22

1.3 Overview of Geotextiles 24

1.3.1 History 24

1.3.2 Manufacture 25

1.3.3 Current Uses 33

1.3.4 Sales 34

1.4 Overview of Geogrids 36

1.4.1 History 36

1.4.2 Manufacture 37

- 1.4.3 Current Uses 38
- 1.4.4 Sales 39

1.5 Overview of Geonets 40

- 1.5.1 History 40
- 1.5.2 Manufacture 40
- 1.5.3 Current Uses 42
- 1.5.4 Sales 42

1.6 Overview of Geomembranes 42

- 1.6.1 History 42
- 1.6.2 Manufacture 43
- 1.6.3 Current Uses 52
- 1.6.4 Sales 54

1.7 Overview of Geosynthetic Clay Liners 54

- 1.7.1 History 54
- 1.7.2 Manufacture 55
- 1.7.3 Current Uses 57
- 1.7.4 Sales 57

1.8 Overview of Geopipe (aka Plastic Pipe) 57

- 1.8.1 History 57
- 1.8.2 Manufacture 58
- 1.8.3 Current Uses 59
- 1.8.4 Sales 60

1.9 Overview of Geocomposites 60

- 1.9.1 Geotextile-Geonet Composites 60
- 1.9.2 Geotextile-Geomembrane Composites 61
- 1.9.3 Geomembrane-Geogrid Composites 61
- 1.9.4 Geotextile-Geogrid Composites 61
- 1.9.5 Geotextile-Polymer Core Composites 61
- 1.9.6 Geosynthetic-Soil Composites 62
- 1.9.7 Other Geocomposites 63
- 1.9.8 Geofoam 63

- 1.10 Outline of the Book 63**
 - References 64**
 - Problems 65**

2 DESIGNING WITH GEOTEXTILES 69

2.0 Introduction 69

2.1 Design Methods 70

- 2.1.1 Design by Cost and Availability 70
- 2.1.2 Design by Specification 70
- 2.1.3 Design by Function 79

2.2 Geotextile Functions and Mechanisms 80

- 2.2.1 Separation 80
- 2.2.2 Reinforcement 81
- 2.2.3 Filtration 84
- 2.2.4 Drainage 91
- 2.2.5 Liquid Containment (Barrier) 92
- 2.2.6 Combined Functions 92

2.3 Geotextile Properties and Test Methods 93

- 2.3.1 General Comments 93
- 2.3.2 Physical Properties 95
- 2.3.3 Mechanical Properties 97
- 2.3.4 Hydraulic Properties 116
- 2.3.5 Endurance Properties 127
- 2.3.6 Degradation Properties 137
- 2.3.7 Summary 146

2.4 Allowable Versus Ultimate Geotextile Properties 147

- 2.4.1 Strength-Related Problems 147
- 2.4.2 Flow-Related Problems 149

2.5 Designing for Separation 150

- 2.5.1 Overview of Applications 151
- 2.5.2 Burst Resistance 151
- 2.5.3 Tensile Strength Requirement 154
- 2.5.4 Puncture Resistance 155
- 2.5.5 Impact (Tear) Resistance 158
- 2.5.6 Summary 161

2.6 Designing for Roadway Reinforcement 162

- 2.6.1 Unpaved Roads 162
- 2.6.2 Membrane-Encapsulated Soils 173
- 2.6.3 Paved Roads 180

2.7 Designing for Soil Reinforcement 181

- 2.7.1 Geotextile Reinforced Walls 181
- 2.7.2 Geotextile Reinforced Embankments 202
- 2.7.3 Geotextile Reinforced Foundation Soils 211
- 2.7.4 Geotextiles for Improved Bearing Capacity 222
- 2.7.5 Geotextiles for In-Situ Slope Stabilization 226

2.8 Designing for Filtration 234

- 2.8.1 Overview of Applications 234
- 2.8.2 General Behavior 235
- 2.8.3 Geotextiles Behind Retaining Walls 235
- 2.8.4 Geotextiles Around Underdrains 240
- 2.8.5 Geotextiles Beneath Erosion Control Structures 242
- 2.8.6 Geotextile Silt Fences 246
- 2.8.7 Summary 251

