CONTENTS

Preface 7

1. INFORMATION PROBLEMS IN USING MODERN INFORMATION AND COMMUNICATION TECHNOLOGIES 9

1.1. Information and communication technologies 9
1.2. Common language 11
1.3. Uncertainty of the properties of the goods 12
1.4. Uncertainty of partner's behaviour 13
1.5. Problems during use 16
1.6. Legal problems 18
1.7. Social consequences of using modern ICTs 18

References 21

2. COMMUNICATION AND INFORMATION TRANSFER: OPPORTUNITIES AND THREATS FOR AN ORGANIZATION DUE TO NEW TECHNOLOGIES 22

2.1. Communication process 22
2.2. Information systems in the organization and modern information and communication technologies (ICT) 23
2.3. Threats to the use of ICT 28

References 31

3. PERCEPTION OF MODERN INFORMATION TECHNOLOGIES AMONG CONSUMERS AND ENTREPRENEURS 34

3.1. Importance of information in decision-making processes 34
3.2. Consumers' perception of IT – results of investigations 35
3.3. Artificial Intelligence and business strategy 40
3.4. IT and management 41

References 43

4. MODELLING IN THE IMPLEMENTATION OF INTEGRATED IT SYSTEMS 44

4.1. Integrated Information Technology systems 44
4.2. The core of IT modelling for business applications 48
4.3. Aspects of the integrated IT project supporting management 51
4.4. Desired description of the results of given implementation phase 53

4.5. Desired form of measuring the implementation results 54
4.6. Conclusions 56
References 57

5. USER EXPERIENCE – MODELS AND TRENDS IN DIGITAL PRODUCT DESIGN 59

5.1. User experience 59
5.2. Design models in UX 60
5.3. Expert tests and their importance in user-centred design 63
5.4. Trends in UX design 65
References 67

6. MOBILE MICRO-MOMENTS AND THEIR INFLUENCE ON CONSUMERS BEHAVIOUR 69

6.1. Mobile micromoments and recent changes 69
6.2. Categories of micro-moments 70
6.3. Marketing strategy and the idea of micro-moments 73
6.4. Opportunities and risks related to micro-moments 76
References 77

7. ENTERPRISE RESOURCE PLANNING-TYPE IT SYSTEMS FOR SUPPLY CHAIN MANAGEMENT 79

7.1. The specific role of IT systems in enterprise development 79
7.2. Development of information systems 81
7.3. ERP system characteristics 82
7.4. ERP, WMS and SCM systems – advantages and disadvantages 85
References 87
