|-----------------------------------------------------------------------------------|------|
| Foreword                                                                          | iv   |
| Introduction                                                                      | v    |
| 1 Scope                                                                           | 1    |
| 2 Normative references                                                            | 2    |
| 3 Terms, definitions, symbols and abbreviated terms                               | 2    |
| 4 Pressure rating                                                                 | 22   |
| 4.1 $MPR_{xx}$                                                                    | 22   |
| 4.2 Part factors and partial factors                                              | 25   |
| 4.2.1 Part factor $f_2$ for loading                                               | 25   |
| 4.2.2 Part factor $f_{3,est}$ for the limited axial load capability of GRP piping | 25   |
| 4.2.3 Partial factor $A_0$ for design life                                        | 25   |
| 4.2.4 Partial factor $A_2$ for chemical resistance                                | 25   |
| 4.2.5 Partial factor $A_3$ for cyclic loading                                     | 25   |
| 5 Classification                                                                  | 25   |
| 5.1 Joints                                                                        | 25   |
| 5.1.1 Unrestrained joints                                                         | 25   |
| 5.1.2 Classification of joints                                                    | 26   |
| 5.2 Resin matrix                                                                  | 26   |
| 6 Materials                                                                       | 27   |
| 7 Dimensions                                                                      | 28   |
| Annex A (informative) Principle                                                   | 30   |
| Annex B (informative) Guidance on scope limitations                               | 36   |
| Annex C (normative) Enquiry sheet                                                 | 37   |
| Annex D (normative) Wall thickness definitions                                    | 40   |
| Annex E (informative) Selection of part factor $f_{3,est}$ in the bid process     | 42   |
| Annex F (informative) Worked example                                              | 48   |
| Bibliography                                                                      | 67   |