2.9 Design for Drainage 252

- 2.9.1 Overview of Applications 252
- 2.9.2 General Behavior 254
- 2.9.3 Gravity Drainage Design 254
- 2.9.4 Pressure Drainage Design 258
- 2.9.5 Capillary Migration Breaks 260
- 2.9.6 Summary 262

2.10 Designing for Multiple Functions 262

- 2.10.1 Introduction 262
- 2.10.2 Reflective Crack Prevention in Bituminous Pavement Overlays 263
- 2.10.3 Railroad Applications 275
- 2.10.4 Flexible Forming Systems 279

2.11 Construction Methods and Techniques Using Geotextiles 291

- 2.11.1 Introduction 291
- 2.11.2 Geotextile Survivability 292
- 2.11.3 Cost and Availability Considerations 293
- 2.11.4 Summary 294

References 295

Problems 302

3 DESIGNING WITH GEOGRIDS 315

3.0 Introduction 315

3.1 Geogrid Properties and Test Methods 319

- 3.1.1 Physical Properties 319
- 3.1.2 Mechanical Properties 319
- 3.1.3 Endurance Properties 330
- 3.1.4 Degradation Properties 333
- 3.1.5 Allowable Strength Considerations 334

3.2 Designing for Geogrid Reinforcement 336

- 3.2.1 Paved Roads—Base Courses 336
- 3.2.2 Paved Roads—Pavements 340
- 3.2.3 Unpaved Roads 343
- 3.2.4 Embankments and Slopes 346
- 3.2.5 Walls 355
- 3.2.6 Bearing Capacity via Base Reinforcement 365
- 3.2.7 Veneer Cover Soils 369

3.3 Design Critique 378

3.4 Construction Methods 380

References 381

Problems 383

4 DESIGNING WITH GEONETS 387

4.0 Introduction 387

4.1 Geonet Properties and Test Methods 388

- 4.1.1 Physical Properties 389
- 4.1.2 Mechanical Properties 391
- 4.1.3 Hydraulic Properties 393
- 4.1.4 Endurance Properties 398
- 4.1.5 Environmental Properties 401
- 4.1.6 Allowable Flow Rate 402

4.2 Designing with Geonet Drainage 404

- 4.2.1 Theoretical Concepts 404

- 4.2.2 Transportation-Related Applications 405
- 4.2.3 Environmental-Related Applications 408

4.3 Design Critique 410

4.4 Construction Methods 411

References 412

Problems 412

5 DESIGNING WITH GEOMEMBRANES 415

5.0 Introduction 415

5.1 Geomembrane Properties and Test Methods 416

- 5.1.1 Overview 416
- 5.1.2 Physical Properties 417
- 5.1.3 Mechanical Properties 424
- 5.1.4 Endurance Properties 443
- 5.1.5 Lifetime Prediction Techniques 453
- 5.1.6 Summary 460

5.2 Survivability Requirements 461

5.3 Liquid Containment (Pond) Liners 463

- 5.3.1 Geometric Considerations 463
- 5.3.2 Typical Cross Sections 465
- 5.3.3 Geomembrane Material Selection 469
- 5.3.4 Thickness Considerations 470
- 5.3.5 Side-Slope Considerations 473
- 5.3.6 Runout and Anchor Trench Design 487
- 5.3.7 Summary 494

5.4 Covers for Reservoirs 494

- 5.4.1 Overview 494
- 5.4.2 Fixed Covers 495
- 5.4.3 Floating Covers 497
- 5.4.4 Quasisolids Covers 503
- 5.4.5 Complete Encapsulation 503

5.5 Water Conveyance (Canal) Liners 503

- 5.5.1 Overview 503
- 5.5.2 Basic Considerations 505
- 5.5.3 Unique Features 508
- 5.5.4 Summary 513

