PREFACE	ix
ACKNOWLEDGMENTS	xi
CHAPTER 1 - INTRODUCTION	1
References	4
CHAPTER 2 - FUNDAMENTALS	5
2.1 Introduction	5
2.2 Dynamic Response of Simple Structural Models	6
2.2.1 General Formulations	6
2.2.2 Free Vibration	7
2.2.3 Forced Vibration	8
2.2.4 Transient Response	11
2.2.5 Response with Passive Damper	14
2.3 Dynamic Analysis of Structural Systems	18
2.3.1 General Formulation	18
2.3.2 Modal Superposition Method	20
2.3.3 Damping in Traditional and Passively Damped Structures	23
2.3.4 Direct Time Domain Analysis	24
2.4 Energy Formulations	25
2.4.1 SDOF Structures	26
2.4.2 Energy-based Design	30
2.4.3 MDOF Structures	31
2.5 Concluding Remarks	32
References	33
CHAPTER 3 - METALLIC DAMPERS	
3.1 Introduction	35

3.2 Basic Principles	37
3.2.1 Plasticity	37
3.2.2 Viscoplasticity	44
3.2.3 Thermal Effects	48
3.2.4 Failure Theories	48
3.3 Macroscopic Modeling	50
3.3.1 Experiment-based Modeling	50
3.3.2 Mechanics-based Modeling	51
3.4 Structural Analysis	57
3.5 Experimental Studies	59
3.6 Design Considerations	69
3.7 Structural Implementations	71
References	79
 CHAPTER 4 - FRICTION DAMPERS	 83
4.1 Introduction	83
4.2 Basic Principles	86
4.2.1 Solid Friction	86
4.2.2 Environmental Effects	89
4.3 Damper Behavior and Macroscopic Modeling	90
4.4 Structural Analysis	104
4.5 Experimental Studies	110
4.6 Design Considerations	116
4.7 Structural Implementations	119
References	123
 CHAPTER 5 - VISCOELASTIC DAMPERS	 127
5.1 Introduction	127
5.2 Basic Principles	127
5.3 Shear Storage and Shear Loss Moduli	131
5.3.1 Dependence on Excitation Frequency	134
5.3.2 Dependence on Ambient Temperature	138
5.3.3 Dependence on Internal Temperature	141
5.4 Analysis of Structures with Added VE Dampers	141
5.5 Experimental Studies	144
5.5.1 2/5-Scale Five-story Steel Frame	144
5.5.2 1/3-Scale Three-story Concrete Frame	152

5.6 Design Considerations and Implementational Issues.. 156

 5.6.1 Placement Strategies for VE Dampers 159

 5.6.2 Architectural Considerations..... 159

5.7 Structural Implementation..... 161

References 168

CHAPTER 6 - VISCOUS FLUID DAMPERS 171

6.1 Introduction 171

6.2 Basic Principles of Fluid Dynamics 174

 6.2.1 Balance Laws..... 175

 6.2.2 Inviscid Fluids..... 175

 6.2.3 Newtonian Fluids..... 176

 6.2.4 Temperature-dependent New-Newtonian Fluids 177

6.3 Damper Behavior and Macroscopic Modeling..... 181

 6.3.1 Cylindrical Pot Fluid Dampers 181

 6.3.2 Viscous Damping Walls..... 186

 6.3.3 Orificed Fluid Dampers..... 190

6.4 Structural Analysis..... 199

6.5 Experimental Studies 202

6.6 Design Considerations 218

6.7 Structural Implementations..... 219

References 225

CHAPTER 7 - TUNED MASS DAMPERS 227

7.1 Introduction 227

 7.1.1 Tuned Mass Dampers..... 229

7.2 Basic Principles 229

 7.2.1 Den Hartog’s Solution 231

 7.2.2 The Case of Damped Structures 233

 7.2.3 Other Optimization Criteria 237

 7.2.4 Wind vs. Earthquake Loads 241

7.3 Structural Analysis..... 245

 7.3.1 Elastic Structures 247

 7.3.2 Inelastic Structures 249

7.4 Experimental Studies 249

 7.4.1 Small-scale Tests 249

 7.4.2 Full-scale Test 255

7.5 Design Considerations and Implementational Issues.. 256

7.6 Structural Implementations	257
7.6.1 Centerpoint Tower, Sydney, Australia.....	259
7.6.2 Citicorp Center, New York and John Hancock Tower, Boston	260
7.6.3 Chiba Port Tower, Tokyo Bay, Japan	263
7.6.4 Funade Bridge Tower, Osaka, Japan	264
7.6.5 Steel Stacks, Kimitsu City, Japan	265
7.7 Related Development and Concluding Remarks	268
7.7.1 Nonlinear TMD and Impact Vibration Absorbers	269
7.7.2 Semi-Active TMD and Hybrid Mass Damper.....	270
References	276
CHAPTER 8 - TUNED LIQUID DAMPERS	281
8.1 Introduction	281
8.2 Basic Principles of Operation	285
8.3 Damper Behavior and Macroscopic Modeling.....	292
8.4 Structural Analysis and Design	299
8.5 Experimental Studies	303
8.6 Implementational Issues	305
8.7 Structural Implementations.....	306
References	315
CHAPTER 9 - SMART MATERIALS	319
9.1 Introduction	319
9.2 Shape Memory Alloys.....	319
9.2.1 Basic Principles	321
9.2.2 Structural Applications.....	322
9.3 Piezoelectric Materials.....	327
9.3.1 Basic Principles	327
9.3.2 Structural Applications.....	328
9.4 Electrorheological Fluids	332
9.4.1 Basic Principles	332
9.4.2 Structural Applications.....	336
9.5 Magnetorheological Fluids	338
References	341
