

Contents

<i>Dedication</i>	iii
<i>Preface</i>	iv
1. Convolutional Neural Networks and Applications on Civil Infrastructure	1
<i>Onur Avci, Osama Abdeljaber, Serkan Kiranyaz, Turker Ince and Daniel J. Inman</i>	
2. Identifying Non-linearity in Construction Workers' Personality: Safety Behaviour Predictive Relationship Using Neural Network and Linear Regression Modelling	30
<i>Yifan Gao, Vicente A. González, Tak Wing Yiu and Guillermo Cabrera-Guerrero</i>	
3. Machine Learning Framework for Predicting Failure Mode and Flexural Capacity of FRP-Reinforced Beams	52
<i>Ahmad N. Tarawneh and Eman F. Saleh</i>	
4. A Novel Formulation for Estimating Compressive Strength of High Performance Concrete Using Gene Expression Programming	74
<i>Iman Mansouri, Jale Tezcan and Paul O. Awoyera</i>	
5. Implementation of Data-Driven Approaches for Condition Assessment of Structures and Analyzing Complex Data	91
<i>Vafa Soltangharai, Li Ai and Paul Ziehl</i>	
6. Automatic Detection of Surface Thermal Cracks in Structural Concrete with Numerical Correlation Analysis	120
<i>Diana Andrushia, Anand, N., Richard Walls, Daniel Paul T. and Prince Arulraj</i>	
7. State-of-the-Art Research in the Area of Artificial Intelligence with Specific Consideration to Civil Infrastructure, Construction Engineering and Management, and Safety	140
<i>Islam H. El-adaway and Rayan H. Assaad</i>	
8. Artificial Intelligence in Concrete Materials: A Scientometric View	161
<i>Zhanzhao Li and Aleksandra Radlińska</i>	

9. Active Learning Kriging-Based Reliability for Assessing the Safety of Structures: Theory and Application	184
<i>Koosha Khorramian and Fadi Oudah</i>	
10. A Bayesian Estimation Technique for Multilevel Damage Classification in DBHM	232
<i>William Locke, Stefani Mokalled, Omar Abuodeh, Laura Redmond and Christopher McMahan</i>	
11. Machine Learning and IoT Data for Concrete Performance Testing and Analysis	261
<i>Andrew Fahim, Tahmid Mehdi, Ali Taheri, Pouria Ghods, Aali Alizadeh and Sarah De Carufel</i>	
12. Knowledge-enhanced Deep Learning for Efficient Response Estimation of Nonlinear Structures	275
<i>Haifeng Wang and Teng Wu</i>	
13. Damage Detection in Reinforced Concrete Girders by Finite Element and Artificial Intelligence Synergy	298
<i>Hayder A. Rasheed, Ahmed Al-Rahmani and AlaaEldin Abouelleil</i>	
14. Deep Learning in Transportation Cyber-Physical Systems	331
<i>Zadid Khan, Sakib Mahmud Khan, Mizanur Rahman, Mhafuzul Islam and Mashrur Chowdhury</i>	
15. Artificial Intelligence in the Construction Industry: Theory and Emerging Applications for the Future of Work	348
<i>Amir H. Behzadan, Nipun D. Nath and Reza Akhavian</i>	
16. The Use of Machine Learning in Heat Transfer Analysis for Structural Fire Engineering Applications	380
<i>Yavor Panev, Tom Parker and Panagiotis Kotsovinos</i>	
17. Using Artificial Intelligence to Derive Temperature Dependent Mechanical Properties of Ultra-High Performance Concrete	403
<i>Srishti Banerji</i>	
18. Smart Tunnel Fire Safety Management by Sensor Network and Artificial Intelligence	423
<i>Xinyan Huang, Xiqiang Wu, Xiaoning Zhang and Asif Usmani</i>	
Index	445
