<b>Comparison of Strength Parameters Obtained from Back Analyses of a Landslide with Laboratory Tests and with Special Reference to Artesian Pressure</b> R. NAKANO and H. SHIMIZU, Gifu University, Japan	1081
<b>Undrained Behaviour of Loosely Compacted Fills and its Implications on Slope Stabilisation Measures</b> C. W. W. NG and C. F. CHIU, Hong Kong University of Science & Technology, Hong Kong	1087
<b>Influence of Drying and Wetting History on the Stability of Unsaturated Soil Slopes</b> C. W. W. NG, Y. W. PANG and S. S. CHUNG, Hong Kong University of Science and Technology, Hong Kong	1093
<b>Stabilisation and Remediation of a Minor Landslide Affecting the A5 Trunk Road at Llangollen, North Wales</b> D. NICHOL, North East Wales Trunk Road Agency – Geotechnical Group, Wrexham, Wales and R. D. W. LOWMAN, Wardell Armstrong, Newcastle under Lyme, UK	1099
<b>Excavation-Induced Deterioration of Rockslopes</b> D. T. NICHOLSON, A. C. LUMSDEN, School of Earth Sciences, University of Leeds, UK and S. R. HENCHER, Halcrow Asia Partnership, Hong Kong	1105
<b>Earthquake-Triggered Landsliding and Historical Seismicity in Southeastern Sicily: a Discrepancy</b> P. G. NICOLETTI, G. IOVINE and E. CATALANO, CNR-IRPI, Roges di Rende CS, Italy	1111
<b>Eco-Engineering Techniques to Control Landslides at Gasing Hill in Peninsular Malaysia</b> M. T. NORAINI, S. M. LAU, Faculty of Science and Technology, University Kebangsaan Malaysia, D. H. BARKER, Geostructures Consulting, Model Farm, Edenbridge, Kent, UK, N. G. BAYFIELD, Institute of Terrestrial Ecology, Banchory Research Station, Scotland, UK	1117
<b>In-Situ Shear and Pull-Out Testing to Demonstrate the Enhanced Shear Strength of Root Reinforced Soil</b> J. E. NORRIS and J.R. GREENWOOD, The Nottingham Trent University, Nottingham, United Kingdom.	1123
<b>Seismically-induced Reactivation of Lain/Zorten Landslide (Eastern Switzerland)</b> F. NOVERRAZ and CH. BONNARD, Swiss Federal Institute of Technology, Lausanne, Switzerland	1129

<b>Permeability and Soil Moisture Conditions of Landslides in Clayey Rocks</b> J. NOVOTNÝ and J. RYBÁŘ, Institute of Rock Structure and Mechanics, Academy of Sciences of Czech Republic	1135
<b>Protections of Transportation Systems Against Rockfalls</b> C. OGGERI and D. PEILA, Dept. of Georisorse e Territorio, Politecnico di Torino, Torino, Italy	1141
<b>Excess Pore Pressure Generation of Sandy Soil during Shearing</b> Y. OKADA, Kyoto University, Kyoto, Japan, K. SASSA and H. FUKUOKA, Disaster Prevention Research Institute, Kyoto University, Kyoto, Japan	1147
<b>A Novel Approach to the Modelling of Deep Complex Landslides with Several Sliding Planes</b> Ž. ORTOLAN, RNK – Geomod d.d., Zagreb, Croatia	1153
<b>Erosion Rates From Seismically-Induced Landslides in Irpinia, Southern Italy</b> M. PARISE, National Research Council, CERIST, Bari, Italy	1159
<b>Geomorphic and Sedimentologic Features of Debris-Flow Related Alluvial Fans in the Sila Massif (Southern Italy)</b> M. PARISE, National Research Council, CERIST, Bari and D. CALCATERRA, Dept. of Geotechnical Engineering, Section of Applied Geology, Federico II Univ. of Napoli, Italy	1165
<b>Risk Assessment and Quantification of Slope Conditions Based Upon Site Inspection Surveys</b> S. PARKHURST, Allott & Lomax Consulting Engineers, Reading, UK and R. FLAVELL, Hyder, Birmingham, UK	1171
<b>Typical Kaolin Occurrences in Hong Kong - a Model for their Origin and Implications for Landslide Development</b> S. PARRY, S. D. G. CAMPBELL and C. J. N. FLETCHER, Planning Division, Geotechnical Engineering Office, Civil Engineering Department, Kowloon, Hong Kong SAR, China	1177
<b>The Mineralogy of Clay-Rich Zones within some Weathered Volcanic and Granitic Rocks in Hong Kong.</b> S. PARRY and C.A.M. FRANKS, Planning Division, Geotechnical Engineering Office, Civil Engineering Department, Government of Hong Kong, Special Administrative Region, China	1183
<b>Application of Time Domain Reflectometry (TDR) Technique in Monitoring the Pramollo Pass Landslide (Province of Udine, Italy)</b> A. PASUTO, S. SILVANO, C.N.R.-I.R.P.I. Research Institute for Hydrological and Geological Hazard Prevention, Padova, and G. BERLASSO, Regional Head Office for Civil Defence, Friuli-Venezia Giulia Region, Italy	1189

