

Contents

	Preface	xiii
	List of Contributors	xv
1	Introduction to Material Instabilities in Solids	1
	<i>E. van der Giessen and R. de Borst</i>	
1.1	General introduction	1
1.2	Classical Bifurcation Theory	6
1.3	Experiments and Physical Mechanisms	7
1.4	Localization Without Internal Length Scales	8
1.5	Localization With Internal Length Scales	10
	References	13
2	Stability of Layered Geological Structures: An Asymptotic Solution	15
	<i>Y.M. Leroy and N. Triantafyllidis</i>	
2.1	Introduction	15
2.2	Model Problems and Variational Formulation	16
2.3	Asymptotic Solution	19
	References	25
3	Analysis of Shear Failure in Concrete Materials	27
	<i>K. William, H. Kang, B. Shing and E. Spacone</i>	
3.1	Introduction	27
3.2	Triaxial Concrete Model	28
3.3	Failure Modes of Concrete Model	31
3.4	Failure of Triaxial Concrete Model	33
3.5	Concluding Remarks	38
	Acknowledgements	39
	References	39
4	On the Effects of Inertial Coupling on the Wave-Speeds of Elastic-Plastic Fluid-Saturated Porous Media	41
	<i>B. Loret and E. Rizzi</i>	
4.1	Introduction	41
4.2	Equations of Motion	42
4.3	Consecutive Equations	44
4.4	Wave-Speeds	47
	Acknowledgements	51
	References	51
	Appendix A	52

5	Microstructured Solids: Non-Linear Model and Analysis of Magneto-Elastic Wave Processes	55
	<i>V. Erofeyev and S. Kovalev</i>	
5.1	Introduction	55
5.2	Non-Linear Magneto-Elastic Equations	55
5.3	Plain Longitudinal Waves	56
5.4	Plain Shear Waves	61
	Acknowledgement	64
	References	64
6	Thermodynamics of Crystal Viscoplasticity and Instability Phenomena	65
	<i>P. Perzyna</i>	
6.1	Introduction	66
6.2	Experimental and Physical Motivations	67
6.3	Thermodynamic Constitutive Structures of Inelastic Single Crystals	68
6.4	Rate Independent Response of Single Crystals	73
6.5	Adiabatic Process	74
6.6	Macroscopic Adiabatic Shear Band Formation	78
6.7	Discussion of the Synergetic Effects and Comparison with Experimental	82
6.8	Observations	86
	Final Comments	87
	Acknowledgement	87
	References	
7	Instability Issues in Single Crystal Plasticity	91
	<i>P. Steinmann</i>	
7.1	Introduction	91
7.2	Multisurface Plasticity Framework	92
7.3	Multisurface Localization Analysis	94
7.4	Non Schmid Single Crystal Plasticity	97
7.5	Planar Localization Analysis	100
7.6	Model Adaptive Strategy	102
7.7	Summary and Conclusion	104
	References	105
8	On the Use of Strain-Softening Models for the Simulation of Strong Discontinuities in Solids	107
	<i>J. Oliver, M. Cervera and O. Manzoli</i>	
8.1	Strain Softening, Strain Localization and Displacement Discontinuities	107
8.2	The Strong Discontinuity Approach	110
8.3	Generalization to 2D Problems	113
8.4	Representative Numerical Simulation	121
8.5	Concluding Remarks	121
	References	123

9	Thermomechanics Based Theory and Analysis of Cracking Localization in Concrete Dam under Earthquake Excitation	125
	<i>H. Horii, J. Inoue and M. Brocca</i>	
9.1	Introduction	126
9.2	Localization in Simple Spring-Crack Element Models	127
9.3	General Theory	130
9.4	FEM Analysis of Cracking Localization	132
9.5	Concluding Remarks	136
	References	136
10	Localisation Patterns in Ductile and Brittle Geomaterials	137
	<i>J. Desrues</i>	
	Introduction	137
10.1	Shear Bands in Field Cases and Laboratory Tests	139
10.2	Localisation in Granular Bodies	140
10.3	Localisation in Cohesive Geomaterials	148
	Conclusion	153
	References	156
11	In-Plane Crushing of a Polymeric Honeycomb	159
	<i>S.D. Papka and S. Kyriakides</i>	
11.1	Introduction	159
11.2	Uniaxial Crushing Experiments	160
11.3	Analysis of Uniaxial Crushing	165
11.4	Biaxial Crushing of Honeycomb	171
	Acknowledgements	182
	References	182
12	Experimental and Numerical Investigation of Size Scale Effects in Concrete Fracture	185
	<i>M.R.A. van Vliet and J.G.M. van Mier</i>	
12.1	Introduction	185
12.2	New Size Effect Tests	189
12.3	Preliminary Experimental Results	195
12.4	Numerical Lattice Model	196
12.5	Results and Conclusion	204
	Acknowledgements	205
	References	205
13	Post-Peak Behaviour of Rocks and Natural Building Stones in Uniaxial Compression	207
	<i>I. Vardoulakis, S. Kourkoulis and A. Skjaerstein</i>	
13.1	Introduction	207
13.2	The Compression Test in the Post-Peak Regime	209
13.3	Post-Peak Stress Diffusion Theory	213
13.4	Experimental Results and Discussion	220
13.5	Conclusions	226
	Acknowledgements	226
	References	226

