

TABLE OF CONTENTS

<i>Foreward</i>	v
<i>Preface</i>	vii
<i>Acknowledgments</i>	xi
1 Introduction	1
1.1 Energy Dissipation Devices	2
1.2 Effect of Viscous Damping on Dynamic Response	8
1.3 Damper-Added Structure versus Traditional Structure ...	19
1.4 Design and Analysis	21
2 Characterization and Applicability of Dampers	23
2.1 Metallic Yielding and Friction Devices	23
2.2 VE Solid Devices	30
2.3 Viscous Fluid Devices	35
2.4 Summary of Equivalent Damping and Stiffness	39
2.5 Applicability	39
3 Analysis of Damper-Added Structures	45
3.1 Nonlinear Structure/Nonlinear Damper (NS/ND) Procedure	45
3.2 Nonlinear Structure/Linearized Damper (NS/LD) Procedure	47
3.3 Linear Structure/Nonlinear Damper (LS/ND) Procedure	53
3.4 Linear Structure/Linearized Damper (LS/LD) Procedure	54
4 Damper Design for Structural Applications	57
4.1 General Considerations	57
4.2 Design Procedure	59
4.3 Design Examples	60
4.4 Application Examples	78

References	101
Appendix A: Nonproportional Damping	
Eigenvalue Solution	109
A.1 SDOF—Undamped System	110
A.2 SDOF—Viscous Damped System	112
A.3 MDOF—Undamped System	112
A.4 MDOF—Proportionally Damped System	114
A.5 MDOF—Nonproportionally Damped System	116
Appendix B: Code Development	127
B.1 Background	127
B.2 Appendix 13 for FEMA 368	128