<b>Kinematic Features of Earthflows in Southern Italy</b>	1195
A. PELLEGRINO, M. RAMONDINI, Dip. di Ingegneria Geotecnica, Università di Napoli "Federico II", C. RUSSO, Servizio Nazionale Dighe, Servizi Tecnici Nazionali, Roma and G. URCIUOLI, Dip. di Ingegneria Geotecnica, Università di Napoli "Federico II", Italy	
<b>The Development of a Landslide Hazard Assessment Scheme for a Mountainous Area in E. Taiwan</b>	1203
D. N. PETLEY and W. MURPHY, Centre for Geohazard Research, School of Earth, Environmental and Physical Sciences, University of Portsmouth, Burnaby Building, Portsmouth, UK	
<b>Specific Character of the Multistory Landslide Mechanism</b>	1209
L. P. PETROVA-JASJUNAS, Russian State Open Technical University of Railway Transport, Moscow, Russia	
<b>Practical Method for Estimating General Stability of Structures under Seismic Loads</b>	1215
M. B. POIZNER, R & D Institute of Marine Transport "ChernomorNIiproekt", 12, Shevchenko Ave. Odessa, 65058, Ukraine, M. P. DOUBROVSKY, 34, Mechnikova Str., Odessa 65029, Ukraine, and A.I. GURIN, R & D Institute of Marine Transport "ChernomorNIiproekt", 12, Shevchenko Ave. Odessa, 65058, Ukraine	
<b>Rainfall as a Landslide Triggering Factor: An Overview of Recent International Research</b>	1219
M. POLEMIO, CNR CERIST, Bari, Italy, and O. PETRUCCI, CNR IRPI, Cosenza, Italy	
<b>Linear Versus Non-linear Failure Envelopes in LEM and FEM Slope Stability Analysis</b>	1227
M. POPESCU, University of Civil Engineering, Bucharest, Romania, K. UGAI, Department of Civil Engineering, Gunma University, Japan, and A. TRANDAFIR, University of Civil Engineering, Bucharest, Romania	
<b>The Role of Stress-Strain State Changes of a Slope in the Formation of a Deep Block-Type Landslide and Deformation of Constructions Interacting with it</b>	1235
G. P. POSTOYEV, All-Russian Research Institute for Hydrogeology & Engineering Geology (VSEGINGEO), Moscow, Russia	
<b>Feedback Effects of Rainfall-Triggered Shallow Landsliding</b>	1239
N. J. PRESTON, Geographische Institute, Universität Bonn, Germany	
<b>Realignment of Priory Corner, Isle of Portland, Dorset</b>	1245
R. S. PUGH, K. R. GABRIEL, WEEKS, Maidstone, W. G. JENKINS, Dorset C.C. and E. N. BROMHEAD, Kingston University, UK	
<b>Slope Disintegration in South China</b>	1253
S. J. QIU, South China Normal University, P.R. China	

- Landslide Hazard, Vulnerability and Risk Assessment** 1257  
A. L. RAGOZIN, Institute of Environmental Geoscience (IGE RAN), Russian Academy of Sciences, Moscow and I. O. TIKHVINSKY, Production & Research Institute for Engineering Construction Survey (PNIIS), Moscow, Russia
- Some Aspects of Landslides in the Himalayas: a Case Study of Jammu and Kashmir Himalayas (India)** 1263  
NATER SINGH RAINA, Govt. Degree College Kathua, J & K state, India
- The Detection of Relict Landslides using Airborne Thematic Mapper Imagery** 1269  
M. F. RAMLI, D. N. PETLEY, W. MURPHY, Geohazards Research Centre, School of Earth, Environmental and Physical Sciences, University of Portsmouth, Burnaby Building, Burnaby Road, Portsmouth, UK and R. J. INKPEN, School of Geography, Buckingham Building, Lion Terrace, Portsmouth, UK
- Otira Gorge Rock Avalanche** 1275  
G. RAMSAY, Beca Carter Hollings and Ferner Ltd, New Zealand
- Rockfalls and Slides in a Limestone Massif (Portugal), Spatial Assessment, Control and Triggering Factors** 1281  
M. L. RODRIGUES, Centre of Geographical Studies, University of Lisbon, Portugal
- Aptitude of Slopes to Stability Failure in the Neovolcanite Region of České Středohoří Mountains (Czech Republic)** 1285  
J. RYBAR, J. STEMBERK and J. SUCHY, Institute of Rock Structure and Mechanics, Academy of Sciences of the Czech Republic, Prague, CZ
- Estimation of the Next Happening of a Landslide by Observing the Change in the Groundwater Composition** 1289  
HIROYUKI SAKAI and HISASHI TARUMI, Railway Technical Research Institute, Hikan-cho 2-8-38, Kokubunji, Tokyo, Japan
- Study of a Relict Landslide on the Foothills of the Belluno Prealps (Belluno, Italy)** 1295  
L. SALT, M. C. TURRINI and E. SEMENZA, Dipartimento di Scienze Geologiche e Paleontologiche, Corso Ercole I D'Este 32, 44100 Ferrara, Italy
- Slope Stability Analysis in Soft Rocks** 1301  
R. T. SANCIO, University Simon Bolivar, Caracas, Venezuela; R. B. SANCIO, University of California at Berkeley, USA and S. C. HOLTZ, Jacobs Associates, San Francisco, California, USA
- Risk Assessment of Potential Landslide Dams in the Valleys of La Veveyse and Veveyse de Fegire, Switzerland** 1309  
S. SARKAR, Scientist, Central Building Research Institute, Roorkee, India, CH. BONNARD and F. NOVERRAZ, Scientific Deputy, Swiss Federal Institute of Technology, Lausanne, Switzerland
- Mechanical Model of Shear Deformation of a Steep Sandy Slope due to Rainfall** 1315  
K. SASAHARA, Public Works Research Institute, Ministry of Construction, Tsukuba, Japan

