Introduction	1
--------------	---

PART I

1	What are markets?	9
1.	Introduction	9
2.	Marketplaces	10
2.1.	Marketplaces embody markets	10
2.2.	Markets and market society	11
2.3.	Markets, land, and labour	13
3.	Market system	14
3.1.	Market infrastructure and arbitrage	14
3.2.	Markets and institutions	15
4.	Markets: For good or bad?	17
5.	Market economy versus capitalism	18
6.	Conclusion	20
	Major chapter insights	21
	Notes	21
	References	23
2	Economics as the science of markets	26
1.	Introduction	26
2.	What is science? The first-, second-, and third-person view	27
3.	Economics, the economy, and markets	29
3.1.	The economy as an object of science	29
3.2.	Performativity and materiality of markets	31
4.	Economic models as mechanistic explanations	33
5.	Economic models triangulate cross-disciplinary data and hypotheses	37
6.	Economics is entangled with its object: Reflexivity	38
7.	Conclusion	40

Major chapter insights	41
Notes	42
References	43
3 Economics and values	48
1. Introduction	48
2. Freedom, values, and markets	49
2.1. Freedom of choosing preferences	49
2.2. Freedom and social interdependence	50
2.3. Freedom and rationality	51
2.4. Freedom and social justice	53
3. Efficiency	54
3.1. Efficiency as progress	54
3.2. Trade-offs: Efficiency versus values	55
4. Markets, economists, and values	58
5. Conclusion	59
Major chapter insights	59
Notes	60
References	61

PART II

4 Evolution, ecology, economy	67
1. Introduction	67
2. Physical principles of evolution	68
2.1. Economic niche, environment, Earth system	68
2.2. Thermodynamic principles of evolution	70
2.3. Metabolism and growth	74
3. Fundamentals of evolution	77
3.1. Selection, fitness, adaptation	77
3.2. The VSR mechanism and levels of selection	80
4. The evolutionary economy of living systems	82
4.1. Evolving synergy in ecosystems and the human economy	82
4.2. Cultural evolution, institutions, and human ultra-sociality	84
5. Conclusion	88
Major chapter insights	89
Notes	89
References	92
5 Specialisation and cooperation	99
1. Introduction	99
2. Specialisation and exchange: Gains and limitations	100
2.1. Comparative advantage	100
2.2. The specialisation dilemma	102

3.	Strategic interaction and power	104
3.1.	The archetypes	104
3.2.	Power and forced specialization	108
4.	Externalities and the efficiency of specialisation	111
5.	Conclusion	115
	Major chapter insights	116
	Notes	117
	References	119
6	Production and technological evolution	123
1.	Introduction	123
2.	Production in the technosphere	124
2.1.	The technosphere	124
2.2.	Production and consumption in the ecological dimension	126
3.	Specialisation and technology	129
3.1.	Engineering versus economic approaches to production	129
3.2.	Production and use of technology	132
3.3.	Technological evolution	135
4.	Firms, technology, and specialisation	138
4.1.	The firm as organisational form of specialisation	138
4.2.	Technology and power in firms	140
5.	Conclusion	142
	Major chapter insights	143
	Notes	143
	References	146

PART III

7	The economic agent	153
1.	Introduction	153
2.	Reframing rationality in economics	154
3.	Brain, reason, and human sociality	155
3.1.	The nature of the brain: Predictive and social	155
3.2.	Reason and rationality	158
3.3.	Emotions	160
4.	The economic agent	161
4.1.	Agency and agential power	161
4.2.	Identity	163
4.3.	Performativity	165
5.	Mechanisms of choice and valuation	166
5.1.	Imitation and learning	166
5.2.	Wanting, liking, and happiness	168
5.3.	Creativity and entrepreneurial action	169
6.	Conclusion	171

Major chapter insights	172
Notes	173
References	177
8 Networks and social interaction	185
1. Introduction	185
2. A short primer of network analysis	186
2.1. Fundamental types of network configurations in the context of markets	186
2.2. Dimensions of networks	190
3. Network structure and dynamics	194
3.1. Network structure and agential power	194
3.2. Social capital	197
3.3. Boundaries in networks: In-group/out-group	201
3.4. Network dynamics and frequency-dependent mechanisms	203
4. Conclusion	207
Major chapter insights	208
Notes	209
References	211
9 Institutions	216
1. Introduction	216
2. Following an institution	217
2.1. Cognitive mechanisms of institutionalisation	217
2.2. Institutions and emotions	220
3. Performing institutions	221
3.1. Performative mechanisms in two dimensions	221
3.2. Path dependency of institutional evolution	224
4. The cost of institutions	226
4.1. The basic setup	226
4.2. Economic transaction costs	227
4.3. Political transaction costs	229
4.4. Political transaction costs on the constitutional level and the social contract	231
5. Power and institutions	232
5.1. Institutions and endogenous agential power	232
5.2. Institutions and violence	233
5.3. Evaluating institutions	235
6. Conclusion	236
Major chapter insights	237
Notes	238
References	240

