

Contents

Foreword, vii
Preface, viii
Acknowledgments, x
List of Abbreviations, xi

Chapter 1 Fundamentals, 1

- Standards of Excellence in Interventional Cardiology, 1
- Introduction to Interventional Procedures, 4
- Vascular Access, 8
- Coronary Anatomy and Projections, 25
- Anomalies, 41
- Left Ventriculography and Aortography, 51
- Radiation Safety, 58

Chapter 2 Devices in Practice, 66

- Guiding Catheters, 66
- Guide Wires, 92
- Balloons, 99
- Stents, 110
- Closure Devices, 122

Chapter 3 The Interventional Patient, 129

- Elective PCI for Stable Coronary Artery Disease, 129
- PCI in Acute Coronary Syndromes, 133
- The Diabetic Patient, 162

Chapter 4 Interventional Pharmacotherapy, 167

- Antiplatelet Agents in PCI, 167
- Antithrombotic Agents in PCI, 182

Chapter 5 Techniques in Specific Lesions, 189

- Left Main Coronary Artery, 189
- Bifurcation Lesions, 203
- Ostial Lesions, 238
- Chronic Total Occlusion, 252
- Grafts and Conduits, 273

Chapter 6 Complications, 288

- Contrast Reactions, 288
- Femoral Access Site Problems, 289
- Radial Access Site Problems, 293
- Air Injection, 294
- No-Reflow/Slow-Reflow Phenomenon, 294
- Coronary Spasm, 296
- Pseudostenoses, 296
- Coronary Perforation, 296
- Coronary Dissection, 299
- Stent Thrombosis, 303
- Restenosis, 307
- Stent Loss, 310
- Hypotension, 311
- Hypoglycemia, 312
- Contrast-Induced Nephropathy, 312
- New ST Elevation or Marked ST Depression, 317
- Cardiac Arrest, 317
- Emergency CABG, 319
- Death, 319

Chapter 7 Intracoronary Imaging, 320

- Intravascular Ultrasonography, 320
- Virtual Histology, 335
- Fractional Flow Reserve (FFR), 336
- Optical Coherence Tomography, 339

List of Trials and Studies, 345

References, 348

- Trials, 348
- Guidelines, 357
- Other Resources, 357

Index, 359
