

## Contents

|   |     |
|---|-----|
| <i>Foreword</i> .....   | V   |
| <i>The transfer of tokens in generalized nets with tokens duration of life</i> .....  | 1   |
| V. Andonov  |     |
| <i>Generalized Net of the Process Cauterization Over Social Networks</i> .....  | 11  |
| S. Andreev, S. Sotirov  |     |
| <i>Bipolarity in the Querying of Temporal Databases</i> .....   | 21  |
| C. Billiet, J.E. Pons, O. Pons, G. De Tré   |     |
| <i>Proposed multi-criterion optimisation method of school timetabling problem</i> .....   | 39  |
| J. M. Czerniak, W.T. Dobrosielski, R.A. Angryk  |     |
| <i>Generalized net model of the process of the prognosis biomass accumulation using TEMPO-amine metal complexes with neural network</i> .....                             | 57  |
| G. Grigorova, K. Vassilev, S. Sotirov   |     |
| <i>Modeling the influence of repeated marketing communication on the decision making process</i> .....  | 67  |
| A. Jastrzebska, W. Homenda  |     |
| <i>Estimation of the relations of: equivalence, tolerance and preference on the basis of pairwise comparisons in binary and multivalent form with random errors</i> ..... | 89  |
| L. Klukowski  |     |
| <i>Generalized Net Model for Describing Some Banking Activities</i> .....   | 111 |
| I. Mihailov   |     |

|  |     |
|--|-----|
| <i>Modeling of Electronic Learning Environment with Generalized Nets</i> .....   | 119 |
| D. Orozova   |     |
| <i>Generalized Nets Model of Rank-Based Fitness Assignment in Genetic Algorithms</i> .....                                   | 127 |
| T. Pencheva, K. Atanassov, A. Shannon  |     |
| <i>Multidimensional approach to interval uncertainty calculations</i> .....  | 137 |
| A. Piegat, M. Landowski  |     |
| <i>Modelling the brain-state-in-a-box neural network with a generalized net</i> .....  | 153 |
| S. Sotirov, M. Krawczak, K. Atanassov  |     |
| <i>A choice of uncertainty and imprecision representation for diagnostic reasoning</i> .....                                 | 161 |
| E. Straszecka  |     |
| <i>Fuzzy C-Means Cluster Analysis and Approximated Data Strings in Operation Prognosis for Gastric Cancer Patients</i> ..... | 181 |
| H. Zettervall, E. Rakus-Andersson, H. Forssell   |     |