10	Money and value	246
1.	Introduction	246
2.	Performing money	247
2.1.	The institution of money	247
2.2.	Money, prices, and arbitrage	250
3.	The psychology of money: Anchoring the performativity of monetary institutions	253
3.1.	Agential power and the value of money	253
3.2.	Cognition and money emotions	254
4.	Money, arbitrage, and the objectivisation of subjective value	256
4.1.	Objectification of value as performative rationalisation of choice	257
4.2.	Entrepreneurial rent and exchange value	261
4.3.	Money as form of social capital	262
5.	Conclusion	264
	Major chapter insights	264
	Notes	265
	References	267
11	Markets evolving	272
1.	Introduction	272
2.	Characteristics of markets: A reprise	273
2.1.	Elements of markets	273
2.2.	A simple map of a market	275
3.	The evolutionary market process: Competition, endogenous niche formation, and growth	277
4.	Money, prices, and market states	280
4.1.	Entrepreneurship and pricing under the shadow of the specialisation dilemma	280
4.2.	Beyond equilibrium: Prices, market clearing, and market states	282
5.	Entrepreneurs and firms as market makers	284
6.	Markets and institutions	288
7.	Conclusion	290
	Major chapter insights	290
	Notes	291
	References	293

PART IV

12	Money and finance	301
1.	Introduction	301
2.	Private and sovereign money	302

2.1. Private money as assetified debt	302
2.2. Sovereign money as public unit of account	305
2.3. Linkages between primary and secondary monetary communities	306
3. Money and capital	308
3.1. Saving and investment relating to types of agents	308
3.2. Deconstructing the capital market	312
3.3. Valuing capital	316
4. Assetification and liability	319
5. Conclusion	321
Major chapter insights	322
Notes	323
References	325
13 Economic fluctuations and aggregate economic evolution	330
1. Introduction	330
2. Schumpeterian dynamics and techno-institutional regimes	331
3. Economic fluctuations of monetary aggregates:	
Macroeconomics and accounting balances	335
4. Expectations as drivers of economic fluctuations	336
4.1. Individual expectations	337
4.2. Collective dynamics	338
5. Patterns of economic fluctuations	340
5.1. Entrepreneurship and technological change	340
5.2. Finance and financial crises	341
6. Fluctuations and economic policy	344
6.1. Performative measurement and modelling	344
6.2. Monetary policy	345
6.3. Fiscal policy and reform	347
7. Economic fluctuations as shifts in market states	349
8. Conclusion	353
Major chapter insights	354
Notes	354
References	356
14 The economics of global markets	361
1. Introduction	361
2. Transactions and the spatial structure of global markets	362
2.1. Deconstructing global transactions	362
2.2. Spatial structure, borders, and costs of global economic transactions	364
2.3. The exchange rate and arbitrage	367
3. Market access rights and institutions governing global transactions	369
3.1. MARs and two-level exchange	370
3.2. MARs and currency areas	373

4.	The evolution of the global division of labour	375
4.1.	Evolving comparative advantage, capacities to trade, and locational externalities	375
4.2.	Multinational enterprises and the structure of international production	378
4.3.	National payment balances and their evolution over time	380
5.	Conclusion	383
	Major chapter insights	383
	Notes	384
	References	387
15	Markets and inequality	393
1.	Introduction	393
2.	Concepts and measurement of inequality	394
3.	Structural inequality and multilevel market selection	396
3.1.	Country-level inequality regimes and formal institutions	396
3.2.	Firms and interfirm competition	398
4.	Interpersonal inequality: Individual differences, networks, and social mobility	403
4.1.	Individual differences, nature versus nurture, and path dependency	403
4.2.	Human capital: Educational stratification and labour markets	405
4.3.	Social capital: Interaction in social networks and divergence	406
4.4.	Entrepreneurship and risk-taking	409
5.	Legitimacy and performativity of regimes of inequality	410
6.	Conclusion	412
	Major chapter insights	413
	Notes	414
	References	416
16	Global economic growth in the Earth system	421
1.	Introduction	421
2.	The evolution of the human economy	422
3.	Economic growth and the technosphere	426
4.	Energy and limits to growth	428
5.	Markets as drivers of growth	432
6.	Anthropocentric versus geocentric conceptions of growth	435
6.1.	The anthropocentric perspective	435
6.2.	The geocentric perspective	438
7.	Conclusion	439
	Major chapter insights	440
	Notes	442
	References	444

PART V

17	Economic policy	453
1.	Introduction	453
2.	Economic policy and political competition: An evolutionary approach	454
2.1.	Economic policy and the state	454
2.2.	Political competition as an evolutionary process	456
3.	Realms of political competition	459
3.1.	Competition for public opinion	459
3.2.	Competition for votes within jurisdictions	460
3.3.	Competition for (bottom-up) influence on political decision makers	461
3.4.	Interjurisdictional competition	464
3.5.	Occupation of political elite positions and political decision making	465
3.6.	Policy implementation and the bureaucracy	467
4.	Deliberation, values, and economic policy	468
4.1.	Inclusive deliberation as a procedural criterion	468
4.2.	Freedom and human dignity as substantive criteria	469
4.3.	The deliberative policy process in interjurisdictional competition	471
5.	Conclusion	472
	Major chapter insights	473
	Notes	474
	References	476
18	Epilogue: The economist as adviser	482
	Notes	489
	References	490
	Index	492
