Introduction	5
 Section I	
Anthropogenic pollution – research directions and new technologies in environmental engineering and energy	7
Selected threats and methods of protection of critical infrastructure objects in the context of the effects of disrupting their functioning and ecological safety <i>Emilia Basta, Katarzyna Dyrek, Józef Ciula.....</i>	8
Analysis of atmospheric air pollution with PM 10 and PM 2.5 in selected cities of the Małopolskie Voivodeship in 2015-2020 <i>Emilia Basta, Katarzyna Dyrek, Aneta Gargula.....</i>	23
Ecological awareness of the inhabitants of Nowy Sącz County <i>Aleksandra Bodziony, Karol Plata.....</i>	36
Subjective assessment of thermal comfort in an educational building <i>Luiza Dębska, Natalia Krawczyk.....</i>	51
Changes in electrokinetic potential of yeast cells of the candida genus under the influence of submicron polystyrene particles <i>Joanna Kotyńska, Marcin Zajac, Kacper Michał Naumowicz, Mateusz Worobiczuk, Monika Naumowicz</i>	58
Water level dynamics in lakes within the range of the cone of depression an opencast mine: Physicochemical effects of extreme precipitation <i>Tomasz Joniak, Maciej Gąbka, Michał Rybak.....</i>	66
The variability of heavy metals in PM 10 dust in the Podkarpackie Voivodeship <i>Katarzyna Maj-Zajezierska</i>	77
“We know each other for so long and he’s never gonna give you up” – review of persistent plastic particles as a big unknown in present environment’s effect on human health <i>Mateusz Worobiczuk, Joanna Kotyńska, Marcin Zajac, Monika Naumowicz</i>	90
Heat transfer phenomena on the propulsion system and solar panels’ working parameters <i>Yusuf Yurtsever, Zill-e-Hussain.....</i>	99

Section II**Intelligent IT and mechatronic solutions as a guarantee of reliability and safety of systems of means of transport and logistics 105**

Software encryption as a smart low-cost method prevention against cyber attack in automotive embedded systems
Marcin Gajdzik 106

Review of performance indicators used in transport and forwarding companies
Teresa Gajewska, Anna Grabarz 112

Testing of embedded systems in the automotive industry
Anna Gnacy-Gajdzik 127

Failure Mode and Effect Analysis (FMEA) in risk assessment of rail vehicles
Maciej Grzywina, Dariusz Dopierała, Paweł Biel, Maciej Szkoda 132

Quantitative and qualitative analysis of the periodic technical tests at selected vehicle control stations
Anna Kochanek, Józef Janczura 141

Design solutions for rail vehicles contributing to the improvement of the natural environment
Wiesław Szewczyk, Marek Babel, Petro Dumenko 156

Development trends in modern logistical tools
Sylwia Tasz, Marcin Gorzelany 169

Section III**New challenges, technologies and solutions innovations in production engineering 179**

Noise reduction at the car body parts assembly line
Bogusław Cieślowski 180

Numerical analysis of the cylinder head casting
Jowita Tokarska, Paweł L. Żak 190

Plastic formation in the process of cutting the material due to drilling
Tadeusz Zaborowski 202

Analysis of selected crankshaft casting technologies using simulation tools
Katarzyna Żak, Rafał Dańko 221