5.6 Solid Material (Landfill) Liners 513

- 5.6.1 Overview 514
- 5.6.2 Siting Considerations and Geometry 519
- 5.6.3 Typical Cross Sections 520
- 5.6.4 Grading and Leachate Removal 523
- 5.6.5 Material Selection 533
- 5.6.6 Thickness 534
- 5.6.7 Puncture Protection 535
- 5.6.8 Runout and Anchor Trenches 537
- 5.6.9 Side Slope Soil Stability 538
- 5.6.10 Side Slope Liner Stability 539
- 5.6.11 Access Ramps 542
- 5.6.12 Stability of Solid Waste 544
- 5.6.13 Piggyback Landfills 544
- 5.6.14 Heap Leach Pads 546
- 5.6.15 Solar Ponds 547
- 5.6.16 Summary 547

5.7 Landfill Covers and Closures 550

- 5.7.1 Overview 550
- 5.7.2 Various Cross Sections 552
- 5.7.3 Gas Collection Layer 554
- 5.7.4 Barrier Layer 555
- 5.7.5 Surface Water Drainage Layer 559
- 5.7.6 Protection Layer 560
- 5.7.7 Surface Layer 561
- 5.7.8 Aesthetic Considerations 562

5.8 Underground Storage Tanks 563

- 5.8.1 Overview 563
- 5.8.2 Low-Volume Systems 563
- 5.8.3 High-Volume Systems 563
- 5.8.4 Tank Farms 565

5.9 Geotechnical Applications for Geomembranes 565

- 5.9.1 Earth and Earth/Rock Dams 565
- 5.9.2 Concrete and Masonry Dams 566
- 5.9.3 Geomembrane Dams 568
- 5.9.4 Tunnels 568
- 5.9.5 Vertical Cutoff Walls 568

5.10 Geomembrane Seams 571

- 5.10.1 Seaming Methods 571
- 5.10.2 Destructive Seam Tests 577
- 5.10.3 Nondestructive Seam Tests 580
- 5.10.4 Summary 584

5.11 Details and Miscellaneous Items 586

- 5.11.1 Connections 586
- 5.11.2 Appurtenances 586
- 5.11.3 Leak Location Techniques 588
- 5.11.4 Wind Uplift 591
- 5.11.5 Quality Control and Quality Assurance 591

5.12 Summary 594**References 596****Problems 602****6 GEOSYNTHETIC CLAY LINERS 613****6.0 Introduction 613****6.1 GCL Properties and Test Methods 617**

- 6.1.1 Physical Properties 617
- 6.1.2 Hydraulic Properties 620
- 6.1.3 Mechanical Properties 625
- 6.1.4 Endurance Properties 630

6.2 Equivalency Issues 631**6.3 Designing with GCLs 633**

- 6.3.1 GCLs as Single Liners 633
- 6.3.2 GCLs as Composite Liners 636
- 6.3.3 GCLs as Composite Covers 639
- 6.3.4 GCLs on Slopes 641

6.4 Design Critique 643**6.5 Construction Methods 644****References 646****Problems 648**

7 DESIGNING WITH GEOPIPES 650**7.0 Introduction 650****7.1 Geopipe Properties and Test Methods 652**

- 7.1.1 Physical Properties 653
- 7.1.2 Mechanical Properties 655
- 7.1.3 Chemical Properties 664
- 7.1.4 Biological Properties 666
- 7.1.5 Thermal Properties 666
- 7.1.6 Geopipe Specifications 666

7.2 Theoretical Concepts 668

- 7.2.1 Hydraulic Issues 669
- 7.2.2 Deflection Issues 676

7.3 Design Applications 681

- 7.3.1 Pavement Underdrains—Perforated Profile Collection Pipes 681
- 7.3.2 Primary Leachate Collection Systems—
Perforated Profile Collection Pipes 682
- 7.3.3 Liquid Transmission—Solid Wall Uniform Pipe
with Deflection Calculations 687

7.4 Design Critique 688**7.5 Construction Methods 689**

- 7.5.1 Subgrade Preparation 690
- 7.5.2 Connections 691
- 7.5.3 Placement 692
- 7.5.4 Backfilling Operations 694

7.6 References 694**7.7 Problems 696****8 DESIGNING WITH GEOCOMPOSITES 697****8.0 Introduction 697****8.1 Separation 698**
