Preface.....	ix
Biographies	xi

Chapter 1	Cementitious Construction Materials Sustainability:	
	An Introduction	1
1.1	Introduction	1
1.2	Cement-Generated Environmental Problems	2
1.3	Energy Problems in Cement Industries	2
1.4	Concrete Performance in Aggressive Environments	3
1.5	Crack Problems in Concrete.....	4
1.6	Sustainability of Smart Concrete.....	5
1.7	Effect of Addition Self-Healing Agents on Concrete Properties	5
1.8	Life Cycle Analysis of Self-Healing Concrete	6
1.9	Summary.....	6

Chapter 2	Self-Healing Technology: Fundamental and Design Strategies.....	11
2.1	Introduction	11
2.2	Sustainability of Self-Healing Concrete	12
2.3	Mechanisms of Self-Healing in Cementitious Materials.....	14
2.4	Design Strategies	14
	2.4.1 Release of Healing Agent.....	15
	2.4.2 Reversible Cross-Links	16
	2.4.3 Miscellaneous Technologies.....	17
2.5	Summary.....	17

Chapter 3	Self-Healing Cementitious Materials	21
3.1	Introduction	21
3.2	Self-Healing Processes in Concrete.....	21
3.3	Expansive Agents and Mineral Admixtures	24
3.4	Hollow Fibers	24
3.5	Bacteria as Self-Healing Agent	27
3.6	Microencapsulation	27
3.7	Shape Memory Materials as Self-Healer.....	29
3.8	Coating	30
3.9	Engineered Cementitious Composite	31
3.10	Nanomaterials-Based Self-Healing Concrete.....	33
3.11	Self-Healing in Fiber-Reinforced Concrete.....	33
3.12	Summary.....	34

Chapter 4	Self-Healing Measurement Methods.....	41
4.1	Concrete Durability	41
4.2	Self-Healing Techniques.....	42
4.3	Self-Healing Measurement Methods.....	45
4.4	Efficacy of Autonomous Healing Techniques	46
4.5	Structure Tests for Evaluating Self-Healing Efficiency	46
4.5.1	Macrostructure Tests	47
4.5.2	Microstructure Tests	48
4.5.3	Nanostructure Tests	48
4.6	Comparison of Assessment Tests	49
4.7	Summary.....	50
Chapter 5	Polymers-Based Self-Healing Cementitious Materials.....	55
5.1	Introduction	55
5.2	Mix Design and Specimens' Preparation	57
5.3	Fresh Properties	60
5.4	Strength Properties	61
5.5	Self-Healing Performance	68
5.6	Developing an ANN to Estimate Degree of Damage and Healing Efficiency	74
5.6.1	Firefly Optimization Algorithm (FOA)	76
5.6.2	Generation of Training and Testing Data Sets.....	77
5.6.3	Results	79
5.7	Summary.....	82
Chapter 6	Bacteria-Based Self-Healing Concrete.....	87
6.1	Introduction	87
6.2	Self-Healing Approach	88
6.3	Effect of Bacteria.....	90
6.4	Summary.....	93
Chapter 7	Nanomaterials-Based Self-Healing Cementitious Materials.....	97
7.1	Introduction	97
7.2	Significance of Nanomaterials as Self-Healing	97
7.3	Production of Nanomaterials.....	97
7.4	Nanomaterials-Based Concretes.....	99
7.5	Production of Nanoconcrete	99
7.6	Nanomaterials-Based Self-Healing Concrete	100
7.7	Nanosilica	101
7.8	Nanoalumina.....	102
7.9	Carbon Nanotube.....	102
7.10	Polycarboxylates.....	103
7.11	Titanium Oxide.....	104

7.12	Nanokaolin	104
7.13	Nanoclay.....	105
7.14	Nanoiron.....	106
7.15	Nanosilver.....	106
7.16	Summary.....	107
Chapter 8	Factors Affecting Concrete Self-Healing Performance.....	113
8.1	Impact of Crystalline Admixtures on Self-Healing	113
8.2	Polymers as Self-Healing Material.....	116
8.3	Fibers as Self-Healing Material	118
8.4	Self-Healing Performance	120
8.5	Summary.....	121
Chapter 9	Encapsulation Technology-Based Self-Healing Cementitious Materials.....	123
9.1	Introduction	123
9.2	Bio-Based Healing Agents: Approaches and Mechanisms	124
9.3	Incorporation of Encapsulated Healing Agents.....	126
9.4	Evaluation of Bio-Based Self-Healing Systems.....	128
9.5	Summary.....	130
Chapter 10	Applications, Future Directions, and Opportunities of Self-Healing Concrete.....	133
10.1	Introduction	133
10.2	Sustainability of Smart Materials-Based Self-Healing Concrete and Nanotechnology	134
10.3	Merits and Demerits of Nanomaterials for Self-Healing Concrete.....	134
10.4	Economy of Nanomaterials-Based Self-Healing Concretes	135
10.5	Environmental Suitability and Safety Features of Nanomaterials-Based Concretes	136
10.6	Summary.....	137
