Contributors .....xv

## SECTION I Design for Product Safety

**Chapter 1** Reducing the Risk to Consumers: Implications for Designing Safe Consumer Products.....3  
*Damien J. Williams and Jan M. Noyes*

**Chapter 2** Consumer Product Risk Assessment.....23  
*Aleksandar Zunjic*

**Chapter 3** Hazard Control Hierarchy and Its Utility in Safety Decisions about Consumer Products.....33  
*Kenneth R. Laughery and Michael S. Wogalter*

**Chapter 4** Communication-Human Information Processing Stages in Consumer Product Warnings .....41  
*Michael S. Wogalter, Kenneth R. Laughery, and Christopher B. Mayhorn*

**Chapter 5** Safety Design under the Perspective of Ergonomics in Consumer Products: Accident Studies in Users Welfare Promotion .....69  
*Walter Franklin M. Correia, Marcelo M. Soares, Marina de Lima N. Barros, and Mariana P. Bezerra*

**Chapter 6** Product Design Issues Related to Safe Patient Handling Technology .....89  
*Thomas R. Waters*

**Chapter 7** Ergonomics of Packaging.....101  
*Aleksandar Zunjic*

## SECTION II *Design for Usability*

|                   |                                                                                                                             |     |
|-------------------|-----------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Chapter 8</b>  | User Research by Designers.....                                                                                             | 127 |
|                   | <i>Stephen J. Ward</i>                                                                                                      |     |
| <b>Chapter 9</b>  | Near Field Communication: Usability of a Technology.....                                                                    | 143 |
|                   | <i>Bruce Thomas and Ramon van De Ven</i>                                                                                    |     |
| <b>Chapter 10</b> | Empathy Meets Engineering: Implanting the User's Perspective into a<br>Systematic Design Process.....                       | 161 |
|                   | <i>Matthias Göbel</i>                                                                                                       |     |
| <b>Chapter 11</b> | Building Empathy with the User.....                                                                                         | 177 |
|                   | <i>Louise Moody, Elaine Mackie, and Sarah Davies</i>                                                                        |     |
| <b>Chapter 12</b> | Usability Testing of Three Prototype In-Vehicle Information Systems.....                                                    | 199 |
|                   | <i>Margaret J. Trotter, Eve Mitsopoulos-Rubens, and Michael G. Lenné</i>                                                    |     |
| <b>Chapter 13</b> | Ergonomics and Usability in an International Context.....                                                                   | 213 |
|                   | <i>Sinja Röbig, Muriel Didier, and Ralph Bruder</i>                                                                         |     |
| <b>Chapter 14</b> | Consumer eHealth.....                                                                                                       | 227 |
|                   | <i>Christopher P. Nemeth and Richard I. Cook</i>                                                                            |     |
| <b>Chapter 15</b> | Consumer Behavior of Employees Using Information and Communication<br>Technology Products in an Organizational Setting..... | 241 |
|                   | <i>Ken Eason</i>                                                                                                            |     |

## SECTION III *Case Studies*

|                   |                                                                                                       |     |
|-------------------|-------------------------------------------------------------------------------------------------------|-----|
| <b>Chapter 16</b> | Constraint-Based Approach to Design.....                                                              | 257 |
|                   | <i>Daniel P. Jenkins, Neville A. Stanton, Paul M. Salmon, and Guy H. Walker</i>                       |     |
| <b>Chapter 17</b> | Development of a Media Player: Ambition and Constraints in the Consumer<br>Electronics Industry ..... | 271 |
|                   | <i>John Jansen and Bruce Thomas</i>                                                                   |     |
| <b>Chapter 18</b> | Interaction Design for Mobile Phones.....                                                             | 285 |
|                   | <i>Wen-Chia Wang, Mark S. Young, and Steve Love</i>                                                   |     |

**Chapter 19** Human Factors in Protective Headgear Design ..... 301  
*Roger Ball*

**Chapter 20** Creating a User-Centered Supermarket Checkout ..... 315  
*Matthew Lyons and David Hitchcock*

**Chapter 21** Design and Development of an Interactive Kiosk for Customers of  
Jobcentre Plus ..... 335  
*David Hitchcock, James O'Malley, and Peter Rogerson*

**Chapter 22** Participatory Method for Evaluating Office Chairs: A Case Study ..... 365  
*Lia Buarque de Macedo Guimarães*

**Chapter 23** Procedural Pictorial Sequences for Health Product Design: A Study of Male  
and Female Condoms Conducted with Adults with a Low Level of Literacy in  
Brazil ..... 393  
*Carla Galvao Spinillo, Tiago Costa Maia, and Evelyn Rodrigues Azevedo*

**Chapter 24** Special Needs in Pleasure-Based Products Design: A Case Study..... 407  
*Erminia Attaianese*

**Chapter 25** Applied Anthropometry in Ergonomic Design for School Furniture ..... 419  
*Luis Carlos Paschoarelli and José Carlos Plácido da Silva*

**Chapter 26** Anthropometric Fitting of Office Furniture for Mexican Users ..... 429  
*Lilia R. Prado-León*

**Chapter 27** User-Centered Approach for Sailing Yacht Design ..... 445  
*Giuseppe Di Bucchianico and Andrea Vallicelli*

**Chapter 28** Design for Driver's Comfort: Discomfort Assessment and Discomfort  
Manifestation among Professional and Amateur Car Drivers ..... 465  
*David Ravník*

**Chapter 29** Ergonomics as a Strategy Tool: An Approach through Design ..... 483  
*Jairo José Drummond Câmara and Róber Dias Botelho*

**Index**..... 493
