

# Contents

<i>Preface</i>	vii
<b>1 Creating and examining databases in SPSS</b>	1
<i>1.1 Creating the SPSS spreadsheet and manipulating data</i>	1
<i>1.2 Descriptive statistics with frequencies</i>	5
<i>1.3 Cross tabulation</i>	7
<b>2 Introduction to exploratory data analysis</b>	12
<i>2.1 Exploratory data analysis</i>	12
<i>2.2 Verification of assumptions</i>	17
<i>2.3 Outliers</i>	23
<i>2.4 Missing values</i>	24
<b>3 Analysis of variance</b>	27
<i>3.1 Application of t-test in SPSS</i>	27
<i>3.2 Theoretical background – analysis of variance (ANOVA)</i>	29
<i>3.3 Marketing application of ANOVA</i>	30
<i>3.4 Application of ANOVA in SPSS</i>	31
<i>3.5 Theoretical background – multivariate analysis of variance (MANOVA)</i>	39
<i>3.6 Application of MANOVA in SPSS</i>	41
<b>4 Regression analysis</b>	48
<i>4.1 Theoretical background – simple regression analysis</i>	48
<i>4.2 Theoretical background – multiple regression analysis</i>	50
<i>4.3 Marketing application of regression analysis</i>	55
<i>4.4 Application of multiple regression in SPSS</i>	55
<b>5 Time series analysis</b>	63
<i>5.1 Theoretical background – time series analysis</i>	63
<i>5.2 Marketing application of time series analysis</i>	66
<i>5.3 Application of time series analysis in SPSS</i>	67

<b>6 Discriminant analysis</b>	83
6.1 Theoretical background – two groups discriminant analysis	83
6.2 Theoretical background – multiple discriminant analysis	85
6.3 Marketing application of discriminant analysis	86
6.4 Application of discriminant analysis in SPSS	87
6.5 Theoretical background – logistic regression	94
6.6 Application of logistic regression in SPSS	96
<b>7 Cluster analysis</b>	106
7.1 Theoretical background – cluster analysis	107
7.2 Marketing application of cluster analysis	112
7.3 Application of cluster analysis in SPSS – hierarchical approach	112
7.4 Application of cluster analysis in SPSS – nonhierarchical approach	123
<b>8 Exploratory Factor Analysis (EFA)</b>	131
8.1 Theoretical background – exploratory factor analysis	131
8.2 Marketing application of exploratory factor analysis	135
8.3 Application of exploratory factor analysis in SPSS	136
<b>9 Confirmatory Factor Analysis (CFA)</b>	152
9.1 Theoretical background – confirmatory factor analysis	152
9.2 Marketing application of CFA	154
9.3 Application of confirmatory factor analysis with AMOS	155
9.4 The CFA model in AMOS	155
9.5 The CFA analysis	156
9.6 The CFA output	162
<b>10 Structural Equation Modeling (SEM)</b>	173
10.1 Theoretical background – structural equation modeling	173
10.2 Marketing application of SEM	174
10.3 Application of structural equation modeling with AMOS	175
10.4 The SEM model in AMOS	176
10.5 The SEM analysis	179
10.6 The SEM output	181
<i>Appendix 1: Fitness center questionnaire</i>	191
<i>Appendix 2: Supermarket questionnaire</i>	194
<i>Bibliography</i>	197
<i>Index</i>	199