14	Inelastic Deformation of F.C.C. Single Crystals by Slip and Twinning	227
	<i>A. Staroselsky and L. Anand</i>	
14.1	Introduction	228
14.2	Constitutive Equations	228
14.3	Plane-Strain Deformation of F.C.C. CO-8% Fe Single Crystals	232
14.4	Concluding Remarks	237
	Acknowledgements	238
	References	238
	Appendix	240
15	Effects of Strain Paths on Sheet Metal Limit Strains	243
	<i>P.D. Wu, K. W. Neale and E. van der Giessen</i>	
15.1	Introduction	243
15.2	Constitutive Equations	244
15.3	Problem Formulation and Method of Solution	245
15.4	Results	248
15.5	Conclusions	252
	Acknowledgements	253
	References	253
16	Three-Dimensional Analysis of Localized Necking	255
	<i>A. Benallal</i>	
16.1	Introduction	255
16.2	Constitutive Equations	257
16.3	Field Equations and Boundary Conditions	258
16.4	Bifurcation Versus Perturbation Approach	259
16.5	Local 3D Analysis of the Deformation of the Sheet	260
16.6	Plane Stress Analysis	265
16.7	Concluding Remarks	267
	Acknowledgements	267
	References	267
17	Effects of Heterogeneities and Localization on Polymer Deformation and Recovery	269
	<i>M.C. Boyce and C. Chui</i>	
17.1	Introduction	269
17.2	Model Description	272
17.3	Simulation Results	278
17.4	Concluding Remarks	284
	Acknowledgements	284
	References	284
18	Strain Localization and Void Growth in Polymers	287
	<i>A.C. Steenbrink and E. van der Giessen</i>	
18.1	Introduction	287
18.2	Material Model	288
18.3	Localization and Shear Band Propagation	290
18.4	Numerical Model	292
18.5	Results	292
18.6	Discussion	300
	References	301

19	Nonaffine Network Model for Glassy Polymer and Prediction of Instability Propagation	303
	<i>Y. Tomita and T. Adachi</i>	
19.1	Introduction	303
19.2	Constitutive Equation	304
19.3	Identification of Deformation of Materials Parameters and Uniform	308
19.4	Deformation	310
19.5	Computational Prediction of Instability Propagation	318
	Conclusion	320
	Acknowledgements	320
	References	
20	Damage Localisation in Short Fibre Cementitious Composites	323
	<i>B.L. Karihaloo and J. Wang</i>	
20.1	Introduction	323
20.2	Problem Formulation and Mathematical Solution	325
20.3	Perturbation in Crack Lengths	328
20.4	Perturbation in Bridging Stiffnesses	334
20.5	Conclusion	335
	Acknowledgements	337
	References	337
21	Fracture Instabilities in Heterogeneous Materials: Brittleness, Size Effects and Fractality	339
	<i>A. Carpinteri</i>	
21.1	Introduction	340
21.2	Size Effects on Structural Brittleness	340
21.3	Size Effects on Material Strength and Toughness	348
	Acknowledgements	352
	References	353
22	Compression Fracture-Mechanics of Damage Localization and Size Effect	355
	<i>Z.P. Bazant</i>	
22.1	Introduction	355
22.2	Mechanism of Size Effect	356
22.3	Lack of Size in Axial Splitting	360
22.4	Size Effect for the Case of Many Independent Loads	361
22.5	Asymptotic Scaling for Tensile or Compressive Cracks with Residual Cohesive	362
22.6	Stress	363
	The Question of Size Effect on Kink Band Failure of Composites	363
	Acknowledgements	364
	References	
23	Nonlinear Modelling of Geomaterials and Self-Organization Phenomena	369
	<i>V.N. Nikolaevskiy</i>	
23.1	Abstract	369
23.2	Soils and Fragmented Rocks with Internal Oscillators	369
23.3	Interpenetrating Continua for Saturated Geomaterials	371
23.4	Dynamics of Geomaterials with Microstructure	374
23.5	Sine-Gordon Equation for Rotation Waves in Fragmented Rocks	379
	References	385