- Geophysical Method Contribution to the Super Sauze (South France) Flowslide Knowledge** 1321  
M. SCHMUTZ, CEREG, Université Louis Pasteur, Strasbourg, R. GUERIN, DGA, Université Pierre et Marie Curie, Paris, J. J. SCHOTT, EOST, Université Louis Pasteur, Strasbourg, O. MAQUAIRE, CEREG, Université Louis Pasteur, Strasbourg, M. DESCLOITRES and Y. ALBOUY, LDG, ORSTOM, Bondy, France
- Impact of Rockfalls on Soft Water Saturated Floodplain Sediments, Three Examples from the Swiss Rhone Valley** 1327  
P. SCHOENEICH, Institute of Geography, Lausanne, Switzerland
- Early Holocene Damnation Creek Landslide Dam, Washington State, U.S.A.** 1333  
R. L. SCHUSTER, U.S. Geological Survey, Denver, Colorado, J. L. RIEDEL, National Park Service, Marblemount, Washington and P. T. PRINGLE, Washington Department of Natural Resources, Olympia, Washington, U.S.A.
- Rigid Formations Over Plastic Substratum: Modelling of a Lateral Spread in Central Italy** 1339  
N. SCIARRA, Department of Earth Science, Chieti University -Campus Universitario - Madonna delle Piane, 66013 - Chieti, Italy
- Instability Phenomena and Remedial Measures for a Landslide in Clay Shales** 1347  
A. SCIOTTI and G. CALABRESI, DISG, University of Rome "La Sapienza", Italy
- Analysis of Instability Phenomena Affecting a Cut Slope in Unsaturated Pyroclastic Soils** 1353  
A. SCOTTO di SANTOLO, M. VALERIO NICOTERA, M. RAMONDINI, Dipartimento di Ingegneria Geotecnica – Università di Napoli Federico II Napoli Italy
- Ground Models for the Coastal Landslides at Lyme Regis, Dorset, UK** 1361  
M. SELLWOOD, High-Point Rendel, London, G. DAVIS, West Dorset District Council, Dorset, D. BRUNSDEN, Consultant, Dorset and R. MOORE, Halcrow Asia, Hong Kong (formerly with High-Point Rendel)
- Landslide Classification Based on the Property of Slip Surface** 1367  
H. SHUZUI, Research and Development Centre, Nippon Koei Co. Ltd., Japan
- Methods for General Stability Analysis** 1373  
A. D. W. SPARKS, Department of Civil Engineering, University of Cape Town, Rondebosch, South Africa
- Post Failure Behaviour of Landslide Bodies** 1379  
G. SPILOTRO, L. COVIELLO, Dipartimento di Strutture, Geotecnica e Geologia Applicata. Università della Basilicata. Potenza, R. TRIZZINO, CNR - Centro di Studio sulle Risorse Idriche e la Salvaguardia del Territorio. Bari, Italy
- Coastal Erosion and Landslides, Rockland, Maine, U.S.A.** 1387  
J. F. SPLETTSTOESSER, Polar Consulting, Spruce Head, Maine, USA

<b>Stability of Lateritic Profiles in Parts of Western Ghats, India</b>	1395
S. SREEKUMAR, Christ College, Irinjalakuda, India and R. KRISHNANATH, University of Kerala, Trivandrum, India	
<b>Mechanisms of Failure of Complex Landslides: A Numerical Modelling Perspective</b>	1401
D. STEAD, University of Exeter, Redruth, Cornwall, B. BENKO, P. Machibroda Engineering Ltd., Chilliwack, British Columbia, Canada, E. EBERHARDT Swiss Federal Institute of Technology (ETH), Zurich, Switzerland and J. S. COGGAN, University of Exeter, Redruth, Cornwall, UK	
<b>Stabilisation of a Landslip near Godstone, Surrey</b>	1407
M. STEPHEN, Surrey County Council, Kingston-upon-Thames, and D. RENTON-ROSE, Hyder Consulting, Guildford, UK.	
<b>Caldera-like Collapses at the Watersheds in the Central Tien Shan: their Structure and Possible Mechanism</b>	1413
