|--|----|
| <i>Foreword</i> | V |
| <i>Generalized net model with intuitionistic fuzzy scale for evaluating the degree of attacked messages sent over the public network</i> | 1 |
| K. T. Atanassov and I. Vardeva | |
| <i>Generalized net models of conflict resolution approaches in version control systems. Part 1: Lock-modify-unlock</i> | 13 |
| V. Atanassova | |
| <i>Generalized net model of combined transport between road and railway transport</i> | 25 |
| V. Bobev and S. Sotirov | |
| <i>Generalized net model of combined transport between railway and water transport</i> | 31 |
| V. Bobev | |
| <i>The Kemeny median for partial rankings. Binary pairwise comparisons matrix approach</i> | 39 |
| H. Bury and D. Wagner | |
| <i>Filters with T-norms and B-operations</i> | 53 |
| B. S. Butkiewicz | |
| <i>Interval type-2 fuzzy logic: Theory and applications</i> | 63 |
| O. Castillo and P. Melin | |
| <i>Generalized net model of the process of the prognosis biomass accumulation with neural network</i> | 79 |
| M. Dimitrova, K. Vasilev and S. Sotirov | |

| | |
|--|-----|
| <i>Questions of information imprecision in phonetics</i> | 91 |
| K. Dyczkowski | |
| <i>Using bipolar satisfaction degrees in fuzzy querying</i> | 99 |
| Guy De Tré, S. Zadrozny, T. Matthé, J. Kacprzyk and A. Bronselaer | |
| <i>Study of classifiers conjunction in optical music recognition</i> | 113 |
| W. Homenda and W. Lesinski | |
| <i>Statistics with fuzzy data - a short overview</i> | 123 |
| O. Hryniewicz | |
| <i>Aspects of intuitionistic fuzzy sets and possibility theory in graphical object classification for CBIR</i> | 133 |
| T. Jaworska | |
| <i>On time series envelopes for classification problems</i> | 149 |
| M. Krawczak and G. Szkatuła | |
| <i>On the choice of membership function in a fuzzy model of compliance with highly uncertain emissions</i> | 165 |
| Z. Nahorski and J. Horabik | |
| <i>Fuzzy approach to evaluation of portfolio of financial and insurance instruments</i> | 189 |
| P. Nowak and M. Romaniuk | |
| <i>Asymmetric distances and fuzzy grouping</i> | 207 |
| J.W. Owsinski | |
| <i>Generalized net model of an advisory system for on-line control of yeast fed-batch cultivation</i> | 217 |
| T. Pencheva | |

| | |
|--|-----|
| <i>One-dimensional model of approximate reasoning in surgical considerations.....</i> | 233 |
| E. Rakus-Andersson | |
| <i>Generalized net model of the phases of the data mining process.....</i> | 247 |
| E. Sotirova and D. Orozova | |
| <i>IFSs theory in the modelling of trust and distrust</i> | 261 |
| A. Stachowiak | |
| <i>Generalized net model of impulsive delay cellular neural networks.....</i> | 273 |
| I. M. Stamova, G. Tr. Stamov and K. T. Atanassov | |
| <i>On linguistic interpretation of data-driven knowledge</i> | 285 |
| E. Straszecka | |
| <i>Generalized net model for creating virtual private network using point-to-point protocol over secure shell2 for building passwordless vpn connection.....</i> | 293 |
| I. Vardeva | |
| <i>Generalized net model for building a standard ad-hoc on-demand distance vector routing in a wireless network.....</i> | 303 |
| I. Vardeva and D. Valchev | |
| <i>The use of consistency and confirmation measures in linguistic summaries of time series</i> | 311 |
| A. Wilbik and J. Kacprzyk | |