24	Quasi-Static and Dynamic Characteristics of Strain Gradient Dependent Non-Local Constitutive Models	387
	<i>F. Oka, H.B. Mühlhaus, A. Yashima and K. Sawada</i>	
24.1	Introduction	387
24.2	Gradient Dependent Elastic Model	388
24.3	Gradient Dependent Viscoplastic Model	393
24.4	Conclusions	403
	References	403
25	Higher-Order Damage Models for the Analysis of Fracture in Quasi-Brittle Materials	405
	<i>M.G.D. Geers, R.H.J. Peerlings, R. de Borst and W.A.M. Brekelmans</i>	
25.1	Introduction	405
25.2	Numerical Models	407
25.3	Applications	409
25.4	Conclusions	421
	References	422
26	On Gradient Regularization for Numerical Analyses in the Presence of Damage	425
	<i>C. Comi and L. Driemeier</i>	
26.1	Introduction	425
26.2	Gradient-Dependent Damage Models	426
26.3	One Dimensional Wave Propagation	427
26.4	Finite-Step Boundary Value Problems	430
26.5	Generalized Variables Finite-Element Formulation	433
26.6	Numerical Tests	435
26.7	Conclusions	439
	Acknowledgements	439
	References	440
27	Localisation of Damage in Quasi-Brittle Materials and Influence of Chemically Activated Damage	441
	<i>G. Pijaudier-Cabot, B. Gérard, N. Burlion and L. Molez</i>	
27.1	Introduction	441
27.2	Model Description	442
27.3	One-Dimensional Analysis of Strain Localisation	447
27.4	Numerical Simulations	449
27.5	Gradient Damage Model	451
27.6	Closure	455
	Acknowledgement	455
	References	455
28	Nonlocal Damage Effects on Plastic Flow Localization under Dynamic Loading	457
	<i>V. Tvergaard and A. Needleman</i>	
28.1	Introduction	457
28.2	Material Model	459
28.3	Numerical Model for the Notched Bar	461
28.4	Results	463
28.5	Concluding Remarks	468
	Acknowledgements	469
	References	469

29	Instabilities and Size Effects in Plasticity: Continuum and Dislocation Approaches	473
	<i>H.M. Zbib</i>	
29.1	Introduction	473
29.2	Basic Relations for Elasto-Plastic Deformation	475
29.3	Strain Gradient Plasticity	476
29.4	Three-Dimensional Dislocation Model	482
29.5	Concluding Remarks	486
	Acknowledgement	486
	References	486
30	Macroscopic Modelling of Stationary and Propagative Instabilities	489
	<i>L.J. Sluys and W.M. Wang</i>	
30.1	Introduction	489
30.2	A Classification of Macroscopic Instabilities	490
30.3	Constitutive Modelling	491
30.4	Algorithmic Aspects	494
30.5	Numerical Examples	499
	References	505
31	A Discussion of Strain Gradient Plasticity Theories and Application to Shear Bands	507
	<i>N.A. Fleck and J.W. Hutchinson</i>	
31.1	Introduction	507
31.2	Review of Fleck-Hutchinson Strain Gradient Theory	508
31.3	Study of Shear Localisation using Fleck-Hutchinson Non-Linear Deformation Theory	512
31.4	The Role of Imperfections in Shear Localisation according to the Fleck-Hutchinson Deformation Theory	515
	Acknowledgements	519
	References	519
32	A Beam Theory for Gradient Continua	521
	<i>H-B. Mühlhaus and P. Hornby</i>	
32.1	Introduction	521
32.2	Field Equations	524
32.3	Constitutive Relations	526
32.4	Example	527
32.5	Conclusion	531
	References	532
33	Recent Progress on Gradient Theory and Applications	533
	<i>E.C. Aifantis</i>	
33.1	Introduction	533
33.2	Gradient-Dependent Flow Stress Macroscopic Shear Bands	536
33.3	Gradient-Dependent Dislocation Dynamics and MD Patterning	537
33.4	Gradient Interpretation of Size Effects	538
33.5	Gradient Elasticity Solutions for Cracks and Dislocations	541
33.6	Size-Dependent Hardness	543
33.7	Forming Limit Diagrams (FLDs)	544
	Acknowledgement	545
