

## Contents

<b>Introduction</b>	<b>7</b>
<b>1 Economic aspects of using wind energy</b>	<b>9</b>
<b>1.1. Costs and value of wind energy</b>	14
<b>1.2. Offshore and onshore wind farms</b>	18
<b>1.3. Economic efficiency indicators based on UNIDO guidelines</b>	28
<b>1.4. Economic analysis of investing in wind energy</b>	33
<b>1.4.1 Estimated energy price for investment financing options</b>	33
<b>1.4.2 Conclusions stemming from the analysis</b>	40
<b>1.5. Opportunities for using wind energy</b>	41
<b>1.6. The future of wind energy</b>	46
<b>2 Education that enriches imagination</b>	<b>49</b>
<b>2.1. Ecology and environmental education</b>	57
<b>2.1.1 Environmental education in kindergarten – children's conscious contact with nature and technology</b>	69
<b>2.1.2 Environmental education in primary school – early education stage</b>	72
<b>2.1.3 Environmental education in primary school – 2<sup>nd</sup> stage of school education</b>	74
<b>2.1.4 Formal and informal education</b>	76
<b>2.2. Didactic resources and methods in environmental education</b>	79
<b>2.2.1 Didactic resources</b>	79
<b>2.2.2 Didactic methods</b>	80
<b>2.2.3 Activating teaching methods during the introduction of ecological content</b>	85
<b>2.2.4 Activating teaching methods in ecology lessons devoted to the energy industry</b>	88
<b>2.3. Summary</b>	89
<b>3 Environmental aspects of using wind energy</b>	<b>90</b>
<b>3.1. Contemporary threats to the acoustic climate</b>	92
<b>3.2. Threat to migrating birds</b>	102
<b>3.3. Summary</b>	109
<b>Bibliography</b>	<b>113</b>
